#	Article	IF	Citations
1	Comparing four regression techniques to explore factors governing the number of forest fires in Southeast, China. Geomatics, Natural Hazards and Risk, 2021, 12, 499-521.	4.3	2
2	Exploring spatially varying relationships between forest fire and environmental factors at different quantile levels. International Journal of Wildland Fire, 2020, 29, 486.	2.4	5
3	A Bayesian Approach to Estimating Seemingly Unrelated Regression for Tree Biomass Model Systems. Forests, 2020, 11, 1302.	2.1	6
4	Aggregated Biomass Model Systems and Carbon Concentration Variations for Tree Carbon Quantification of Natural Mongolian Oak in Northeast China. Forests, 2020, 11, 397.	2.1	12
5	Variation in Carbon Concentration and Allometric Equations for Estimating Tree Carbon Contents of 10 Broadleaf Species in Natural Forests in Northeast China. Forests, 2019, 10, 928.	2.1	8
6	Global and Geographically and Temporally Weighted Regression Models for Modeling PM2.5 in Heilongjiang, China from 2015 to 2018. International Journal of Environmental Research and Public Health, 2019, 16, 5107.	2.6	32
7	Global and Geographically Weighted Quantile Regression for Modeling the Incident Rate of Childrenâ€™s Lead Poisoning in Syracuse, NY, USA. International Journal of Environmental Research and Public Health, 2018, 15, 2300.	2.6	4
8	Spatial Hurdle Models for Predicting the Number of Children with Lead Poisoning. International Journal of Environmental Research and Public Health, 2018, 15, 1792.	2.6	9
9	Additive Biomass Equations Based on Different Dendrometric Variables for Two Dominant Species (Larix gmelini Rupr. and Betula platyphylla Suk.) in Natural Forests in the Eastern Daxingâ€™an Mountains, Northeast China. Forests, 2018, 9, 261.	2.1	34
10	Exploring spatially varying relationships between children's lead poisoning and environmental factors. Annals of the New York Academy of Sciences, 2017, 1404, 49-60.	3.8	4
11	Interrupted time series analysis of childrenâ€™s blood lead levels: A case study of lead hazard control program in Syracuse, New York. PLoS ONE, 2017, 12, e0171778.	2.5	4
12	Developing Two Additive Biomass Equations for Three Coniferous Plantation Species in Northeast China. Forests, 2016, 7, 136.	2.1	40
13	Modeling Anthropogenic Fire Occurrence in the Boreal Forest of China Using Logistic Regression and Random Forests. Forests, 2016, 7, 250.	2.1	51
14	Trends in Automatic Individual Tree Crown Detection and Delineationâ€”Evolution of LiDAR Data. Remote Sensing, 2016, 8, 333.	4.0	237
15	Allometry and partitioning of individual tree biomass and carbon ofAbies nephrolepisMaxim in northeast China. Scandinavian Journal of Forest Research, 2016, 31, 399-411.	1.4	12
16	A Three-Step Proportional Weighting System of Nonlinear Biomass Equations. Forest Science, 2015, 61, 35-45.	1.0	42
17	Evaluation of Four Methods for Predicting Carbon Stocks of Korean Pine Plantations in Heilongjiang Province, China. PLoS ONE, 2015, 10, e0145017.	2.5	7
18	Modeling Bird Species Richness at Multiple Spatial Scales Using Two-Dimensional Wavelet Analysis. Forest Science, 2015, 61, 1-16.	1.0	9

#	Article	IF	Citations
19	Agent-based region growing for individual tree crown delineation from airborne laser scanning (ALS) data. International Journal of Remote Sensing, 2015, 36, 1965-1993.	2.9	50
20	Developing additive systems of biomass equations for nine hardwood species in Northeast China. Trees - Structure and Function, 2015, 29, 1149-1163.	1.9	69
21	Impact of Tree-Oriented Growth Order in Marker-Controlled Region Growing for Individual Tree Crown Delineation Using Airborne Laser Scanner (ALS) Data. Remote Sensing, 2014, 6, 555-579.	4.0	44
22	Modeling diameter distributions of mixed-species forest stands. Scandinavian Journal of Forest Research, 2014, 29, 653-663.	1.4	21
23	Spatial modeling of the carbon stock of forest trees in Heilongjiang Province, China. Journal of Forestry Research, 2014, 25, 269-280.	3.6	12
24	Impact of training and validation sample selection on classification accuracy and accuracy assessment when using reference polygons in object-based classification. International Journal of Remote Sensing, 2013, 34, 6914-6930.	2.9	71
25	Geographically local modeling of occurrence, count, and volume of downwood inÂNortheast China. Applied Geography, 2013, 37, 114-126.	3.7	22
26	Comparison of spatial and non-spatial logistic regression models for modeling the occurrence of cloud cover in north-eastern Puerto Rico. Applied Geography, 2013, 37, 52-62.	3.7	47
27	Spatial Poisson Models for Examining the Influence of Climate and Land Cover Pattern on Bird Species Richness. Forest Science, 2012, 58, 61-74.	1.0	16
28	Geographically Local Linear Mixed Models for Tree Height-Diameter Relationship. Forest Science, 2012, 58, 75-84.	1.0	12
29	Indicators for separating undesirable and well-delineated tree crowns in high spatial resolution images. International Journal of Remote Sensing, 2012, 33, 5451-5472.	2.9	12
30	Use of localized descriptive statistics for exploring the spatial pattern changes of bird species richness at multiple scales. Applied Geography, 2012, 32, 185-194.	3.7	20
31	Modeling and Prediction of Tree Heightâ€“Diameter Relationships Using Spatial Autoregressive Models. Forest Science, 2011, 57, 252-264.	1.0	10
32	Using error-in-variable regression to predict tree diameter and crown width from remotely sensed imagery. Canadian Journal of Forest Research, 2010, 40, 1095-1108.	1.7	23
33	An Analysis of Ideological Effects in Published Versus Unpublished Judicial Opinions. Journal of Empirical Legal Studies, 2009, 6, 213-239.	0.8	34
34	Comparison of bandwidth selection in application of geographically weighted regression: a case study. Canadian Journal of Forest Research, 2008, 38, 2526-2534.	1.7	113
35	Motivations for Male and Female Birdwatchersin New York State. Human Dimensions of Wildlife, 2008, 13, 187-200.	1.8	20
36	An analysis and comparison of estimation methods for self-referencing equations. Canadian Journal of Forest Research, 2007, 37, 1472-1484.	1.7	4

#	Article	IF	Citations
37	A new sub-sampling method for analysis of air samples collected with the Andersen single-stage sampler. Aerobiologia, 2006, 22, 177-184.	1.7	8
38	Fitting irregular diameter distributions of forest stands by Weibull, modified Weibull, and mixture Weibull models. Journal of Forest Research, 2006, 11, 369-372.	1.4	43
39	A new spatial-attribute weighting function for geographically weighted regression. Canadian Journal of Forest Research, 2006, 36, 996-1005.	1.7	22
40	Spatial residual analysis of six modeling techniques. Ecological Modelling, 2005, 186, 154-177.	2.5	114
41	A comparison of alternative methods for estimating the self-thinning boundary line. Canadian Journal of Forest Research, 2005, 35, 1507-1514.	1.7	127
42	A mixture model-based approach to the classification of ecological habitats using Forest Inventory and Analysis data. Canadian Journal of Forest Research, 2004, 34, 1150-1156.	1.7	12
43	Evaluation of three methods for predicting diameter distributions of black spruce (Picea mariana) plantations in central Canada. Canadian Journal of Forest Research, 2004, 34, 2424-2432.	1.7	42
44	Modeling spatial variation in tree diameterâ€“height relationships. Forest Ecology and Management, 2004, 189, 317-329.	3.2	69
45	A comparison of estimation methods for fitting Weibull and Johnson's SB distributions to mixed spruceÂ–fir stands in northeastern North America. Canadian Journal of Forest Research, 2003, 33, 1340-1347.	1.7	74
46	Mortality Patterns Following Spruce Budworm Infestation in Unprotected Spruce-Fir Forests in Maine. Northern Journal of Applied Forestry, 2003, 20, 148-153.	0.5	21
47	Maximum sizeâ€“density relationships for mixed softwoods in the northeastern USA. Forest Ecology and Management, 2002, 155, 163-170.	3.2	40
48	Development and evaluation of ecoregion-based jack pine height-diameter models for Ontario. Forestry Chronicle, 2002, 78, 530-538.	0.6	37
49	Reserve Strip Method as an Alternative for Regenerating Eastern Hemlock. Northern Journal of Applied Forestry, 2001, 18, 69-73.	0.5	1
50	Developing and Validating Nonlinear Heightâ€“Diameter Models for Major Tree Species of Ontario's Boreal Forests. Northern Journal of Applied Forestry, 2001, 18, 87-94.	0.5	99
51	A finite mixture of two Weibull distributions for modeling the diameter distributions of rotated-sigmoid, uneven-aged stands. Canadian Journal of Forest Research, 2001, 31, 1654-1659.	1.7	73
52	Growth of Saplings after Selection Cutting in Northern Hardwoods. Northern Journal of Applied Forestry, 2000, 17, 149-152.	0.5	13
53	Height-Diameter Equations for Ten Tree Species in the Inland Northwest. Western Journal of Applied Forestry, 1996, 11, 132-137.	0.5	33
54	Differences in Species Composition and Stand Characteristics of Mixed Upland Hardwood Forests of North Alabama as Reflected by the Presence of Eastern Redcedar (Juniperus virginiana L.). Journal of Sustainable Forestry, 1996, 3, 75-100.	1.4	2
