

Ying Ge

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/11281509/ying-ge-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

17
papers

305
citations

#	Paper	IF	Citations
17	A Mutation in -Adducin Impairs Autoregulation of Renal Blood Flow and Promotes the Development of Kidney Disease. <i>Journal of the American Society of Nephrology: JASN</i> , 2020 , 31, 687-700	12.7	11
16	Knockout of Dual-Specificity Protein Phosphatase 5 Protects Against Hypertension-Induced Renal Injury. <i>Journal of Pharmacology and Experimental Therapeutics</i> , 2019 , 370, 206-217	4.7	10
15	Chronic infusion of interleukin-17 promotes hypertension, activation of cytolytic natural killer cells, and vascular dysfunction in pregnant rats. <i>Physiological Reports</i> , 2019 , 7, e14038	2.6	11
14	Knockdown of Add3 impairs the myogenic response of renal afferent arterioles and middle cerebral arteries. <i>American Journal of Physiology - Renal Physiology</i> , 2017 , 312, F971-F981	4.3	27
13	Impaired myogenic response of the afferent arteriole contributes to the increased susceptibility to renal disease in Milan normotensive rats. <i>Physiological Reports</i> , 2017 , 5, e13089	2.6	11
12	Macula Densa Nitric Oxide Synthase 1 Protects against Salt-Sensitive Hypertension. <i>Journal of the American Society of Nephrology: JASN</i> , 2016 , 27, 2346-56	12.7	43
11	Molecular mechanisms and cell signaling of 20-hydroxyeicosatetraenoic acid in vascular pathophysiology. <i>Frontiers in Bioscience - Landmark</i> , 2016 , 21, 1427-63	2.8	54
10	Identification and function of adenosine A3 receptor in afferent arterioles. <i>American Journal of Physiology - Renal Physiology</i> , 2015 , 308, F1020-5	4.3	13
9	Impaired myogenic responses of the Af-Art contributes to chronic kidney disease in Milan Normotensive rats. <i>FASEB Journal</i> , 2015 , 29, 811.17	0.9	
8	Role of 20-HETE in the impaired myogenic and TGF responses of the Af-Art of Dahl salt-sensitive rats. <i>American Journal of Physiology - Renal Physiology</i> , 2014 , 307, F509-15	4.3	25
7	Endogenously produced 20-HETE modulates myogenic and TGF response in microperfused afferent arterioles. <i>Prostaglandins and Other Lipid Mediators</i> , 2013 , 102-103, 42-8	3.7	26
6	Genetic basis of the impaired renal myogenic response in FHH rats. <i>American Journal of Physiology - Renal Physiology</i> , 2013 , 304, F565-77	4.3	24
5	Macula Densa NOS1 Protects Against Acute Kidney Injury (AKI) Mediated by Primary Cilia. <i>FASEB Journal</i> , 2013 , 27, 910.8	0.9	
4	The vasodilatory effect of testosterone on renal afferent arterioles. <i>Gender Medicine</i> , 2012 , 9, 103-11		25
3	Impaired myogenic constriction of the renal afferent arteriole in a mouse model of reduced ENaC expression. <i>American Journal of Physiology - Renal Physiology</i> , 2012 , 302, F1486-93	4.3	25
2	Activation of Na ⁺ /H ⁺ exchanger (NHE) in the macula densa (MD) enhances tubuloglomerular feedback (TGF) in spontaneously hypertensive rats (SHR). <i>FASEB Journal</i> , 2012 , 26, 875.12	0.9	
1	An oxidant-sensitive TRPM2 channel expressed in the afferent arteriole regulates Ang II-induced vessel constriction. <i>FASEB Journal</i> , 2011 , 25, 1079.16	0.9
