## Hirbod Karimi

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/11425660/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Copper Zirconium Phosphate as an Efficient Catalyst for Multi-component Reactions in Solvent-Free Conditions. Iranian Journal of Science and Technology, Transaction A: Science, 2018, 42, 219-235.	1.5	2
2	CuFeO <sub>2</sub> /tetrabutylammonium bromide catalyzes selective synthesis of 1,4â€disubstituted 1,2,3â€ŧriazoles in neat water at room temperature. Applied Organometallic Chemistry, 2016, 30, 946-948.	3.5	9
3	An efficient selective oxidation of alcohols with iron zirconium phosphate under solvent-free conditions. Monatshefte FĂ¼r Chemie, 2016, 147, 413-423.	1.8	1
4	Preparation, characterization and catalytic activity of CoFe 2 O 4 nanoparticles as a magnetically recoverable catalyst for selective oxidation of benzyl alcohol to benzaldehyde and reduction of organic dyes. Journal of Colloid and Interface Science, 2016, 465, 271-278.	9.4	100
5	Highly efficient and recyclable acetylation of phenols and alcohols by nickel zirconium phosphate under solvent-free conditions. Journal of the Iranian Chemical Society, 2016, 13, 55-64.	2.2	3
6	An Efficient Selective Oxidation of Alcohols with Zinc Zirconium Phosphate under Solventâ€free Conditions. Journal of the Chinese Chemical Society, 2015, 62, 604-613.	1.4	7
7	Cobalt nanoparticles supported on ionic liquidâ€functionalized multiwall carbon nanotubes as an efficient and recyclable catalyst for Heck reaction. Applied Organometallic Chemistry, 2015, 29, 805-808.	3.5	32
8	Solventâ€free Chemoselective Synthesis of 1,1â€diacetates Catalyzed by Iron Zirconium Phosphate. Journal of the Chinese Chemical Society, 2015, 62, 1000-1010.	1.4	3
9	Zinc zirconium phosphate as an efficient catalyst for chemoselective synthesis of 1,1-diacetates under solvent-free conditions. Journal of Chemical Sciences, 2015, 127, 1945-1955.	1.5	5
10	Selective oxidation of alcohols over nickel zirconium phosphate. Chinese Journal of Catalysis, 2015, 36, 1109-1116.	14.0	16
11	Acetylation of alcohols and phenols under solvent-free conditions using iron zirconium phosphate. Chinese Journal of Catalysis, 2015, 36, 595-602.	14.0	4
12	Synthesis of diaryl thioethers from aryl halides and potassium thiocyanate. Applied Organometallic Chemistry, 2014, 28, 879-883.	3.5	28
13	Acetylation of alcohols and phenols under solvent-free conditions using copper zirconium phosphate. Chinese Journal of Catalysis, 2014, 35, 1982-1989.	14.0	20
14	Acetylation of alcohols and phenols by zinc zirconium phosphate as an efficient heterogeneous catalyst under solvent-free conditions. Monatshefte FA1⁄4r Chemie, 2014, 145, 1461-1472.	1.8	10
15	Synthesis and characterization of hexagonal zirconium phosphate nanoparticles. Materials Letters, 2014, 116, 356-358.	2.6	46
16	Selective oxidation of alcohols over copper zirconium phosphate. Chinese Journal of Catalysis, 2014, 35, 1529-1533.	14.0	25
17	Zirconium phosphate nanoparticles as a remarkable solid acid catalyst for selective solvent-free alkylation of phenol. Chinese Journal of Catalysis, 2014, 35, 1136-1147.	14.0	24
18	Zirconium Phosphate Nanoparticles for Solvent Free Acetylation of Phenols and Salicylic Acid: An Efficient and Ecoâ€friendly Solid Acid Catalyst for Synthesis of Acetyl Salicylic Acid (Aspirin). Journal of the Chinese Chemical Society, 2014, 61, 975-984.	1.4	3

#	Article	IF	CITATIONS
19	Hexagonal zirconium phosphate nanoparticles as an efficient and recyclable catalyst for selective solvent-free alkylation of phenol with cyclohexanol. Applied Catalysis A: General, 2014, 482, 99-107.	4.3	24
