#	Article	IF	Citations
1	Mixing layer effects on the entrainment ratio in steam ejectors through ideal gas computational simulations. Energy, 2016, 95, 380-392.	4.5	66
2	Numerical assessment of steam nucleation on thermodynamic performance of steam ejectors. Applied Thermal Engineering, 2013, 52, 449-459.	3.0	61
3	Ejector primary nozzle steam condensation: Area ratio effects and mixing layer development. Applied Thermal Engineering, 2014, 71, 519-527.	3.0	47
4	Reducing energy consumption of a steam ejector through experimental optimization of the nozzle geometry. Energy, 2014, 66, 860-867.	4.5	46
5	Experience of modification of thermo-compressors in multiple effects desalination plants in Assaluyeh in IRAN. Applied Thermal Engineering, 2012, 40, 174-180.	3.0	40
6	An investigation of thermo-compressor design by analysis and experiment: Part 1. Validation of the numerical method. Energy Conversion and Management, 2013, 69, 217-227.	4.4	40
7	Wet steam flow energy analysis within thermo-compressors. Energy, 2012, 47, 609-619.	4.5	35
8	Numerical study of non-equilibrium condensing supersonic steam flow in a jet-pump based on supersaturation theory. International Journal of Mechanical Sciences, 2020, 165, 105221.	3.6	24
9	An investigation of thermo-compressor design by analysis and experiment: Part 2. Development of design method by using comprehensive characteristic curves. Energy Conversion and Management, 2013, 69, 228-237.	4.4	18
10	Axisymmetric and three dimensional flow modeling within thermal vapor compressors. Heat and Mass Transfer, 2013, 49, 1489-1501.	1.2	13
11	An investigation on the supersonic ejectors working with mixture of air and steam. Journal of Mechanical Science and Technology, 2015, 29, 4691-4699.	0.7	10
12	Thermodynamic evaluation of high compressible steam flow in vapor compression systems used in desalination processes. Desalination and Water Treatment, 2015, 54, 1782-1792.	1.0	7
13	Study of drying process a vertical porous channel by developing a numeric solver in OpenFOAM. International Journal of Thermal Sciences, 2019, 146, 106072.	2.6	5
14	Development of a two-fluid model for predicting phase-changing flows inside thermal vapor compressors used in thermal desalination systems. Applied Thermal Engineering, 2021, 195, 116943.	3.0	5
15	Numerical Investigation of the Effects of Steam Nucleation on the Steam Ejectors Performance. , 2012, , .		2
16	Numerical Optimization of Ejector Geometry Based on Non-Dimensional Parameters. , 2012, , .		2
17	Geometrical analysis of thermo-compressors in multiple-effects distillation units based on the second law of thermodynamics. Desalination and Water Treatment, 2014, 52, 5731-5739.	1.0	2
18	Numerical Optimization of Thermo-Compressors Based on Non-Dimensional Geometrical Parameters. , 2012, , .		1

#	Article	IF	Citations
19	Numerical study of effective parameters on the drying process in a vertical porous channel. Heat Transfer - Asian Research, 2019, 48, 3682-3707.	2.8	1
20	Experimental Improvement of Ejector Performance Through Numerical Optimization of Nozzle Geometry. , 2013, , .		0
21	Numerical Investigation of Heat Transfer in Wet Steam Flow in Convergent-Divergent Nozzles. , 2013, , .		0
22	CFD Evaluation of Steam Properties Within Thermo-Compressors With Two Different Numerical Approches. , 2013, , .		0
