Muzaffer Ã§olakoglu

List of Publications by Year
in descending order

17 papers	165 citations	1163117 8 h-index	1125743 13 g-index
17 all docs	17 docs citations	17 times ranked	170 citing authors

#	Article	IF	Citations
1	Analysing visual pattern of skin temperature during submaximal and maximal exercises. Infrared Physics and Technology, 2016, 74, 57-62.	2.9	26
2	Relationship between ace genotype and short duration aerobic performance development. European Journal of Applied Physiology, 2006, 98, 461-465.	2.5	23
3	Non-Elite Cohort. Applied Physiology, Nutrition, and Metabolism, 2005, 30, 74-86.	1.7	20
4	ACE Genotype May Have an Effect on Single versus Multiple Set Preferences in Strength Training. European Journal of Applied Physiology, 2005, 95, 20-26.	2.5	19
5	Effects of a Dynamic Warm-Up, Static Stretching or Static Stretching with Tendon Vibration on Vertical Jump Performance and EMG Responses. Journal of Human Kinetics, 2013, 39, 49-57.	1.5	18
6	An Elliptical Trainer May Render the Wingate All-out Test More Anaerobic. Journal of Strength and Conditioning Research, 2014, 28, 643-650.	2.1	12
7	Stroke volume responses may be related to the gap between peak and maximal O2 consumption. Isokinetics and Exercise Science, 2016, 24, 133-139.	0.4	9
8	Associations between Thermal and Physiological Responses of Human Body during Exercise. Sports, 2017, 5, 97.	1.7	9
9	Shorter intervals at peak SV vs.‹i›VÌ‡O‹/i›‹sub›2max‹/sub› may yield high SV with less physiological stress. European Journal of Sport Science, 2015, 15, 623-630.	2.7	8
10	Mechanically Braked Elliptical Wingate Test. Journal of Strength and Conditioning Research, 2012, 26, 1313-1323.	2.1	7
11	Wingate anaerobic testing with a modified electromagnetically braked elliptical trainer. Part I: Methodological considerations. Isokinetics and Exercise Science, 2009, 17, 107-113.	0.4	5
12	Wingate anaerobic testing with a modified electromagnetically braked elliptical trainer. Part II: Physiological considerations. Isokinetics and Exercise Science, 2009, 17, 115-119.	0.4	4
13	Development potentials of commonly used high-intensity training strategies on central and peripheral components of maximal oxygen consumption. Respiratory Physiology and Neurobiology, 2022, 302, 103910.	1.6	2
14	Effects of ribose supplementation on anaerobic performance, plasma pH, lactate, ammonia and inorganic phosphate levels. Isokinetics and Exercise Science, 2012, 20, 47-50.	0.4	1
15	Re-Evaluation of Old Findings on Stroke Volume Responses to Exercise and Recovery by Nitrous-Oxide Rebreathin. Journal of Human Kinetics, 2016, 53, 73-79.	1.5	1
16	Moderate Intensity Intermittent Exercise Modality May Prevent Cardiovascular Drift. Sports, 2018, 6, 98.	1.7	1
17	The importance of the verification phase following an incremental exercise to ensure maximum oxygen consumption. Journal of Sports Medicine and Physical Fitness, 2020, 60, 1342-1348.	0.7	0
