| #  | Article                                                                                                                                                                                                                                  | IF  | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Exploring determinants of psoriasis patients' treatment choices: a discrete-choice experiment study in the United States and Germany. Journal of Dermatological Treatment, 2022, 33, 1511-1520.                                          | 1.1 | 4         |
| 2  | A General Public Study on Preferences and Welfare Impacts of Antimicrobial Resistance in the United Kingdom. Pharmacoeconomics, 2022, 40, 65-76.                                                                                         | 1.7 | 8         |
| 3  | Exploring patient preference heterogeneity for pharmacological treatments for chronic pain: A latent class analysis. European Journal of Pain, 2022, 26, 648-667.                                                                        | 1.4 | 7         |
| 4  | Implementation of personalised medicine policies in mental healthcare: results from a stated preference study in the UK. BJPsych Open, 2022, 8, e40.                                                                                     | 0.3 | 2         |
| 5  | Relative importance of clinical outcomes and safety risks of antiseizure medication monotherapy for patients and physicians: Discrete choice experiment eliciting preferences in realâ€world study "VOTE". Epilepsia, 2022, 63, 451-462. | 2.6 | 7         |
| 6  | Accounting for Preference Heterogeneity in Discrete-Choice Experiments: An ISPOR Special Interest<br>Group Report. Value in Health, 2022, 25, 685-694.                                                                                   | 0.1 | 23        |
| 7  | Matching and weighting in stated preferences for health care. Journal of Choice Modelling, 2022, 44, 100367.                                                                                                                             | 1.2 | 1         |
| 8  | Impact of clinical and demographic characteristics on patient preferences for psoriasis treatment features: Results from a discrete-choice experiment in a multicountry study. Journal of Dermatological Treatment, 2021, , 1-8.         | 1.1 | 3         |
| 9  | Long-Acting Injection and Implant Preferences and Trade-Offs for HIV Prevention Among South African<br>Male Youth. Journal of Acquired Immune Deficiency Syndromes (1999), 2021, 87, 928-936.                                            | 0.9 | 9         |
| 10 | Discrete choice experiment (DCE) to quantify the influence of trial features on the decision to participate in cystic fibrosis (CF) clinical trials. BMJ Open, 2021, 11, e045803.                                                        | 0.8 | 3         |
| 11 | The Impact of the Risk Functional Form Assumptions on Maximum Acceptable Risk Measures. Patient, 2021, 14, 827-836.                                                                                                                      | 1.1 | 6         |
| 12 | CAR T-cell therapy in relapsed/refractory diffuse large B-cell lymphoma: physician preferences trading off benefits, risksAand time to infusion. Future Oncology, 2021, 17, 4697-4709.                                                   | 1.1 | 2         |
| 13 | Mobilising the Next Generation of Stated-Preference Studies: the Association of Access Device with<br>Choice Behaviour and Data Quality. Patient, 2021, 14, 55-63.                                                                       | 1.1 | 7         |
| 14 | Efficacy is Not Everything: Eliciting Women's Preferences for a Vaginal HIV Prevention Product Using<br>a Discrete-Choice Experiment. AIDS and Behavior, 2020, 24, 1443-1451.                                                            | 1.4 | 22        |
| 15 | Public preferences for multiple dimensions of bird biodiversity at the coast: insights for the cultural ecosystem services framework. Estuarine, Coastal and Shelf Science, 2020, 235, 106571.                                           | 0.9 | 9         |
| 16 | Patient preferences for osteoarthritis pain and chronic low back pain treatments in the United States:<br>a discrete-choice experiment. Osteoarthritis and Cartilage, 2020, 28, 1202-1213.                                               | 0.6 | 31        |
| 17 | Patient Preferences in Surveillance: Findings From a Discrete Choice Experiment in the "My Follow-Up―<br>Study. Value in Health, 2020, 23, 1373-1383.                                                                                    | 0.1 | 1         |
| 18 | Preferences for longâ€acting Preâ€Exposure Prophylaxis (PrEP) for HIV prevention among South African<br>youth: results of a discrete choice experiment. Journal of the International AIDS Society, 2020, 23,<br>e25528.                  | 1.2 | 49        |

MARCO BOERI

| #  | Article                                                                                                                                                                                                                  | IF  | CITATIONS |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Modeling Heterogeneity in Patients' Preferences for Psoriasis Treatments in a Multicountry Study: A<br>Comparison Between Random-Parameters Logit and Latent Class Approaches. Pharmacoeconomics,<br>2020, 38, 593-606.  | 1.7 | 17        |
| 20 | Patient Preferences for Biologic and Biosimilar Osteoporosis Treatments in Colombia. Patient<br>Preference and Adherence, 2020, Volume 14, 1049-1064.                                                                    | 0.8 | 1         |
| 21 | Assessing the impact of excluded attributes on choice in a discrete choice experiment using a followâ€up question. Health Economics (United Kingdom), 2020, 29, 1307-1315.                                               | 0.8 | 3         |
| 22 | <p>Patient and physician preferences for ulcerative colitis treatments in the United States</p> . Clinical and Experimental Gastroenterology, 2019, Volume 12, 263-278.                                                  | 1.0 | 27        |
| 23 | From drug-delivery device to disease management tool: a study of preferences for enhanced features in next-generation self-injection devices. Patient Preference and Adherence, 2019, Volume 13, 1093-1110.              | 0.8 | 8         |
| 24 | Young Women's Stated Preferences for Biomedical HIV Prevention: Results of a Discrete Choice<br>Experiment in Kenya and South Africa. Journal of Acquired Immune Deficiency Syndromes (1999), 2019,<br>80, 394-403.      | 0.9 | 69        |
| 25 | Physician-Specific Maximum Acceptable Risk in Personalized Medicine: Implications for Medical Decision Making, 2018, 38, 593-600.                                                                                        | 1.2 | 4         |
| 26 | Comparing the Relative Importance of Attributes of Metastatic Renal Cell Carcinoma Treatments to<br>Patients and Physicians in the United States: A Discrete-Choice Experiment. Pharmacoeconomics, 2018,<br>36, 973-986. | 1.7 | 15        |
| 27 | Behavioural patterns in Mediterranean-style drinking: Generation Y preferences in alcoholic beverage consumption. Journal of Behavioral and Experimental Economics, 2018, 75, 117-125.                                   | 0.5 | 22        |
| 28 | The Influence of Genotype Information on Psychiatrists' Treatment Recommendations: More Experienced Clinicians Know Better What to Ignore. Value in Health, 2017, 20, 126-131.                                           | 0.1 | 6         |
| 29 | The importance of regret minimization in the choice for renewable energy programmes: Evidence from a discrete choice experiment. Energy Economics, 2017, 63, 253-260.                                                    | 5.6 | 37        |
| 30 | Patients' priorities in selecting chronic lymphocytic leukemia treatments. Blood Advances, 2017, 1,<br>2176-2185.                                                                                                        | 2.5 | 26        |
| 31 | The STARTEC Decision Support Tool for Better Tradeoffs between Food Safety, Quality, Nutrition, and<br>Costs in Production of Advanced Ready-to-Eat Foods. BioMed Research International, 2017, 2017, 1-13.              | 0.9 | 18        |
| 32 | How Do Psychiatrists Apply the Minimum Clinically Important Difference to Assess Patient Responses to Treatment?. MDM Policy and Practice, 2016, 1, 238146831667885.                                                     | 0.5 | 2         |
| 33 | Stated preference methods and landscape ecology indicators: An example of transdisciplinarity in landscape economic valuation. Ecological Economics, 2016, 127, 11-22.                                                   | 2.9 | 22        |
| 34 | Food fraud and consumers' choices in the wake of the horsemeat scandal. British Food Journal, 2016,<br>118, 1898-1913.                                                                                                   | 1.6 | 42        |
| 35 | Learning, fatigue and preference formation in discrete choice experiments. Journal of Economic<br>Behavior and Organization, 2015, 119, 345-363.                                                                         | 1.0 | 42        |
| 36 | Addressing inequalities in physical activity participation: Implications for public health policy and practice. Preventive Medicine, 2015, 72, 64-69.                                                                    | 1.6 | 27        |

Marco Boeri

| #  | Article                                                                                                                                                                                                       | IF  | CITATIONS |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 37 | Regret minimisation and utility maximisation in a freight transport context. Transportmetrica A:<br>Transport Science, 2014, 10, 548-560.                                                                     | 1.3 | 25        |
| 38 | Looking for free riding: energy efficiency incentives and Italian homeowners. Energy Efficiency, 2014, 7,<br>571-590.                                                                                         | 1.3 | 33        |
| 39 | Stated choices and benefit estimates in the context of traffic calming schemes: Utility maximization, regret minimization, or both?. Transportation Research, Part A: Policy and Practice, 2014, 61, 121-135. | 2.0 | 33        |
| 40 | The value of water quality improvements in the region Berlin–Brandenburg as a function of distance and state residency. Water Resources and Economics, 2014, 5, 49-66.                                        | 0.9 | 32        |
| 41 | Trading off dietary choices, physical exercise and cardiovascular disease risks. Social Science and Medicine, 2013, 93, 130-138.                                                                              | 1.8 | 13        |
| 42 | The role of regret minimisation in lifestyle choices affecting the risk of coronary heart disease.<br>Journal of Health Economics, 2013, 32, 253-260.                                                         | 1.3 | 36        |
| 43 | Tools for Modelling and Assessing Peri-Urban Land Use Futures. , 2013, , 69-88.                                                                                                                               |     | 1         |
| 44 | Site choices in recreational demand: a matter of utility maximization or regret minimization?. Journal of Environmental Economics and Policy, 2012, 1, 32-47.                                                 | 1.5 | 27        |
| 45 | Random Regret Minimization: Exploration of a New Choice Model for Environmental and Resource Economics. Environmental and Resource Economics, 2012, 51, 413-429.                                              | 1.5 | 59        |
| 46 | Considerations Around Coding the Membership Probability Function in a Latent Class Analysis:<br>Renewed Insights. Pharmacoeconomics, 0, , .                                                                   | 1.7 | 0         |
