#	ARTICLE	IF	CITATIONS
1	The temperature of Europe during the Holocene reconstructed from pollen data. <i>Quaternary Science Reviews</i> , 2003, 22, 1701-1716.	3.0	850
2	Climate change and interconnected risks to sustainable development in the Mediterranean. <i>Nature Climate Change</i> , 2018, 8, 972-980.	18.8	776
3	Reconstructing biomes from palaeoecological data: a general method and its application to European pollen data at 0 and 6 ka. <i>Climate Dynamics</i> , 1996, 12, 185-194.	3.8	616
4	Pollen-based continental climate reconstructions at 6 and 21 Åka: a global synthesis. <i>Climate Dynamics</i> , 2011, 37, 775-802.	3.8	536
5	The human imperative of stabilizing global climate change at 1.5 Å°C. <i>Science</i> , 2019, 365, .	12.6	498
6	A 140,000-year continental climate reconstruction from two European pollen records. <i>Nature</i> , 1989, 338, 309-313.	27.8	444
7	Methodology of the last climatic cycle reconstruction in France from pollen data. <i>Palaeogeography, Palaeoclimatology, Palaeoecology</i> , 1990, 80, 49-69.	2.3	441
8	Palaeovegetation of China: a pollen data-based synthesis for the mid-Holocene and last glacial maximum. <i>Journal of Biogeography</i> , 2000, 27, 635-664.	3.0	382
9	Climatic Reconstruction in Europe for 18,000 YR B.P. from Pollen Data. <i>Quaternary Research</i> , 1998, 49, 183-196.	1.7	381
10	Synchronicity between marine and terrestrial responses to millennial scale climatic variability during the last glacial period in the Mediterranean region. <i>Climate Dynamics</i> , 2002, 19, 95-105.	3.8	381
11	Monsoon changes for 6000 years ago: Results of 18 simulations from the Paleoclimate Modeling Intercomparison Project (PMIP). <i>Geophysical Research Letters</i> , 1999, 26, 859-862.	4.0	374
12	Contrasting patterns of hydrological changes in Europe in response to Holocene climate cooling phases. <i>Quaternary Science Reviews</i> , 2003, 22, 1589-1596.	3.0	316
13	Climate variations in Europe over the past 140 kyr deduced from rock magnetism. <i>Nature</i> , 1994, 371, 503-506.	27.8	313
14	Dinoflagellate cyst assemblages as tracers of sea-surface conditions in the northern North Atlantic, Arctic and sub-Arctic seas: the new Ån= 677 Å€™ data base and its application for quantitative palaeoceanographic reconstruction. <i>Journal of Quaternary Science</i> , 2001, 16, 681-698.	2.1	303
15	Biome reconstruction from pollen and plant macrofossil data for Africa and the Arabian peninsula at 0 and 6000 years. <i>Journal of Biogeography</i> , 1998, 25, 1007-1027.	3.0	301
16	Tropical climates at the Last Glacial Maximum: a new synthesis of terrestrial palaeoclimate data. I. Vegetation, lake-levels and geochemistry. <i>Climate Dynamics</i> , 1999, 15, 823-856.	3.8	300
17	Last glacial maximum biomes reconstructed from pollen and plant macrofossil data from northern Eurasia. <i>Journal of Biogeography</i> , 2000, 27, 609-620.	3.0	287
18	The climate of Europe 6000 years ago. <i>Climate Dynamics</i> , 1996, 13, 1-9.	3.8	269

#	ARTICLE	IF	CITATIONS
19	Temperature and rainfall estimates for the past 40,000 years in equatorial Africa. <i>Nature</i> , 1990, 346, 347-349.	27.8	263
20	European summer temperatures since Roman times. <i>Environmental Research Letters</i> , 2016, 11, 024001.	5.2	260
21	Present-day and mid-Holocene biomes reconstructed from pollen and plant macrofossil data from the former Soviet Union and Mongolia. <i>Journal of Biogeography</i> , 1998, 25, 1029-1053.	3.0	245
22	Reconstruction of climate and vegetation changes of Lake Bayanchagan (Inner Mongolia): Holocene variability of the East Asian monsoon. <i>Quaternary Research</i> , 2006, 65, 411-420.	1.7	235
23	Tropical paleoclimates at the Last Glacial Maximum: comparison of Paleoclimate Modeling Intercomparison Project (PMIP) simulations and paleodata. <i>Climate Dynamics</i> , 1999, 15, 857-874.	3.8	234
24	Climatic changes in Eurasia and Africa at the last glacial maximum and mid-Holocene: reconstruction from pollen data using inverse vegetation modelling. <i>Climate Dynamics</i> , 2007, 29, 211-229.	3.8	233
25	Pollen-based biome reconstruction for southern Europe and Africa 18,000 yr bp. <i>Journal of Biogeography</i> , 2000, 27, 621-634.	3.0	229
26	Estimates of volcanic-induced cooling in the Northern Hemisphere over the past 1,500 years. <i>Nature Geoscience</i> , 2015, 8, 784-788.	12.9	220
27	Climate change: The 2015 Paris Agreement thresholds and Mediterranean basin ecosystems. <i>Science</i> , 2016, 354, 465-468.	12.6	209
28	Reconstruction of Holocene Precipitation Patterns in Europe Using Pollen and Lake-Level Data. <i>Quaternary Research</i> , 1993, 40, 139-149.	1.7	199
29	The climate in Western Europe during the last Glacial/Interglacial cycle derived from pollen and insect remains. <i>Palaeogeography, Palaeoclimatology, Palaeoecology</i> , 1993, 103, 73-93.	2.3	198
30	Mediterranean vegetation, lake levels and palaeoclimate at the Last Glacial Maximum. <i>Nature</i> , 1992, 360, 658-660.	27.8	177
31	A phytolith index as a proxy of tree cover density in tropical areas: calibration with Leaf Area Index along a forest-savanna transect in southeastern Cameroon. <i>Global and Planetary Change</i> , 2005, 45, 277-293.	3.5	177
32	Last Glacial Maximum temperatures over the North Atlantic, Europe and western Siberia: a comparison between PMIP models, MARGO sea-surface temperatures and pollen-based reconstructions. <i>Quaternary Science Reviews</i> , 2006, 25, 2082-2102.	3.0	170
33	Grass water stress estimated from phytoliths in West Africa. <i>Journal of Biogeography</i> , 2005, 32, 311-327.	3.0	163
34	Phytolith indices as proxies of grass subfamilies on East African tropical mountains. <i>Global and Planetary Change</i> , 2008, 61, 209-224.	3.5	162
35	Environmental Roots of the Late Bronze Age Crisis. <i>PLoS ONE</i> , 2013, 8, e71004.	2.5	159
36	Holocene climatic change in Morocco: a quantitative reconstruction from pollen data. <i>Climate Dynamics</i> , 1998, 14, 883-890.	3.8	158

#	ARTICLE	IF	CITATIONS
37	Was the climate of the Eemian stable? A quantitative climate reconstruction from seven European pollen records. <i>Palaeogeography, Palaeoclimatology, Palaeoecology</i> , 1998, 143, 73-85.	2.3	155
38	A method for climatic reconstruction of the Mediterranean Pliocene using pollen data. <i>Palaeogeography, Palaeoclimatology, Palaeoecology</i> , 1998, 144, 183-201.	2.3	149
39	High frequency pulses of East Asian monsoon climate in the last two glaciations: link with the North Atlantic. <i>Climate Dynamics</i> , 1996, 12, 701-709.	3.8	141
40	Last Glacial Maximum climate of the former Soviet Union and Mongolia reconstructed from pollen and plant macrofossil data. <i>Climate Dynamics</i> , 1999, 15, 227-240.	3.8	140
41	The climate and biomes of Europe at 6000yr BP. <i>Quaternary Science Reviews</i> , 1998, 17, 659-668.	3.0	138
42	Dinoflagellate cyst distribution in high-latitude marine environments and quantitative reconstruction of sea-surface salinity, temperature, and seasonality. <i>Canadian Journal of Earth Sciences</i> , 1994, 31, 48-62.	1.3	136
43	Climate and biomes in the West Mediterranean area during the Pliocene. <i>Palaeogeography, Palaeoclimatology, Palaeoecology</i> , 1999, 152, 15-36.	2.3	136
44	Mediterranean drought fluctuation during the last 5000 years based on tree-ring data. <i>Climate Dynamics</i> , 2008, 31, 227-245.	3.8	131
45	Climate response to the Samalas volcanic eruption in 1257 revealed by proxy records. <i>Nature Geoscience</i> , 2017, 10, 123-128.	12.9	130
46	The climate in Europe during the Eemian: a multi-method approach using pollen data. <i>Quaternary Science Reviews</i> , 2008, 27, 2303-2315.	3.0	126
47	Improving past sea surface temperature estimates based on planktonic fossil faunas. <i>Paleoceanography</i> , 1998, 13, 272-283.	3.0	125
48	The Last Glacial Maximum climate over Europe and western Siberia: a PMIP comparison between models and data. <i>Climate Dynamics</i> , 2001, 17, 23-43.	3.8	123
49	Pollen-based climate reconstruction techniques for late Quaternary studies. <i>Earth-Science Reviews</i> , 2020, 210, 103384.	9.1	123
50	Quantitative Reconstruction of Younger Dryas to Mid-Holocene Paleoclimates at Le Locle, Swiss Jura, Using Pollen and Lake-Level Data. <i>Quaternary Research</i> , 2001, 56, 170-180.	1.7	122
51	Abrupt resumption of the African Monsoon at the Younger Dryas–Holocene climatic transition. <i>Quaternary Science Reviews</i> , 2007, 26, 690-704.	3.0	115
52	Climatic controls on Holocene lake-level changes in Europe. <i>Climate Dynamics</i> , 1993, 8, 189-200.	3.8	112
53	Termination of the Last Glaciation in the Iberian Peninsula Inferred from the Pollen Sequence of Quintanar de la Sierra. <i>Quaternary Research</i> , 1997, 48, 205-214.	1.7	109
54	Last-millennium summer-temperature variations in western Europe based on proxy data. <i>Holocene</i> , 2005, 15, 489-500.	1.7	109

#	ARTICLE	IF	CITATIONS
55	Growing Season Temperatures in Europe and Climate Forcings Over the Past 1400 Years. PLoS ONE, 2010, 5, e9972.	2.5	109
56	Reconstructing biomes from palaeoecological data: a general method and its application to European pollen data at 0 and 6 ka. Climate Dynamics, 1996, 12, 185-194.	3.8	107
57	Chapter 1 Mediterranean climate variability over the last centuries: A review. Developments in Earth and Environmental Sciences, 2006, 4, 27-148.	0.1	105
58	Late Quaternary Climatic Change in France Estimated from Multivariate Pollen Time Series. Quaternary Research, 1987, 28, 100-118.	1.7	104
59	Inverse vegetation modeling by Monte Carlo sampling to reconstruct palaeoclimates under changed precipitation seasonality and CO2 conditions: application to glacial climate in Mediterranean region. Ecological Modelling, 2000, 127, 119-140.	2.5	104
60	Reconstruction of Precipitation in Morocco Since 1100 A.D. Based on Cedrus Atlantica Tree-Ring Widths. Quaternary Research, 1990, 33, 337-351.	1.7	102
61	The European Modern Pollen Database (EMPD) project. Vegetation History and Archaeobotany, 2013, 22, 521-530.	2.1	101
62	Continental European Eemian and early Weichselian climate evolution: comparing signals using different quantitative reconstruction approaches based on pollen. Global and Planetary Change, 2003, 36, 277-294.	3.5	99
63	Quantitative estimates of full glacial temperatures in equatorial Africa from palynological data*. Climate Dynamics, 1992, 6, 251-257.	3.8	91
64	A method to determine warm and cool steppe biomes from pollen data; application to the Mediterranean and Kazakhstan regions. , 1998, 13, 335-344.		90
65	Recent contributions to the climatology of the last glacial-interglacial cycle based on French pollen sequences. Quaternary Science Reviews, 1992, 11, 439-448.	3.0	88
66	Palaeoprecipitation reconstruction by inverse modelling using the isotopic signal of loess organic matter: application to the Nußloch loess sequence (Rhine Valley, Germany). Climate Dynamics, 2005, 25, 315-327.	3.8	87
67	Sensitivity of African biomes to changes in the precipitation regime. Global Ecology and Biogeography, 2006, 15, 258-270.	5.8	86
68	Climate in northern Eurasia 6000 years ago reconstructed from pollen data. Earth and Planetary Science Letters, 1999, 171, 635-645.	4.4	85
69	Chapter Thirteen Transfer Functions: Methods for Quantitative Paleoceanography Based on Microfossils. Developments in Marine Geology, 2007, 1, 523-563.	0.4	84
70	Mid-Holocene climate change in Europe: a data-model comparison. Climate of the Past, 2007, 3, 499-512.	3.4	83
71	Pollen-Derived Rainfall and Temperature Estimates from Lake Tanganyika and Their Implication for Late Pleistocene Water Levels. Quaternary Research, 1993, 40, 343-350.	1.7	82
72	Integrating models with data in ecology and palaeoecology: advances towards a model-data fusion approach. Ecology Letters, 2011, 14, 522-536.	6.4	80

#	ARTICLE	IF	CITATIONS
73	Climate of East Africa 6000 14C Yr B.P. as Inferred from Pollen Data. <i>Quaternary Research</i> , 2000, 54, 90-101.	1.7	79
74	How cold was Europe at the Last Glacial Maximum? A synthesis of the progress achieved since the first PMIP model-data comparison. <i>Climate of the Past</i> , 2007, 3, 331-339.	3.4	79
75	Wet phases in tropical southern Africa during the last glacial period. <i>Geophysical Research Letters</i> , 2006, 33, .	4.0	78
76	Sensitivity of African biomes to changes in the precipitation regime. <i>Global Ecology and Biogeography</i> , 2006, 15, 258-270.	5.8	73
77	Millennium-long summer temperature variations in the European Alps as reconstructed from tree rings. <i>Climate of the Past</i> , 2010, 6, 379-400.	3.4	72
78	A data-based re-appraisal of the terrestrial carbon budget at the last glacial maximum. <i>Global and Planetary Change</i> , 1993, 8, 189-201.	3.5	70
79	Dominant factors controlling glacial and interglacial variations in the treeline elevation in tropical Africa. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2007, 104, 9720-9724.	7.1	69
80	Reconstruction and paleoclimatic interpretation of Holocene lake-level changes in Lac de Saint-L�ger, Haute-Provence, southeast France. <i>Palaeogeography, Palaeoclimatology, Palaeoecology</i> , 1997, 136, 231-258.	2.3	67
81	The 4.2��ka��BP event in the Levant. <i>Climate of the Past</i> , 2018, 14, 1529-1542.	3.4	64
82	Some mechanisms of mid-Holocene climate change in Europe, inferred from comparing PMIP models to data. <i>Climate Dynamics</i> , 2004, 23, 79-98.	3.8	62
83	Is spatial autocorrelation introducing biases in the apparent accuracy of paleoclimatic reconstructions?. <i>Quaternary Science Reviews</i> , 2011, 30, 1965-1972.	3.0	60
84	The influence of decision-making in tree ring-based climate reconstructions. <i>Nature Communications</i> , 2021, 12, 3411.	12.8	59
85	Simulated responses of <i>Pinus halepensis</i> forest productivity to climatic change and CO2 increase using a statistical model. <i>Global and Planetary Change</i> , 2000, 26, 405-421.	3.5	58
86	The medieval climate anomaly in Europe: Comparison of the summer and annual mean signals in two reconstructions and in simulations with data assimilation. <i>Global and Planetary Change</i> , 2012, 84-85, 35-47.	3.5	57
87	Drought and societal collapse 3200��years ago in the Eastern Mediterranean: a review. <i>Wiley Interdisciplinary Reviews: Climate Change</i> , 2015, 6, 369-382.	8.1	56
88	Advantages and disadvantages of phytolith analysis for the reconstruction of Mediterranean vegetation: an assessment based on modern phytolith, pollen and botanical data (Luberon, France). <i>Review of Palaeobotany and Palynology</i> , 2004, 129, 213-228.	1.5	54
89	An improved methodology of the modern analogues technique for palaeoclimate reconstruction in arid and semi��rid regions. <i>Boreas</i> , 2010, 39, 145-153.	2.4	54
90	Late and Postglacial Paleoenvironments of the Gulf of St. Lawrence: Marine and Terrestrial Palynological Evidence. <i>G�ographie Physique Et Quaternaire</i> , 1993, 47, 167-180.	0.2	52

#	ARTICLE	IF	CITATIONS
91	Dendroecological analysis of climatic effects on <i>Quercus petraea</i> and <i>Pinus halepensis</i> radial growth using the process-based MAIDEN model. <i>Canadian Journal of Forest Research</i> , 2004, 34, 888-898.	1.7	52
92	Estimating changes in terrestrial vegetation and carbon storage. <i>Quaternary Science Reviews</i> , 1998, 17, 719-735.	3.0	51
93	Early urban impact on Mediterranean coastal environments. <i>Scientific Reports</i> , 2013, 3, 3540.	3.3	50
94	Data-model comparison using fuzzy logic in paleoclimatology. <i>Climate Dynamics</i> , 1999, 15, 569-581.	3.8	49
95	Quantitative reconstructions of annual rainfall in Africa 6000 years ago: Model-data comparison. <i>Journal of Geophysical Research</i> , 2006, 111, .	3.3	47
96	Definition of grassland biomes from phytoliths in West Africa. <i>Journal of Biogeography</i> , 2008, 35, 2039-2048.	3.0	47
97	A few prospective ideas on climate reconstruction: from a statistical single proxy approach towards a multi-proxy and dynamical approach. <i>Climate of the Past</i> , 2009, 5, 571-583.	3.4	47
98	Postglacial climate in the St. Lawrence lowlands, southern Québec: pollen and lake-level evidence. <i>Palaeogeography, Palaeoclimatology, Palaeoecology</i> , 2003, 193, 51-72.	2.3	46
99	ARMA techniques for modelling tree-ring response to climate and for reconstructing variations of paleoclimates. <i>Ecological Modelling</i> , 1986, 33, 149-171.	2.5	43
100	Parameterization of a process-based tree-growth model: Comparison of optimization, MCMC and Particle Filtering algorithms. <i>Environmental Modelling and Software</i> , 2008, 23, 1280-1288.	4.5	43
101	The Mediterranean vegetation: what if the atmospheric CO ₂ increased?. <i>Landscape Ecology</i> , 2001, 16, 667-675.	4.2	42
102	Reconstruction of the Grande Pile Eemian using inverse modeling of biomes and $\delta^{13}C$. <i>Quaternary Science Reviews</i> , 2006, 25, 2806-2819.	3.0	42
103	Using a biogeochemistry model in simulating forests productivity responses to climatic change and [CO ₂] increase: example of <i>Pinus halepensis</i> in Provence (south-east France). <i>Ecological Modelling</i> , 2003, 166, 239-255.	2.5	40
104	Reconstruction and palaeoclimatic interpretation of mid-Holocene vegetation and lake-level changes at Saint-Jorioz, Lake Annecy, French Pre-Alps. <i>Holocene</i> , 2003, 13, 265-275.	1.7	40
105	Calibration of the climatic signal in a new pollen sequence from La Grande Pile. <i>Climate Dynamics</i> , 1992, 6, 259-264.	3.8	39
106	A method for climate and vegetation reconstruction through the inversion of a dynamic vegetation model. <i>Climate Dynamics</i> , 2010, 35, 371-389.	3.8	39
107	Preserving long-term fluctuations in standardisation of tree-ring series by the adaptative regional growth curve (ARGC). <i>Dendrochronologia</i> , 2010, 28, 1-12.	2.2	39
108	Vegetation and climate since the last interglacial in the Vienne area (France). <i>Global and Planetary Change</i> , 1999, 20, 1-17.	3.5	38

#	ARTICLE	IF	CITATIONS
109	Risky future for Mediterranean forests unless they undergo extreme carbon fertilization. <i>Global Change Biology</i> , 2017, 23, 2915-2927.	9.5	38
110	Modelling the climatic drivers determining photosynthesis and carbon allocation in evergreen Mediterranean forests using multiproxy long time series. <i>Biogeosciences</i> , 2015, 12, 3695-3712.	3.3	37
111	Bioclimatic model of tree radial growth: application to the French Mediterranean Aleppo pine forests. <i>Trees - Structure and Function</i> , 2005, 19, 162-176.	1.9	36
112	The extrapolation of recent climatological series with spectral canonical regression. <i>Journal of Climatology</i> , 1985, 5, 325-335.	0.7	35
113	Middle Pleistocene deposits at La C��te, Val-de-Lans, Is��re department, France: plant macrofossil, palynological and fossil insect investigations. <i>Palaeogeography, Palaeoclimatology, Palaeoecology</i> , 2000, 159, 53-83.	2.3	35
114	Holocene altitudinal shifts in vegetation belts and environmental changes in the Sierra Madre Occidental, Northwestern Mexico, based on modern and fossil pollen data. <i>Review of Palaeobotany and Palynology</i> , 2008, 151, 1-20.	1.5	35
115	Methodological basis for quantitative reconstruction of air temperature and sunshine from pollen assemblages in Arctic Canada and Greenland. <i>Quaternary Science Reviews</i> , 2008, 27, 1197-1216.	3.0	34
116	Tentative palaeoclimatic reconstruction linking pollen and sedimentology in La Grande Pile (Vosges,) Tj ETQq0 0 0 rgBT /Overlock 10 Tf 5	3.0	32
117	Simulating the Holocene Lake-Level Record of Lake Bysj��n, Southern Sweden. <i>Quaternary Research</i> , 1998, 49, 62-71.	1.7	32
118	Long-term variations of monthly insolation as related to climatic changes. <i>Geologische Rundschau: Zeitschrift Fur Allgemeine Geologie</i> , 1981, 70, 748-758.	1.3	31
119	Climatic effect of atmospheric CO2 doubling on radial tree growth in south eastern France. <i>Journal of Biogeography</i> , 2003, 24, 857-864.	3.0	31
120	Solar and anthropogenic imprints on Lake Masoko (southern Tanzania) during the last 500��years. <i>Journal of Paleolimnology</i> , 2007, 37, 475-490.	1.6	31
121	Back at the last interglacial. <i>Nature</i> , 1997, 388, 25-27.	27.8	30
122	Long-term summer (AD751-2008) temperature fluctuation in the French Alps based on tree-ring data. <i>Boreas</i> , 2011, 40, 351-366.	2.4	30
123	Historical droughts in Mediterranean regions during the last 500 years: a data/model approach. <i>Climate of the Past</i> , 2007, 3, 355-366.	3.4	29
124	Changes of the potential distribution area of French Mediterranean forests under global warming. <i>Biogeosciences</i> , 2008, 5, 1493-1504.	3.3	29
125	MAIDENiso: a multiproxy biophysical model of tree-ring width and oxygen and carbon isotopes. <i>Canadian Journal of Forest Research</i> , 2012, 42, 1697-1713.	1.7	27
126	Quantitative climate reconstruction from pollen data in the Grand Duchy of Luxembourg since 15 000 yr BP. <i>Journal of Quaternary Science</i> , 1992, 7, 303-309.	2.1	26

#	ARTICLE	IF	CITATIONS
127	Bayesian multiproxy temperature reconstruction with black spruce ring widths and stable isotopes from the northern Quebec taiga. <i>Climate Dynamics</i> , 2017, 49, 4107-4119.	3.8	26
128	Spring temperature variability over Turkey since 1800â€CE reconstructed from a broad network of tree-ring data. <i>Climate of the Past</i> , 2017, 13, 1-15.	3.4	25
129	Palynological evidence for gradual vegetation and climate changes during the African Humid Period termination at 13Â°N from a Mega-Lake Chad sedimentary sequence. <i>Climate of the Past</i> , 2013, 9, 223-241.	3.4	24
130	Spatial analysis of black spruce (<i>Picea mariana</i> (Mill.) B.S.P.) radial growth response to climate in northern QuÃ©bec â€ Labrador Peninsula, Canada. <i>Canadian Journal of Forest Research</i> , 2015, 45, 343-352.	1.7	24
131	Augmentation de productivitÃ© du chÃªne pubescent en rÃ©gion mÃ©diterranÃ©enne franÃ§aise. <i>Annales Des Sciences ForestiÃ¨res</i> , 1999, 56, 211-219.	1.2	24
