citing authors

1	Oophorectomy improves pituitary activin inhibitory function preventing lactotroph hyperplasia development. Endocrine-Related Cancer, 2022, 29, 359-373.	3.1	2
2	Activin-inhibitory action on lactotrophs is decreased in lactotroph hyperplasia. Journal of Endocrinology, 2020, 244, 415-429.	2.6	4
3	TGF β 1 regulates prolactin secretion during postnatal development: gender differences. Journal of Endocrinology, 2020, 246, 29-39.	2.6	2
4	New insights into progesterone actions on prolactin secretion and prolactinoma development. Steroids, 2019, 152, 108496.	1.8	11
5	mPRs represent a novel target for PRL inhibition in experimental prolactinomas. Endocrine-Related Cancer, 2019, 26, 497-510.	3.1	11
6	Role of GPER in the anterior pituitary gland focusing on lactotroph function. Journal of Endocrinology, 2019, 240, 99-110.	2.6	16
7	Sex differences in the pituitary TGF β 1 system: The role of TGF β 1 in prolactinoma development. Frontiers in Neuroendocrinology, 2018, 50, 118-122.	5.2	8
8	Participation of membrane progesterone receptor \pm in the inhibitory effect of progesterone on prolactin secretion. Journal of Neuroendocrinology, 2018, 30, e12614.	2.6	19
9	Sex differences in the development of prolactinoma in mice overexpressing hCG β : role of TGF β 1. Journal of Endocrinology, 2017, 232, 535-546.	2.6	19
10	The pituitary TGF β 1 system as a novel target for the treatment of resistant prolactinomas. Journal of Endocrinology, 2016, 228, R73-R83.	2.6	50
11	Sex Differences in the Pituitary Transforming Growth Factor- β 1 System: Studies in a Model of Resistant Prolactinomas. Endocrinology, 2013, 154, 4192-4205.	2.8	20
12	Thrombospondin-1 (TSP-1) Analogs ABT-510 and ABT-898 Inhibit Prolactinoma Growth and Recover Active Pituitary Transforming Growth Factor- β 1 (TGF- β 1). Endocrinology, 2012, 153, 3861-3871.	2.8	25
13	Active and Total Transforming Growth Factor- β 1 Are Differentially Regulated by Dopamine and Estradiol in the Pituitary. Endocrinology, 2011, 152, 2722-2730.	2.8	31
14	Neurotransmitter Modulation of the GHRH-GH Axis. Frontiers of Hormone Research, 2010, 38, 59-69.	1.0	15
15	New Insights into the Endocrine and Metabolic Roles of Dopamine D2 Receptors Gained from the Δ Drd2 Mouse. Neuroendocrinology, 2010, 92, 207-214.	2.5	37
16	Hypothalamic orexin, OX1, \pm MSH, NPY and MCRs expression in dopaminergic D2R knockout mice. Neuropeptides, 2009, 43, 267-274.	2.2	22
17	Fibroblast growth factor-2 in hyperplastic pituitaries of D2R knockout female mice. American Journal of Physiology - Endocrinology and Metabolism, 2007, 293, E1341-E1351.	3.5	14
18	PTTG expression in different experimental and human prolactinomas in relation to dopaminergic control of lactotropes. Molecular Cancer, 2007, 6, 4.	19.2	19

#	ARTICLE	IF	CITATIONS
19	Different kinases regulate activation of voltage-dependent calcium channels by depolarization in GH3 cells. American Journal of Physiology - Cell Physiology, 2007, 293, C951-C959.	4.6	21
20	Dopaminergic D2 Receptor Knockout Mouse: An Animal Model of Prolactinoma. , 2006, 35, 50-63.		32
21	GH in the dwarf dopaminergic D2 receptor knockout mouse: somatotrope population, GH release, and responsiveness to GH-releasing factors and somatostatin. Journal of Endocrinology, 2006, 190, 611-619.	2.6	23
22	Increased Pituitary Vascular Endothelial Growth Factor-A in Dopaminergic D2 Receptor Knockout Female Mice. Endocrinology, 2005, 146, 2952-2962.	2.8	70
23	Upregulation of angiotensin II type 2 receptor expression in estrogen-induced pituitary hyperplasia. American Journal of Physiology - Endocrinology and Metabolism, 2004, 286, E786-E794.	3.5	15
24	Angiotensin II phosphorylation of extracellular signal-regulated kinases in rat anterior pituitary cells. American Journal of Physiology - Endocrinology and Metabolism, 2003, 285, E645-E653.	3.5	17
25	Disruption of the D2 Dopamine Receptor Alters GH and IGF-I Secretion and Causes Dwarfism in Male Mice. Endocrinology, 2002, 143, 1270-1279.	2.8	83
26	Angiotensin and calcium signaling in the pituitary and hypothalamus. Cellular and Molecular Neurobiology, 2002, 22, 315-333.	3.3	19
27	Metabolic cues for puberty onset in free grazing holstein heifers naturally infected with nematodes. Theriogenology, 2001, 56, 111-122.	2.1	36
28	Desensitization of angiotensin II: effect on $[Ca^{2+}]_i$, inositol triphosphate, and prolactin in pituitary cells. American Journal of Physiology - Endocrinology and Metabolism, 2001, 280, E462-E470.	3.5	17
29	Endocrine studies in ivermectin-treated heifers from birth to puberty.. Journal of Animal Science, 2000, 78, 817.	0.5	51
30	Bromocriptine restores angiotensin II response in pituitary hyperplasia. Molecular and Cellular Endocrinology, 2000, 165, 67-74.	3.2	13
31	Calcium influx and intracellular stores in angiotensin II stimulation of normal and hyperplastic pituitary cells. American Journal of Physiology - Endocrinology and Metabolism, 1999, 277, E455-E463.	3.5	10
32	Effects of continuous ivermectin treatment from birth to puberty on growth and reproduction in dairy heifers.. Journal of Animal Science, 1999, 77, 1329.	0.5	25
33	Effect of Stage of Development and Sex on Gonadotropin-Releasing Hormone Secretion in In Vitro Hypothalamic Perfusion. Experimental Biology and Medicine, 1998, 217, 445-449.	2.4	5
34	Angiotensin II-induced Ca^{2+} -mobilization and prolactin release in normal and hyperplastic pituitary cells. American Journal of Physiology - Endocrinology and Metabolism, 1998, 274, E534-E540.	3.5	18
35	Brain sexual differentiation and gonadotropins secretion in the rat. Cellular and Molecular Neurobiology, 1997, 17, 699-715.	3.3	79
36	Biochemical parameters in the anterior pituitary during the course of tumorigenesis induced by diethylstilbestrol treatment. Journal of Steroid Biochemistry and Molecular Biology, 1994, 51, 183-189.	2.5	6

#	ARTICLE	IF	CITATIONS
37	Restoration by Bromocriptine of Glucocorticoid Receptors and Glucocorticoid Negative Feedback on Prolactin Secretion in Estrogen-Induced Pituitary Tumors. <i>Neuroendocrinology</i> , 1993, 58, 273-279.	2.5	16
38	Sexual and ontogenic differences in K ⁺ -induced gonadotropin and prolactin release in vitro. <i>Developmental Brain Research</i> , 1992, 70, 103-108.	1.7	5
39	Ontogenic studies of the neural control of adenohypophyseal hormones in the rat. II. prolactin. <i>Cellular and Molecular Neurobiology</i> , 1992, 12, 1-19.	3.3	19
40	Diazepam: Endocrine effects and hypothalamic binding sites in the developing male and female rat. <i>Life Sciences</i> , 1989, 45, 567-575.	4.3	19
