

Keith Rayner

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/11394988/keith-rayner-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
356	Ongoing Cognitive Processing Influences Precise Eye-Movement Targets in Reading. <i>Psychological Science</i> , 2020 , 31, 351-362	7.9	5
355	Minimal Overlap in Language Control Across Production And Comprehension: Evidence from Read-Aloud Versus Eye-Tracking Tasks. <i>Journal of Neurolinguistics</i> , 2020 , 54,	1.9	1
354	Reading sentences of words with rotated letters: An eye movement study. <i>Quarterly Journal of Experimental Psychology</i> , 2019 , 72, 1790-1804	1.8	5
353	Reading ? 2017 ,		
352	Do resource constraints affect lexical processing? Evidence from eye movements. <i>Journal of Memory and Language</i> , 2017 , 93, 82-103	3.8	5
351	Behavioral Experimentation 2017 , 352-370		
350	Baseball fans don't like lumpy batters: Influence of domain knowledge on the access of subordinate meanings. <i>Quarterly Journal of Experimental Psychology</i> , 2016 , 1-11	1.8	6
349	Looking, seeing and believing in autism: Eye movements reveal how subtle cognitive processing differences impact in the social domain. <i>Autism Research</i> , 2016 , 9, 879-87	5.1	8
348	So Much to Read, So Little Time: How Do We Read, and Can Speed Reading Help?. <i>Psychological Science in the Public Interest: A Journal of the American Psychological Society</i> , 2016 , 17, 4-34	18.6	100
347	Two stages of parafoveal processing during reading: Evidence from a display change detection task. <i>Psychonomic Bulletin and Review</i> , 2016 , 23, 1241-9	4.1	21
346	Saccade target selection in Chinese reading. <i>Psychonomic Bulletin and Review</i> , 2015 , 22, 524-30	4.1	9
345	The effect of contextual constraint on parafoveal processing in reading. <i>Journal of Memory and Language</i> , 2015 , 83, 118-139	3.8	44
344	What Eye Movements Reveal about Deaf Readers. <i>Current Directions in Psychological Science</i> , 2015 , 24, 220-226	6.5	29
343	Do successor effects in reading reflect lexical parafoveal processing? Evidence from corpus-based and experimental eye movement data. <i>Journal of Memory and Language</i> , 2015 , 79-80, 76-96	3.8	18
342	Transsaccadic processing: stability, integration, and the potential role of remapping. <i>Attention, Perception, and Psychophysics</i> , 2015 , 77, 3-27	2	27
341	Eye Movements in Reading 2015 , 631-634		
340	Emerging issues in developmental eye-tracking research: Insights from the workshop in Hannover, October 2013. <i>Journal of Cognitive Psychology</i> , 2015 , 27, 677-683	0.9	3

339	Evidence for direct cognitive control of fixation durations during reading. <i>Current Opinion in Behavioral Sciences</i> , 2015 , 1, 107-112	4	19
338	Skipping syntactically illegal the previews: The role of predictability. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2015 , 41, 1703-14	2.2	16
337	Readers extract character frequency information from nonfixated-target word at long pretarget fixations during Chinese reading. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2015 , 41, 1409-19	2.6	11
336	Lack of semantic parafoveal preview benefit in reading revisited. <i>Psychonomic Bulletin and Review</i> , 2014 , 21, 1067-72	4.1	39
335	Encoding the target or the plausible preview word? The nature of the plausibility preview benefit in reading Chinese. <i>Visual Cognition</i> , 2014 , 22, 193-213	1.8	24
334	Phonological and orthographic overlap effects in fast and masked priming. <i>Quarterly Journal of Experimental Psychology</i> , 2014 , 67, 1742-67	1.8	11
333	Word frequency in fast priming: Evidence for immediate cognitive control of eye-movements during reading. <i>Visual Cognition</i> , 2014 , 22, 390-414	1.8	11
332	Don't believe what you read (only once): comprehension is supported by regressions during reading. <i>Psychological Science</i> , 2014 , 25, 1218-26	7.9	84
331	Task effects reveal cognitive flexibility responding to frequency and predictability: evidence from eye movements in reading and proofreading. <i>Cognition</i> , 2014 , 131, 1-27	3.5	44
330	A rapid effect of stimulus quality on the durations of individual fixations during reading. <i>Visual Cognition</i> , 2014 , 22, 377-389	1.8	7
329	Word segmentation of overlapping ambiguous strings during Chinese reading. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2014 , 40, 1046-59	2.6	17
328	Eye movements in visual cognition: The contributions of George W. McConkie. <i>Visual Cognition</i> , 2014 , 22, 239-241	1.8	3
327	The gaze-contingent moving window in reading: Development and review. <i>Visual Cognition</i> , 2014 , 22, 242-258	1.8	48
326	The influence of contextual diversity on eye movements in reading. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2014 , 40, 275-83	2.2	33
325	Reading is fundamentally similar across disparate writing systems: a systematic characterization of how words and characters influence eye movements in Chinese reading. <i>Journal of Experimental Psychology: General</i> , 2014 , 143, 895-913	4.7	62
324	Semantic preview benefit in reading English: The effect of initial letter capitalization. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2014 , 40, 1617-28	2.6	32
323	The effect of high- and low-frequency previews and sentential fit on word skipping during reading. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2014 , 40, 1181-203	2.2	22
322	The effect of foveal and parafoveal masks on the eye movements of older and younger readers. <i>Psychology and Aging</i> , 2014 , 29, 205-12	3.6	20

321	Reading transposed text: effects of transposed letter distance and consonant-vowel status on eye movements. <i>Attention, Perception, and Psychophysics</i> , 2014 , 76, 2424-40	2	13
320	Rethinking parafoveal processing in reading: Serial-attention models can explain semantic preview benefit and N+2 preview effects. <i>Visual Cognition</i> , 2014 , 22, 309-333	1.8	37
319	Eye movements when viewing advertisements. <i>Frontiers in Psychology</i> , 2014 , 5, 210	3.4	45
318	Multiple levels of bilingual language control: evidence from language intrusions in reading aloud. <i>Psychological Science</i> , 2014 , 25, 585-95	7.9	65
317	Preview benefit in speaking occurs regardless of preview timing. <i>Psychonomic Bulletin and Review</i> , 2014 , 21, 755-62	4.1	6
316	Effects of intraword and interword spacing on eye movements during reading: exploring the optimal use of space in a line of text. <i>Attention, Perception, and Psychophysics</i> , 2013 , 75, 1275-92	2	23
315	On the processing of canonical word order during eye fixations in reading: Do readers process transposed word previews?. <i>Visual Cognition</i> , 2013 , 21, 353-381	1.8	9
314	Orthographic and phonological preview benefits: parafoveal processing in skilled and less-skilled deaf readers. <i>Quarterly Journal of Experimental Psychology</i> , 2013 , 66, 2237-52	1.8	49
313	Spatial frequency filtering and the direct control of fixation durations during scene viewing. <i>Attention, Perception, and Psychophysics</i> , 2013 , 75, 1761-73	2	10
312	Eye Movements while Reading Biased Homographs: Effects of Prior Encounter and Biasing Context on Reducing the Subordinate Bias Effect. <i>Journal of Cognitive Psychology</i> , 2013 , 25, 665-681	0.9	11
311	Eye movements and parafoveal preview of compound words: does morpheme order matter?. <i>Quarterly Journal of Experimental Psychology</i> , 2013 , 66, 505-26	1.8	5
310	Using E-Z Reader to examine the concurrent development of eye-movement control and reading skill. <i>Developmental Review</i> , 2013 , 33, 110-149	7.4	78
309	Children's Eye Movements in Reading: A Commentary. <i>School Psychology Review</i> , 2013 , 42, 223-233	1.6	25
308	Underlying Changes in Repeated Reading: An Eye Movement StudyView all notes. <i>School Psychology Review</i> , 2013 , 42, 140-156	1.6	17
307	Eye Movements, Prosody, and Word Frequency Among Average- and High- Skilled Second-Grade ReadersView all notes. <i>School Psychology Review</i> , 2013 , 42, 171-190	1.6	21
306	Parallel object activation and attentional gating of information: evidence from eye movements in the multiple object naming paradigm. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2013 , 39, 365-74	2.2	8
305	On-line perception of Mandarin Tones 2 and 3: evidence from eye movements. <i>Journal of the Acoustical Society of America</i> , 2013 , 133, 3016-29	2.2	16
304	Parafoveal-foveal overlap can facilitate ongoing word identification during reading: evidence from eye movements. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2013 , 39, 526-38 ²⁶	3.6	39

303	Evidence for direct control of eye movements during reading. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2013 , 39, 1468-84	2.6	8
302	Processing the in the parafovea: are articles skipped automatically?. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2013 , 39, 649-62	2.2	35
301	The advantage of word-based processing in Chinese reading: evidence from eye movements. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2013 , 39, 879-89	2.2	15
300	Using singular value decomposition to investigate degraded Chinese character recognition: evidence from eye movements during reading. <i>Journal of Research in Reading</i> , 2013 , 36, S35-S50	2.1	5
299	Frequency and Predictability Effects in Eye Fixations for Skilled and Less-Skilled Deaf Readers. <i>Visual Cognition</i> , 2013 , 21, 477-497	1.8	19
298	Unsegmented text delays word identification: Evidence from a survival analysis of fixation durations. <i>Visual Cognition</i> , 2013 , 21, 38-60	1.8	27
297	Basic Processes in Reading 2013 ,		2
296	Eye movements of older and younger readers when reading unspaced text. <i>Experimental Psychology</i> , 2013 , 60, 354-61	1.5	31
295	Eye movements and the perceptual span in silent and oral reading. <i>Attention, Perception, and Psychophysics</i> , 2012 , 74, 634-40	2	53
294	Effects of parafoveal word length and orthographic features on initial fixation landing positions in reading. <i>Attention, Perception, and Psychophysics</i> , 2012 , 74, 950-63	2	23
293	Eye movements of second language learners when reading spaced and unspaced Chinese text. <i>Journal of Experimental Psychology: Applied</i> , 2012 , 18, 192-202	1.8	28
292	Lexical embeddings produce interference when they are morphologically unrelated to the words in which they are contained: Evidence from eye movements. <i>Journal of Cognitive Psychology</i> , 2012 , 24, 179-188	1.8	9
291	Heuristics and Criterion Setting during Selective Encoding in Visual Decision-Making: Evidence from Eye Movements. <i>Visual Cognition</i> , 2012 , 20, 1110-1129	1.8	15
290	Skilled deaf readers have an enhanced perceptual span in reading. <i>Psychological Science</i> , 2012 , 23, 816-23	1.9	50
289	Reading Preparation of this chapter was supported by Grant HD26765 from the National Institute of Child Health and Human Development. 2012 ,		1
288	Eye movements reveal no immediate "WOW" ("which one's weird") effect in autism spectrum disorder. <i>Quarterly Journal of Experimental Psychology</i> , 2012 , 65, 1139-50	1.8	13
287	Binocular coordination: reading stereoscopic sentences in depth. <i>PLoS ONE</i> , 2012 , 7, e35608	3.7	4
286	Parafoveal processing in reading. <i>Attention, Perception, and Psychophysics</i> , 2012 , 74, 5-35	2	269

285	Semantic and plausibility effects on preview benefit during eye fixations in Chinese reading. <i>Reading and Writing</i> , 2012 , 25, 1031-1052	2.1	58
284	Is preview benefit from word n+2 a common effect in reading Chinese? Evidence from eye movements. <i>Reading and Writing</i> , 2012 , 25, 1079-1091	2.1	17
283	Using stroke removal to investigate Chinese character identification during reading: evidence from eye movements. <i>Reading and Writing</i> , 2012 , 25, 951-979	2.1	14
282	Saccade launch site as a predictor of fixation durations in reading: comments on Hand, Mielle, O'Donnell, and Sereno (2010). <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2012 , 38, 251-61	2.6	16
281	The mask-onset delay paradigm and the availability of central and peripheral visual information during scene viewing. <i>Journal of Vision</i> , 2012 , 12,	0.4	11
280	Plausibility effects when reading one- and two-character words in Chinese: evidence from eye movements. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2012 , 38, 1801-9	2.2	10
279	Eye movements in reading versus nonreading tasks: Using E-Z Reader to understand the role of word/stimulus familiarity. <i>Visual Cognition</i> , 2012 , 20, 360-390	1.8	12
278	Using E-Z Reader to simulate eye movements in nonreading tasks: a unified framework for understanding the eye-mind link. <i>Psychological Review</i> , 2012 , 119, 155-85	6.3	87
277	Still no phonological typicality effect on word reading time (and no good explanation of one, either): a rejoinder to Farmer, Monaghan, Misyak, and Christiansen. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2011 , 37, 1326-8	2.2	3
276	Eye movement guidance in Chinese reading: is there a preferred viewing location?. <i>Vision Research</i> , 2011 , 51, 1146-56	2.1	74
275	Search for multiple targets of different colours: Misguided eye movements reveal a reduction of colour selectivity. <i>Applied Cognitive Psychology</i> , 2011 , 25, 971-982	2.1	25
274	Eye Movement Sequences during Simple versus Complex Information Processing of Scenes in Autism Spectrum Disorder. <i>Autism Research & Treatment</i> , 2011 , 2011, 657383	3.2	10
273	Eye movements of older and younger readers when reading disappearing text. <i>Psychology and Aging</i> , 2011 , 26, 214-23	3.6	32
272	Parafoveal and foveal processing of abbreviations during eye fixations in reading: making a case for case. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2011 , 37, 1022-31	2.2	8
271	Eye movements and display change detection during reading. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2011 , 37, 1924-38	2.6	52
270	Frequency drives lexical access in reading but not in speaking: the frequency-lag hypothesis. <i>Journal of Experimental Psychology: General</i> , 2011 , 140, 186-209	4.7	175
269	Parafoveal processing of word n + 2 during reading: do the preceding words matter?. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2011 , 37, 1210-20	2.6	27
268	Eye movements and word skipping during reading: effects of word length and predictability. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2011 , 37, 514-28	2.6	128

267	Estimating the effect of word predictability on eye movements in Chinese reading using latent semantic analysis and transitional probability. <i>Quarterly Journal of Experimental Psychology</i> , 2010 , 63, 1374-86	1.8	18
266	Preview benefit during eye fixations in reading for older and younger readers. <i>Psychology and Aging</i> , 2010 , 25, 714-8	3.6	40
265	The time course of word frequency and case alternation effects on fixation times in reading: evidence for lexical control of eye movements. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2010 , 36, 1677-83	2.6	38
264	Gaze bias: Selective encoding and liking effects. <i>Visual Cognition</i> , 2010 , 18, 1113-1132	1.8	72
263	Distributional effects of word frequency on eye fixation durations. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2010 , 36, 1280-93	2.6	73
262	Effects of syntactic prominence on eye movements during reading. <i>Memory and Cognition</i> , 2010 , 38, 740-52	2.2	31
261	Eye movements, the perceptual span, and reading speed. <i>Psychonomic Bulletin and Review</i> , 2010 , 17, 834-9	4.1	142
260	Parafoveal processing during reading is reduced across a morphological boundary. <i>Cognition</i> , 2010 , 116, 136-42	3.5	29
259	Directional processing within the perceptual span during visual target localization. <i>Vision Research</i> , 2010 , 50, 1274-82	2.1	9
258	The influence of text legibility on eye movements during reading. <i>Applied Cognitive Psychology</i> , 2010 , 24, 1129-1148	2.1	42
257	Models of the reading process. <i>Wiley Interdisciplinary Reviews: Cognitive Science</i> , 2010 , 1, 787-799	4.5	42
256	Parafoveal processing within and between words. <i>Quarterly Journal of Experimental Psychology</i> , 2009 , 62, 1356-76	1.8	25
255	Eye movements and visual encoding during scene perception. <i>Psychological Science</i> , 2009 , 20, 6-10	7.9	107
254	Eye movement evidence that readers maintain and act on uncertainty about past linguistic input. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2009 , 106, 21086-90	11.5	147
253	Eye movements and the perceptual span in older and younger readers. <i>Psychology and Aging</i> , 2009 , 24, 755-60	3.6	105
252	Eye movements and non-canonical reading: comments on. <i>Vision Research</i> , 2009 , 49, 2232-6	2.1	13
251	Visual information capture during fixations in reading for children and adults. <i>Vision Research</i> , 2009 , 49, 1583-91	2.1	74
250	Word length and landing position effects during reading in children and adults. <i>Vision Research</i> , 2009 , 49, 2078-86	2.1	86

249	On the segmentation of Chinese words during reading. <i>Cognitive Psychology</i> , 2009 , 58, 525-52	3.1	103
248	The time course of semantic and syntactic processing in Chinese sentence comprehension: evidence from eye movements. <i>Memory and Cognition</i> , 2009 , 37, 1164-76	2.2	22
247	Scene perception and memory revealed by eye movements and receiver-operating characteristic analyses: does a cultural difference truly exist?. <i>Quarterly Journal of Experimental Psychology</i> , 2009 , 62, 276-85	1.8	53
246	Language processing in reading and speech perception is fast and incremental: implications for event-related potential research. <i>Biological Psychology</i> , 2009 , 80, 4-9	3.2	81
245	Encoding multiple words simultaneously in reading is implausible. <i>Trends in Cognitive Sciences</i> , 2009 , 13, 115-9	14	93
244	Eye movements and attention in reading, scene perception, and visual search. <i>Quarterly Journal of Experimental Psychology</i> , 2009 , 62, 1457-506	1.8	1435
243	Eye movements when looking at unusual/weird scenes: are there cultural differences?. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2009 , 35, 254-9	2.2	48
242	Do Chinese readers obtain preview benefit from word n + 2? Evidence from eye movements. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2009 , 35, 1192-204	2.6	40
241	Phonological typicality does not influence fixation durations in normal reading. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2009 , 35, 806-14	2.2	16
240	Eye movements and landing positions in reading: a retrospective. <i>Perception</i> , 2009 , 38, 895-9	1.2	10
239	Eye Movements in Reading: Models and Data. <i>Journal of Eye Movement Research</i> , 2009 , 2,	1.7	62
238	Eye Movements in Reading: Models and Data. <i>Journal of Eye Movement Research</i> , 2009 , 2, 1-10	1.7	75
237	Parafoveal processing in reading: Manipulating n + 1 and n + 2 previews simultaneously. <i>Visual Cognition</i> , 2008 , 16, 697-707	1.8	47
236	Mislocated fixations can account for parafoveal-on-foveal effects in eye movements during reading. <i>Quarterly Journal of Experimental Psychology</i> , 2008 , 61, 1239-49	1.8	81
235	Children's and adults' processing of anomaly and implausibility during reading: evidence from eye movements. <i>Quarterly Journal of Experimental Psychology</i> , 2008 , 61, 708-23	1.8	50
234	Immediate and delayed effects of word frequency and word length on eye movements in reading: a reversed delayed effect of word length. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2008 , 34, 726-50	2.6	39
233	Eye movements when reading transposed text: the importance of word-beginning letters. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2008 , 34, 1261-76	2.6	106
232	Reading spaced and unspaced Chinese text: evidence from eye movements. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2008 , 34, 1277-87	2.6	127

231	Effects of context on eye movements when reading about possible and impossible events. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2008 , 34, 1001-10	2.2	61
230	Eye movements and the use of parafoveal word length information in reading. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2008 , 34, 1560-79	2.6	57
229	The word grouping hypothesis and eye movements during reading. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2008 , 34, 1552-60	2.2	19
228	Eye Movements When Looking at Print Advertisements: The Goal of the Viewer Matters. <i>Applied Cognitive Psychology</i> , 2008 , 22, 697-707	2.1	94
227	Focus identification during sentence comprehension: evidence from eye movements. <i>Quarterly Journal of Experimental Psychology</i> , 2007 , 60, 1423-45	1.8	25
226	Eye movements and on-line comprehension processes 2007 , 326-342		16
225	Modeling the effects of lexical ambiguity on eye movements during reading 2007 , 271-292		9
224	Eye movements during information processing tasks: individual differences and cultural effects. <i>Vision Research</i> , 2007 , 47, 2714-26	2.1	160
223	Top-down and bottom-up effects in pure alexia: evidence from eye movements. <i>Neuropsychologia</i> , 2007 , 45, 2246-57	3.2	29
222	The effect of the frequencies of three consecutive content words on eye movements during reading. <i>Memory and Cognition</i> , 2007 , 35, 1283-92	2.2	11
221	Extending the e-z reader model of eye movement control to chinese readers. <i>Cognitive Science</i> , 2007 , 31, 1021-33	2.2	79
220	The time course of plausibility effects on eye movements in reading: evidence from noun-noun compounds. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2007 , 33, 1162-9	2.2	48
219	Tracking the mind during reading via eye movements: comments on Kliegl, Nuthmann, and Engbert (2006). <i>Journal of Experimental Psychology: General</i> , 2007 , 136, 520-9; discussion 530-7	4.7	57
218	Transposed-letter effects in reading: evidence from eye movements and parafoveal preview. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2007 , 33, 209-29	2.6	118
217	Eye movements in reading words and sentences 2007 , 341-371		151
216	Do readers obtain preview benefit from word N + 2? A test of serial attention shift versus distributed lexical processing models of eye movement control in reading. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2007 , 33, 230-45	2.6	41
215	Eye movements when reading disappearing text: the importance of the word to the right of fixation. <i>Vision Research</i> , 2006 , 46, 310-23	2.1	77
214	Binocular coordination of eye movements during reading. <i>Vision Research</i> , 2006 , 46, 2363-74	2.1	78

213	The binocular coordination of eye movements during reading in children and adults. <i>Vision Research</i> , 2006 , 46, 3898-908	2.1	72
