#	ARTICLE	IF	CITATIONS
1	Manufacturerâ€™retailer supply chain model with payment time-dependent discount factor under two-level trade credit. <i>International Journal of Systems Science: Operations and Logistics</i> , 2023, 10, .	2.0	1
2	Retailersâ€™ competition and cooperation in a closed-loop green supply chain under governmental intervention and cap-and-trade policy. <i>Operational Research</i> , 2022, 22, 859-894.	1.3	32
3	A closed-loop supply chain model with uncertain return and learning-forgetting effect in production under consignment stock policy. <i>Operational Research</i> , 2022, 22, 947-975.	1.3	4
4	Integrating Corporate Social Responsibility in a closed-loop supply chain under government subsidy and used products collection strategies. <i>Flexible Services and Manufacturing Journal</i> , 2022, 34, 65-100.	1.9	20
5	Impact of uncertain demand and lead-time reduction on two-echelon supply chain. <i>Annals of Operations Research</i> , 2022, 315, 2027-2055.	2.6	7
6	Optimal batch shipment policy for an imperfect production system under price-, advertisement- and green-sensitive demand. <i>Journal of Management Analytics</i> , 2022, 9, 86-119.	1.6	5
7	A manufacturingâ€™remanufacturing supply chain model with learning and forgetting in inspection under consignment stock agreement. <i>Operational Research</i> , 2022, 22, 4093-4117.	1.3	3
8	Analyzing a manufacturer-retailer sustainable supply chain under cap-and-trade policy and revenue sharing contract. <i>Operational Research</i> , 2022, 22, 4057-4092.	1.3	13
9	Investigating strategies of a green closed-loop supply chain for substitutable products under government subsidy. <i>Journal of Industrial and Production Engineering</i> , 2022, 39, 253-276.	2.1	37
10	A closed-loop supply chain model with learning effect, random return and imperfect inspection under price- and quality-dependent demand. <i>Opsearch</i> , 2022, 59, 1094-1115.	1.1	5
11	Optimal lot-sizing policy for a failure prone production system with investment in process quality improvement and lead time variance reduction. <i>Journal of Industrial and Management Optimization</i> , 2022, 18, 1891.	0.8	2
12	Optimal sustainability investment and pricing decisions in a two-echelon supply chain with emissions-sensitive demand under cap-and-trade policy. <i>Opsearch</i> , 2022, 59, 786-808.	1.1	2
13	Pythagorean fuzzy DEMATEL method for supplier selection in sustainable supply chain management. <i>Expert Systems With Applications</i> , 2022, 193, 116396.	4.4	82
14	Effectiveness of consignment stock policy under space limitations and deterioration. <i>International Journal of Production Research</i> , 2021, 59, 1834-1851.	4.9	11
15	Coordination mechanisms of a three-layer supply chain under demand and supply risk uncertainties. <i>RAIRO - Operations Research</i> , 2021, 55, S2593-S2617.	1.0	7
16	Extended PROMETHEE method with Pythagorean fuzzy sets for medical diagnosis problems. <i>Soft Computing</i> , 2021, 25, 4503-4512.	2.1	52
17	Coordinating a three-level supply chain with effort and price dependent stochastic demand under random yield. <i>Annals of Operations Research</i> , 2021, 307, 175-206.	2.6	9
18	Developing a closed-loop supply chain model with price and quality dependent demand and learning in production in a stochastic environment. <i>International Journal of Systems Science: Operations and Logistics</i> , 2020, 7, 147-163.	2.0	30

#	ARTICLE	IF	CITATIONS
19	Stochastic supply chain model with imperfect production and controllable defective rate. <i>International Journal of Systems Science: Operations and Logistics</i> , 2020, 7, 133-146.	2.0	22
20	Pricing and greening strategies for a dual-channel closed-loop green supply chain. <i>Flexible Services and Manufacturing Journal</i> , 2020, 32, 724-761.	1.9	31
21	Grey relational analysis method for SVTrNN based multi-attribute decision making with partially known or completely unknown weight information. <i>Granular Computing</i> , 2020, 5, 561-570.	4.4	9
22	A vendor–buyer integrated inventory system with variable lead time and uncertain market demand. <i>Operational Research</i> , 2020, 20, 491-515.	1.3	10
23	A hybrid heuristic algorithm for cyclic inventory-routing problem with perishable products in VMI supply chain. <i>Expert Systems With Applications</i> , 2020, 153, 113322.	4.4	22
24	A three-echelon supply chain model with price and two-level quality dependent demand. <i>RAIRO - Operations Research</i> , 2020, 54, 37-52.	1.0	5
25	Some similarity measures for MADM under a complex neutrosophic set environment. , 2020, , 87-116.		1
26	Pricing and used product collection strategies in a two-period closed-loop supply chain under greening level and effort dependent demand. <i>Journal of Cleaner Production</i> , 2020, 265, 121335.	4.6	71
27	TOPSIS Method for Neutrosophic Hesitant Fuzzy Multi-Attribute Decision Making. <i>Informatica</i> , 2020, , 35-63.	1.5	10
28	A Vendor-Buyer Supply Chain Model for Deteriorating Item with Quadratic Time-Varying Demand and Pro-rata Warranty Policy. <i>Springer Proceedings in Mathematics and Statistics</i> , 2020, , 371-383.	0.1	0
29	An Integrated Imperfect Production–Inventory Model with Optimal Vendor Investment and Backorder Price Discount. <i>Advances in Intelligent Systems and Computing</i> , 2019, , 187-203.	0.5	6
30	An integrated vendor–buyer model with stochastic demand, lot-size dependent lead-time and learning in production. <i>Journal of Industrial Engineering International</i> , 2019, 15, 165-178.	1.8	2
31	NonLinear Programming Approach for Single-Valued Neutrosophic TOPSIS Method. <i>New Mathematics and Natural Computation</i> , 2019, 15, 307-326.	0.4	10
32	Game theoretic analysis of a closed-loop supply chain with backup supplier under dual channel recycling. <i>Computers and Industrial Engineering</i> , 2019, 129, 179-191.	3.4	54
33	A new approach to deal with learning in inspection in an integrated vendor-buyer model with imperfect production process. <i>Computers and Industrial Engineering</i> , 2019, 131, 515-523.	3.4	32
34	Neutrosophic TOPSIS with Group Decision Making. <i>Studies in Fuzziness and Soft Computing</i> , 2019, , 543-585.	0.6	16
35	Optimising an integrated production–inventory system under cash discount and retailer partial trade credit policy. <i>International Journal of Systems Science: Operations and Logistics</i> , 2019, 6, 99-118.	2.0	7
36	A two-warehouse integrated inventory model with imperfect production process under stock-dependent demand and quantity discount offer. <i>International Journal of Systems Science: Operations and Logistics</i> , 2019, 6, 15-26.	2.0	11

#	ARTICLE	IF	CITATIONS
37	Optimal replenishment policy and preservation technology investment for a non-instantaneous deteriorating item with stock-dependent demand. <i>Operational Research</i> , 2019, 19, 347-368.	1.3	39
38	Rough Neutrosophic Aggregation Operators for Multi-criteria Decision-Making. <i>Studies in Fuzziness and Soft Computing</i> , 2019, , 79-105.	0.6	9
39	Coordinating a multi-echelon supply chain under production disruption and price-sensitive stochastic demand. <i>Journal of Industrial and Management Optimization</i> , 2019, 15, 1631-1651.	0.8	15
40	Analysing a closed-loop supply chain with selling price, warranty period and green sensitive consumer demand under revenue sharing contract. <i>Journal of Cleaner Production</i> , 2018, 190, 822-837.	4.6	131
41	Optimal replenishment policy for non-instantaneously perishable items with preservation technology and random deterioration start time. <i>International Journal of Management Science and Engineering Management</i> , 2018, 13, 188-199.	2.6	17
42	NN-Harmonic Mean Aggregation Operators-Based MCGDM Strategy in a Neutrosophic Number Environment. <i>Axioms</i> , 2018, 7, 12.	0.9	21
43	Effectiveness of consignment stock policy in a three-level supply chain. <i>Operational Research</i> , 2017, 17, 39-66.	1.3	3
44	Hybrid vector similarity measures and their applications to multi-attribute decision making under neutrosophic environment. <i>Neural Computing and Applications</i> , 2017, 28, 1163-1176.	3.2	77
45	Integrated model for an imperfect production-inventory system with a generalised shipment policy, errors in quality inspection and ordering cost reduction. <i>International Journal of Systems Science: Operations and Logistics</i> , 2017, 4, 260-274.	2.0	5
46	Coordinating a vendor–buyer supply chain with stochastic demand and uncertain yield. <i>International Journal of Management Science and Engineering Management</i> , 2017, 12, 96-103.	2.6	5
47	Multi-manufacturer pricing and quality management strategies in the presence of brand differentiation and return policy. <i>Computers and Industrial Engineering</i> , 2017, 105, 146-157.	3.4	16
48	Sub-supply chain coordination in a three-layer chain under demand uncertainty and random yield in production. <i>International Journal of Production Economics</i> , 2017, 191, 66-73.	5.1	33
49	Coordinating a three-echelon supply chain under price and quality dependent demand with sub-supply chain and RFM strategies. <i>Applied Mathematical Modelling</i> , 2017, 52, 747-769.	2.2	35
50	Pricing and return product collection decisions in a closed-loop supply chain with dual-channel in both forward and reverse logistics. <i>Journal of Manufacturing Systems</i> , 2017, 42, 104-123.	7.6	180
51	A closed-loop supply chain with stochastic product returns and worker experience under learning and forgetting. <i>International Journal of Production Research</i> , 2017, 55, 6760-6778.	4.9	38
52	Two-period pricing and decision strategies in a two-echelon supply chain under price-dependent demand. <i>Applied Mathematical Modelling</i> , 2017, 42, 655-674.	2.2	51
53	Two-way product recovery in a closed-loop supply chain with variable markup under price and quality dependent demand. <i>International Journal of Production Economics</i> , 2017, 183, 259-272.	5.1	87
54	Consignment stock policy with unequal shipments and process unreliability for a two-level supply chain. <i>International Journal of Production Research</i> , 2017, 55, 2489-2505.	4.9	24

#	ARTICLE	IF	CITATIONS
55	Improving performance by coordinating a supply chain with third party logistics outsourcing under production disruption. <i>Computers and Industrial Engineering</i> , 2017, 103, 168-177.	3.4	88
56	A vendor-buyer supply chain model for time-dependent deteriorating item with preservation technology investment. <i>International Journal of Mathematics in Operational Research</i> , 2017, 10, 431.	0.1	20
57	A fuzzy random continuous review inventory model with a mixture of backorders and lost sales under imprecise chance constraint. <i>International Journal of Operational Research</i> , 2016, 26, 34.	0.1	7
58	Optimal strategy for a manufacturer-retailer inventory system with defective items under retailer partial trade credit policy. <i>Journal of Information and Optimization Sciences</i> , 2016, 37, 343-387.	0.2	0
59	Optimal ordering policy for an inventory system with linearly increasing demand and allowable shortages under two levels trade credit financing. <i>Operational Research</i> , 2016, 16, 25-50.	1.3	18
60	Coordinating a three-layer supply chain with uncertain demand and random yield. <i>International Journal of Production Research</i> , 2016, 54, 2499-2518.	4.9	58
61	Modelling supply chain inventory system with controllable lead time under price-dependent demand. <i>International Journal of Advanced Manufacturing Technology</i> , 2016, 84, 1861-1871.	1.5	7
62	Optimal production policy for a closed-loop hybrid system with uncertain demand and return under supply disruption. <i>Journal of Cleaner Production</i> , 2016, 112, 2015-2028.	4.6	85
63	Coordinating a two-echelon supply chain under production disruption when retailers compete with price and service level. <i>Operational Research</i> , 2016, 16, 71-88.	1.3	30
64	TOPSIS method for multi-attribute group decision-making under single-valued neutrosophic environment. <i>Neural Computing and Applications</i> , 2016, 27, 727-737.	3.2	312
65	A vendor-buyer integrated inventory system with vendor's capacity constraint. <i>International Journal of Logistics Systems and Management</i> , 2015, 21, 284.	0.2	11
66	A single-vendor multi-buyer integrated model with stock- and price-dependent demand under consignment stock policy. <i>International Journal of Services and Operations Management</i> , 2015, 20, 228.	0.1	8
67	Two-Echelon Inventory Optimization for Imperfect Production System under Quality Competition Environment. <i>Mathematical Problems in Engineering</i> , 2015, 2015, 1-11.	0.6	10
68	Coordinating a two-echelon supply chain with price and promotional effort dependent demand. <i>International Journal of Operational Research</i> , 2015, 23, 181.	0.1	8
69	An integrated inventory model for a deteriorating item with allowable shortages and credit linked wholesale price. <i>Optimization Letters</i> , 2015, 9, 1149-1175.	0.9	12
70	Optimizing a closed-loop supply chain with manufacturing defects and quality dependent return rate. <i>Journal of Manufacturing Systems</i> , 2015, 35, 92-111.	7.6	91
71	Quality and pricing decisions in a two-echelon supply chain under multi-manufacturer competition. <i>International Journal of Advanced Manufacturing Technology</i> , 2015, 78, 1927-1941.	1.5	32
72	A vendor-buyer JELS model with stock-dependent demand and consigned inventory under buyer's space constraint. <i>Operational Research</i> , 2015, 15, 79-93.	1.3	24

#	ARTICLE	IF	CITATIONS
73	Coordinating a supply chain under uncertain demand and random yield in presence of supply disruption. <i>International Journal of Production Research</i> , 2015, 53, 5070-5084.	4.9	55
74	A single-manufacturer multi-buyer supply chain inventory model with controllable lead time and price-sensitive demand. <i>Journal of Industrial and Production Engineering</i> , 2015, 32, 516-527.	2.1	9
75	Optimal Pricing and Order-Up-To S Inventory Policy with Expected Utility of the Present Value Criterion. <i>Engineering Economist</i> , 2015, 60, 231-244.	0.3	1
76	A closed loop supply chain under retail price and product quality dependent demand. <i>Journal of Manufacturing Systems</i> , 2015, 37, 624-637.	7.6	146
77	Manufacturer's pricing strategies in cooperative and non-cooperative advertising supply chain under retail competition. <i>International Journal of Industrial Engineering Computations</i> , 2014, 5, 473-494.	0.4	4
78	Lot sizing and unequal-sized shipment policy for an integrated production-inventory system. <i>International Journal of Systems Science</i> , 2014, 45, 888-901.	3.7	20
79	Profit improvement through retailer's Stackelberg in a multi-echelon supply chain of deteriorating product with price-sensitive demand. <i>Journal of Industrial and Production Engineering</i> , 2014, 31, 187-198.	2.1	8
80	Multi-manufacturer single-retailer supply chain model under price- and warranty period-dependent demand. <i>International Journal of Mathematics in Operational Research</i> , 2014, 6, 631.	0.1	9
81	TOPSIS approach to linear fractional bi-level MODM problem based on fuzzy goal programming. <i>Journal of Industrial Engineering International</i> , 2014, 10, 173-184.	1.8	14
82	Lot sizing in a deteriorating production system under inspections, imperfect maintenance and reworks. <i>Operational Research</i> , 2014, 14, 29-50.	1.3	18
83	Manufacturer's pricing strategy in a two-level supply chain with competing retailers and advertising cost dependent demand. <i>Economic Modelling</i> , 2014, 38, 102-111.	1.8	57
84	Trade credit competition between two retailers in a supply chain under credit-linked retail price and market demand. <i>Optimization Letters</i> , 2014, 8, 2065-2085.	0.9	11
85	Note on "Coordinating the ordering and advertising policies for a single-period commodity in a two-level supply chain"; <i>Computers and Industrial Engineering</i> , 2014, 77, 11-14.	3.4	1
86	Optimal vendor investment for reducing defect rate in a vendor-buyer integrated system with imperfect production process. <i>International Journal of Production Economics</i> , 2014, 155, 222-228.	5.1	56
87	Coordinating a two-echelon supply chain through different contracts under price and promotional effort-dependent demand. <i>Journal of Systems Science and Systems Engineering</i> , 2013, 22, 295-318.	0.8	19
88	Joint effect of stock threshold level and production policy on an unreliable production environment. <i>Applied Mathematical Modelling</i> , 2013, 37, 6593-6608.	2.2	12
89	Supply chain model with price- and trade credit-sensitive demand under two-level permissible delay in payments. <i>International Journal of Systems Science</i> , 2013, 44, 937-948.	3.7	49
90	A vendor-buyer integrated production-inventory model with quantity discount and unequal sized shipments. <i>International Journal of Operational Research</i> , 2013, 16, 1.	0.1	18

#	ARTICLE	IF	CITATIONS
91	Supply chain model for a deteriorating product with time-varying demand and production rate. Journal of the Operational Research Society, 2012, 63, 665-673.	2.1	24
92	Note on effects of joint replenishment and channel coordination for managing multiple deteriorating products in a supply chain. Journal of the Operational Research Society, 2012, 63, 861-864.	2.1	3
93	An integrated multi-supplier, multi-buyer and dual vendors inventory model with stochastic demand. International Journal of Services and Operations Management, 2012, 13, 208.	0.1	6
94	An optimal policy for a single-vendor single-buyer integrated inventory system based on vendor's strategy of shipments to buyer. International Journal of Services and Operations Management, 2012, 13, 267.	0.1	7
95	Supply chain coordination for a deteriorating item with stock and price-dependent demand under revenue sharing contract. International Transactions in Operational Research, 2012, 19, 753-768.	1.8	56
96	Joint determination of optimal safety stocks and production policy for an imperfect production system. Applied Mathematical Modelling, 2012, 36, 712-722.	2.2	26
97	Coordinating a two-echelon supply chain under inflation and time value of money. International Journal of Industrial Engineering Computations, 2011, 2, 811-818.	0.4	2
98	Supply chain coordination for a deteriorating product under stock-dependent consumption rate and unreliable production process. International Journal of Industrial Engineering Computations, 2011, 2, 263-272.	0.4	9
99	Supply Chain Coordination with Price-Sensitive Demand Under Risks of Demand and Supply Disruptions. Technology Operation Management, 2011, 2, 29-38.	0.0	2
100	Managing inventory with two suppliers under yield uncertainty and risk aversion. International Journal of Production Economics, 2011, 133, 80-85.	5.1	83
101	Fuzzy production planning models for an unreliable production system with fuzzy production rate and stochastic/fuzzy demand rate. International Journal of Industrial Engineering Computations, 2011, 2, 179-192.	0.4	5
102	Quantifying the risk in age and block replacement policies. Journal of the Operational Research Society, 2010, 61, 1151-1158.	2.1	12
103	Lot sizing in an unreliable manufacturing system with fuzzy demand and repair time. International Journal of Industrial and Systems Engineering, 2010, 5, 485.	0.1	7
104	Fuzzy EPQ models for an imperfect production system. International Journal of Systems Science, 2009, 40, 45-52.	3.7	21
105	Cost-effective ordering policies for inventory systems with emergency order. Computers and Industrial Engineering, 2009, 57, 1336-1341.	3.4	10
106	Production lot sizing with process deterioration and machine breakdown. European Journal of Operational Research, 2008, 185, 606-618.	3.5	75
107	Determining Economic Manufacturing Quantity for an unreliable manufacturing system in discrete time setting. International Journal of Operational Research, 2008, 3, 557.	0.1	4
108	Fuzzy Economic Order Quantity model for perishable items with stochastic demand, partial backlogging and fuzzy deterioration rate. International Journal of Operational Research, 2008, 3, 77.	0.1	31

#	ARTICLE	IF	CITATIONS
109	Optimal production, maintenance, and warranty strategies for item sold with rebate combination warranty. Proceedings of the Institution of Mechanical Engineers, Part O: Journal of Risk and Reliability, 2007, 221, 257-264.	0.6	2
110	Inspection scheduling for imperfect production processes under free repair warranty contract. European Journal of Operational Research, 2007, 183, 238-252.	3.5	49
111	OPTIMAL INSPECTION SCHEDULE IN AN IMPERFECT EMQ MODEL WITH FREE REPAIR WARRANTY POLICY(&Special Issue&Advanced Planning and Scheduling for Supply Chain Management). Journal of the Operations Research Society of Japan, 2006, 49, 222-237.	0.3	3
112	Discrete-time spare ordering policy with randomized lead times and discounting. International Transactions in Operational Research, 2006, 13, 561-576.	1.8	2
113	Cost-effective production policy for a stochastic unreliable manufacturing system. IMA Journal of Management Mathematics, 2006, 17, 209-223.	1.1	1
114	OPTIMAL PRODUCTION RUN-LENGTH AND WARRANTY PERIOD FOR ITEMS SOLD WITH REBATE COMBINATION WARRANTY. , 2006, , .		0
115	Exact formulation of stochastic EMQ model for an unreliable production system. Journal of the Operational Research Society, 2005, 56, 563-575.	2.1	44
116	Optimal lot sizing for an unreliable production system under partial backlogging and at most two failures in a production cycle. International Journal of Production Economics, 2005, 95, 229-243.	5.1	25
117	Economic order quantity models for ameliorating/deteriorating items under inflation and time discounting. European Journal of Operational Research, 2005, 162, 773-785.	3.5	122
118	Optimal design of unreliable productionâ€inventory systems with variable production rate. European Journal of Operational Research, 2005, 162, 372-386.	3.5	58
119	Optimal lot sizing in an unreliable two-stage serial production-inventory system. International Transactions in Operational Research, 2005, 12, 63-82.	1.8	5
120	An economic production lot size model with increasing demand, shortages and partial backlogging. International Transactions in Operational Research, 2005, 12, 235-245.	1.8	23
121	Computational aspects of an extended EMQ model with variable production rate. Computers and Operations Research, 2005, 32, 3143-3161.	2.4	27
122	Inspection Scheduling for Imperfect Production Processes. Proceedings of the ISCIE International Symposium on Stochastic Systems Theory and Its Applications, 2005, 2005, 246-251.	0.1	0
123	Accounting for idle capacity cost in the scheduling of economic lot sizes. International Journal of Production Research, 2004, 42, 677-691.	4.9	9
124	Note on an economic lot scheduling problem under budgetary and capacity constraints. International Journal of Production Economics, 2004, 91, 229-234.	5.1	9
125	Optimal lot sizing for an unreliable production system based on net present value approach. International Journal of Production Economics, 2004, 92, 157-167.	5.1	30
126	An improved heuristic for a batch production system under linearly increasing time-varying demand. Computers and Industrial Engineering, 2004, 47, 103-106.	3.4	3

#	ARTICLE	IF	CITATIONS
127	Optimal Design of Production Rate in A Failure-Prone Manufacturing System. Proceedings of the ISCIE International Symposium on Stochastic Systems Theory and Its Applications, 2004, 2004, 279-284.	0.1	0
128	The productionâ€“inventory problem of a product with time varying demand, production and deterioration rates. European Journal of Operational Research, 2003, 147, 549-557.	3.5	124
129	A simple rule for determining replenishment intervals of an inventory item with linear decreasing demand rate. International Journal of Production Economics, 2003, 83, 139-142.	5.1	17
130	Economic Order Quantity model with Weibull deterioration distribution, shortage and ramp-type demand. International Journal of Systems Science, 2003, 34, 237-243.	3.7	134
131	Economic lot scheduling problem with imperfect production processes and setup times. Journal of the Operational Research Society, 2002, 53, 620-629.	2.1	30
132	Some notes on the optimal production stopping and restarting times for an EOQ model with deteriorating items. Journal of the Operational Research Society, 2001, 52, 1300-1301.	2.1	9
133	Recent trends in modeling of deteriorating inventory. European Journal of Operational Research, 2001, 134, 1-16.	3.5	1,128
134	Comment on Bose S, Goswami A and Chaudhuri KS (1995). An EOQ model for deteriorating items with linear time-dependent demand rate and shortages under inflation and time discounting. Journal of the Operational Research Society, 2001, 52, 966-969.	2.1	2
135	Note on ?An Optimal Recursive Method for Various Inventory Replenishment Models with Increasing Demand and Shortages? by Teng et al.. Naval Research Logistics, 2000, 47, 602-606.	1.4	5
136	A note on a lot sizing heuristic for deteriorating items with time-varying demands and shortages. Computers and Operations Research, 2000, 27, 495-505.	2.4	45
137	An economic production lot-size model with shortages and time-dependent demand. IMA Journal of Management Mathematics, 1999, 10, 203-211.	1.1	2
138	Deterministic models of perishable inventory with stock-dependent demand rate and nonlinear holding cost. European Journal of Operational Research, 1998, 105, 467-474.	3.5	173
139	A heuristic for replenishment of deteriorating items with time-varying demand and shortages in all cycles. International Journal of Systems Science, 1998, 29, 551-555.	3.7	8
140	Heuristic models for deteriorating items with shortages and time-varying demand and costs. International Journal of Systems Science, 1997, 28, 153-159.	3.7	37
141	An EOQ Model for Deteriorating Items with Time Varying Demand and Costs. Journal of the Operational Research Society, 1996, 47, 1398-1405.	2.1	80
142	An inventory model for deteriorating items with stock-dependent demand rate. European Journal of Operational Research, 1996, 95, 604-610.	3.5	127
143	Corporate social responsibility in a closed-loop supply chain with dual-channel waste recycling. International Journal of Systems Science: Operations and Logistics, 0, , 1-14.	2.0	6
144	Green sustainable supply chain under cap and trade regulation involving Government introspection. RAIRO - Operations Research, 0, , .	1.0	7
