Version: 2024-02-01

50 papers

1,544 citations

236925 25 h-index 302126 39 g-index

50 all docs 50 docs citations

50 times ranked

 $\begin{array}{c} 2007 \\ \text{citing authors} \end{array}$ 

#	Article	IF	Citations
1	Relationship between aortic root size and glomerular filtration rate in hypertensive patients. Journal of Hypertension, 2016, 34, 495-505.	0.5	11
2	Subclinical Kidney Damage in Hypertensive Patients: A Renal Window Opened on the Cardiovascular System. Focus on Microalbuminuria. Advances in Experimental Medicine and Biology, 2016, 956, 279-306.	1.6	43
3	Relationship Between Shortâ€Term Blood Pressure Variability and Subclinical Renal Damage in Essential Hypertensive Patients. Journal of Clinical Hypertension, 2015, 17, 473-480.	2.0	30
4	Metabolic syndrome in hypertensive patients: An unholy alliance. World Journal of Cardiology, 2014, 6, 890.	1.5	52
5	Relationships between maximal oxygen uptake and endothelial function in healthy male adults: a preliminary study. Acta Diabetologica, 2013, 50, 135-141.	2.5	31
6	Prevalence and predictors of left ventricular hypertrophy in patients with hypertension and normal electrocardiogram. European Journal of Preventive Cardiology, 2013, 20, 854-861.	1.8	12
7	Subclinical atherosclerosis and fetuin-A plasma levels in essential hypertensive patients. Hypertension Research, 2013, 36, 129-133.	2.7	19
8	Longâ€Term Effects of a Multidisciplinary Treatment of Uncomplicated Obesity on Carotid Intimaâ€Media Thickness. Obesity, 2011, 19, 1187-1192.	3.0	20
9	Epidemiology and pathophysiology of left ventricular abnormalities in chronic kidney disease: a review. Journal of Nephrology, 2011, 24, 1-10.	2.0	86
10	Left ventricular mass in hypertensive patients with mildâ€toâ€moderate reduction of renal function. Nephrology, 2010, 15, 203-210.	1.6	39
11	Electrocardiography Plus Limited Echocardiography in Young, Newly Identified, Hypertensives: Some Considerations. American Journal of Hypertension, 2010, 23, 1050-1050.	2.0	2
12	Unfavourable interaction of microalbuminuria and mildly reduced creatinine clearance on aortic stiffness in essential hypertension. International Journal of Cardiology, 2010, 145, 372-375.	1.7	17
13	The Relationship between an Oxidative Stress Biomarker and Plasma Haemoglobin in Patients with Chronic Kidney Disease. High Blood Pressure and Cardiovascular Prevention, 2010, 17, 227-233.	2.2	1
14	The progressive pathway of microalbuminuria: from early marker of renal damage to strong cardiovascular risk predictor. Journal of Hypertension, 2010, 28, 2357-2369.	0.5	73
15	Relationship of fetuin-A with glomerular filtration rate and endothelial dysfunction in moderate-severe chronic kidney disease. Journal of Nephrology, 2010, 23, 62-9.	2.0	13
16	The Association of Microalbuminuria With Aortic Stiffness Is Independent of C-Reactive Protein in Essential Hypertension. American Journal of Hypertension, 2009, 22, 1041-1047.	2.0	30
17	Left ventricular hypertrophy and geometry in hypertensive patients with chronic kidney disease. Journal of Hypertension, 2009, 27, 633-641.	0.5	87
18	Intra-renal hemodynamics and carotid intima-media thickness in the metabolic syndrome. Diabetes Research and Clinical Practice, 2009, 86, 177-185.	2.8	42

#	Article	IF	CITATIONS
19	Impact of metabolic syndrome on left ventricular mass: Is the same in all ethnic groups and in men and women? Reply. International Journal of Cardiology, 2009, 131, 396-397.	1.7	0
20	Relationship of transforming growth factor-beta1with tumour necrosis factor-alpha and endothelial activation in patients with stable renal transplantation. Nephrology, 2008, 13, 164-170.	1.6	2
21	Parathyroid hormone is inversely related to endothelinâ€1 in patients on haemodialysis. Nephrology, 2008, 13, 467-471.	1.6	3
22	Inverse Relationship Between Ambulatory Arterial Stiffness Index and Glomerular Filtration Rate in Arterial Hypertension. American Journal of Hypertension, 2008, 21, 35-40.	2.0	42
23	The Metabolic Syndrome as a Prohypertensive State. American Journal of Hypertension, 2008, 21, 8-8.	2.0	5
24	Plasma Aldosterone and Its Relationships With Left Ventricular Mass in Essential Hypertensive Patients With the Metabolic Syndrome. American Journal of Hypertension, 2008, 21, 1055-1061.	2.0	29
25	Endothelin-1 and F2-isoprostane relate to and predict renal dysfunction in hypertensive patients. Nephrology Dialysis Transplantation, 2008, 24, 497-503.	0.7	56
26	Hypertension, microalbuminuria and renal dysfunction: the Renal Dysfunction in Hypertension (REDHY) study. Journal of Nephrology, 2008, 21, 368-73.	2.0	17
27	C-reactive protein and intercellular adhesion molecule-1 are stronger predictors of oxidant stress than blood pressure in established hypertension. Journal of Hypertension, 2007, 25, 423-428.	0.5	29
28	Relationship of Metabolic Syndrome With Pulse Pressure in Patients With Essential Hypertension. American Journal of Hypertension, 2007, 20, 197-203.	2.0	32
29	Impact of metabolic syndrome on left ventricular mass in overweight and obese hypertensive subjects. International Journal of Cardiology, 2007, 121, 267-275.	1.7	14
30	Interleukin 6 plasma levels predict with high sensitivity and specificity coronary stenosis detected by coronary angiography. Thrombosis and Haemostasis, 2007, 98, 1362-1367.	3.4	15
31	Inflammation and endothelial activation are linked to renal function in long-term kidney transplantation. Transplant International, 2007, 20, 82-87.	1.6	32
32	Impact of the Metabolic Syndrome on Total Arterial Compliance in Essential Hypertension Patients. Journal of the Cardiometabolic Syndrome, 2007, 2, 84-90.	1.7	12
33	Influence of chronic renal insufficiency on left ventricular diastolic function in hypertensives without left ventricular hypertrophy. Journal of Nephrology, 2007, 20, 320-8.	2.0	20
34	Relation of C-Reactive Protein to Oxidative Stress and to Endothelial Activation in Essential Hypertension. American Journal of Hypertension, 2006, 19, 313-318.	2.0	77
35	The Metabolic Syndrome and Its Relationship to Hypertensive Target Organ Damage. Journal of Clinical Hypertension, 2006, 8, 195-201.	2.0	29
36	Influence of the metabolic syndrome on aortic stiffness in never treated hypertensive patients. Nutrition, Metabolism and Cardiovascular Diseases, 2006, 16, 54-59.	2.6	49

#	Article	IF	CITATIONS
37	Renal plasma flow, filtration fraction and microalbuminuria in hypertensive patients: Effects of chronic smoking. Nephrology, 2005, 10, 483-486.	1.6	11
38	Usefulness of Microalbuminuria in Cardiovascular Risk Stratification of Essential Hypertensive Patients. Nephron Clinical Practice, 2004, 96, c123-c130.	2.3	12
39	Amplified biochemical activation of endothelial function in hypertension associated with moderate to severe renal failure. Journal of Nephrology, 2002, 15, 643-8.	2.0	21
40	Relationships between 24 h blood pressure load and target organ damage in patients with mild-to-moderate essential hypertension. Blood Pressure Monitoring, 2001, 6, 115-123.	0.8	46
41	Endothelium-derived factors in microalbuminuric and nonmicroalbuminuric essential hypertensives. American Journal of Hypertension, 2000, 13, 172-176.	2.0	20
42	Changes of Plasma Endothelin and Growth Factor Levels, and of Left Ventricular Mass, After Chronic AT1-Receptor Blockade in Human Hypertension. American Journal of Hypertension, 1998, 11, 548-553.	2.0	38
43	Insulin, Sodium-Lithium Countertransport, and Microalbuminuria in Hypertensive Patients. Hypertension, 1998, 31, 110-113.	2.7	20
44	Sympathetic Activity and Blood Pressure Pattern in Autosomal Dominant Polycystic Kidney Disease Hypertensives. American Journal of Nephrology, 1998, 18, 391-398.	3.1	54
45	Influence of the Calcium Antagonist Amlodipine on Left Ventricular Mass and Function in Patients with Essential Hypertension. Clinical Drug Investigation, 1997, 13, 17-21.	2.2	1
46	Microalbuminuria, renal dysfunction and cardiovascular complication in essential hypertension. Journal of Hypertension, 1996, 14, 915-920.	0.5	106
47	Sympathetic Overactivity and 24-Hour Blood Pressure Pattern in Hypertensives with Chronic Renal Failure, 1995, 17, 751-758.	2.1	24
48	Insulin-like growth factor 1 and sodium???lithium countertransport in essential hypertension and in hypertensive left ventricular hypertrophy. Journal of Hypertension, 1993, 11, 1097-1101.	0.5	47
49	Microalbuminuria Fractional Clearance and Early Renal Permselectivity Changes in Essential Hypertension. American Journal of Nephrology, 1992, 12, 326-329.	3.1	15
50	Micro-albuminuria as a predictor of cardiovascular damage in essential hypertension. Journal of Hypertension, 1989, 7, S332-333.	0.5	58
