| # | Article | IF | Citations |
|---|---------|-----|-----------|
| 1 | Gene discovery and polygenic prediction from a genome-wide association study of educational attainment in 1.1 million individuals. Nature Genetics, 2018, 50, 1112-1121. | 9.4 | 1,835 |
| 2 | Genome-wide association study identifies 74 loci associated with educational attainment. Nature, 2016, 533, 539-542. | 13.7 | 1,204 |
| 3 | Genetic variants associated with subjective well-being, depressive symptoms, and neuroticism identified through genome-wide analyses. Nature Genetics, 2016, 48, 624-633. | 9.4 | 870 |
| 4 | GWAS of 126,559 Individuals Identifies Genetic Variants Associated with Educational Attainment. Science, 2013, 340, 1467-1471. | 6.0 | 750 |
| 5 | â€œI think I can, I think I canâ€: Overconfidence and entrepreneurial behavior. Journal of Economic Psychology, 2007, 28, 502-527. | 1.1 | 652 |
| 6 | Genome-wide association analyses of risk tolerance and risky behaviors in over 1 million individuals identify hundreds of loci and shared genetic influences. Nature Genetics, 2019, 51, 245-257. | 9.4 | 536 |
| 7 | Genomic structural equation modelling provides insights into the multivariate genetic architecture of complex traits. Nature Human Behaviour, 2019, 3, 513-525. | 6.2 | 511 |
| 8 | Genome-wide association meta-analysis of 78,308 individuals identifies new loci and genes influencing human intelligence. Nature Genetics, 2017, 49, 1107-1112. | 9.4 | 425 |
| 9 | Polygenic risk scores for schizophrenia and bipolar disorder predict creativity. Nature Neuroscience, 2015, 18, 953-955. | 7.1 | 351 |
| 10 | The relationship between technology, innovation, and firm performanceâ€"Empirical evidence from e-business in Europe. Research Policy, 2008, 37, 1317-1328. | 3.3 | 338 |
| 11 | Why are some entrepreneurs more innovative than others?. Small Business Economics, 2008, 31, 21-37. | 4.4 | 323 |
| 12 | Entrepreneurship and the Business Cycle. Review of Economics and Statistics, 2012, 94, 1143-1156. | 2.3 | 288 |
| 13 | Genome-wide analysis identifies 12 loci influencing human reproductive behavior. Nature Genetics, 2016, 48, 1462-1472. | 9.4 | 284 |
| 14 | Common genetic variants associated with cognitive performance identified using the proxy-phenotype method. Proceedings of the National Academy of Sciences of the United States of America, 2014, 111, 13790-13794. | 3.3 | 244 |
| 15 | I Can't Get No Satisfactionâ€"Necessity Entrepreneurship and Procedural Utility. Kyklos, 2009, 62, 191-209. | 0.7 | 227 |
| 16 | The genetic architecture of economic and political preferences. Proceedings of the National Academy of Sciences of the United States of America, 2012, 109, 8026-8031. | 3.3 | 225 |
| 17 | Gender Differences in Entrepreneurial Propensity*. Oxford Bulletin of Economics and Statistics, 2013, 75, 213-234. | 0.9 | 221 |
| 18 | Polygenic prediction of educational attainment within and between families from genome-wide association analyses in 3 million individuals. Nature Genetics, 2022, 54, 437-449. | 9.4 | 215 |

| # | Article | IF | Citations |
|---|---------|----|-----------|
| 19 | Directional dominance on stature and cognition in diverse human populations. Nature, 2015, 523, 459-462. | 13.7 | 173 |
| 20 | Within-sibship genome-wide association analyses decrease bias in estimates of direct genetic effects. Nature Genetics, 2022, 54, 581-592. | 9.4 | 142 |
| 21 | Multivariate analysis of 1.5 million people identifies genetic associations with traits related to self-regulation and addiction. Nature Neuroscience, 2021, 24, 1367-1376. | 7.1 | 137 |
| 22 | The default network of the human brain is associated with perceived social isolation. Nature Communications, 2020, 11, 6393. | 5.8 | 108 |
| 23 | Molecular Genetics and Economics. Journal of Economic Perspectives, 2011, 25, 57-82. | 2.7 | 99 |
| 24 | Replicability and Robustness of Genome-Wide-Association Studies for Behavioral Traits. Psychological Science, 2014, 25, 1975-1986. | 1.8 | 92 |
| 25 | Using genetics for social science. Nature Human Behaviour, 2020, 4, 567-576. | 6.2 | 85 |
| 26 | Molecular genetics and subjective well-being. Proceedings of the National Academy of Sciences of the United States of America, 2013, 110, 9692-9697. | 3.3 | 82 |
| 27 | Genomic analysis of diet composition finds novel loci and associations with health and lifestyle. Molecular Psychiatry, 2021, 26, 2056-2069. | 4.1 | 79 |
| 28 | Meta-GWAS Accuracy and Power (MetaGAP) Calculator Shows that Hiding Heritability Is Partially Due to Imperfect Genetic Correlations across Studies. PLoS Genetics, 2017, 13, e1006495. | 1.5 | 78 |
| 29 | Protecting Against Low‐Probability Disasters: The Role of Worry. Journal of Behavioral Decision Making, 2012, 25, 534-543. | 1.0 | 77 |
| 30 | Are Bigger Brains Smarter? Evidence From a Large-Scale Preregistered Study. Psychological Science, 2019, 30, 43-54. | 1.8 | 70 |
| 31 | Resource profile and user guide of the Polygenic Index Repository. Nature Human Behaviour, 2021, 5, 1744-1758. | 6.2 | 63 |
| 32 | Genetic instrumental variable regression: Explaining socioeconomic and health outcomes in nonexperimental data. Proceedings of the National Academy of Sciences of the United States of America, 2018, 115, E4970-E4979. | 3.3 | 59 |
| 33 | Mendelian randomization: the challenge of unobserved environmental confounds. International Journal of Epidemiology, 2019, 48, 665-671. | 0.9 | 56 |
| 34 | Associations between alcohol consumption and gray and white matter volumes in the UK Biobank. Nature Communications, 2022, 13, 1175. | 5.8 | 56 |
| 35 | Using nature to understand nurture. Science, 2018, 359, 386-387. | 6.0 | 49 |
| 36 | Unemployment benefits crowd out nascent entrepreneurial activity. Economics Letters, 2009, 103, 96-98. | 0.9 | 47 |

| # | ARTICLE | IF | CITATIONS |
|---|---------|----|-----------|
| 37 | Genome-wide association studies in economics and entrepreneurship research: promises and limitations. Small Business Economics, 2010, 35, 1-18. | 4.4 | 41 |
| 38 | The Molecular Genetic Architecture of Self-Employment. PLoS ONE, 2013, 8, e60542. | 1.1 | 41 |
| 39 | Distinct Loci in the *CHRNA5*/*CHRNA3*/*CHRNB4* Gene Cluster Are Associated With Onset of Regular Smoking. Genetic Epidemiology, 2013, 37, 846-859. | 0.6 | 32 |
| 40 | Multivariate GWAS of psychiatric disorders and their cardinal symptoms reveal two dimensions of cross-cutting genetic liabilities. Cell Genomics, 2022, 2, 100140. | 3.0 | 32 |
| 41 | Genetic Variation Associated with Differential Educational Attainment in Adults Has Anticipated Associations with School Performance in Children. PLoS ONE, 2014, 9, e100248. | 1.1 | 31 |
| 42 | Selfâ€employed But Looking: A Labour Market Experiment. Economica, 2015, 82, 137-161. | 0.9 | 27 |
| 43 | Serum testosterone levels in males are not associated with entrepreneurial behavior in two independent observational studies. Physiology and Behavior, 2013, 119, 110-114. | 1.0 | 26 |
| 44 | Candidate gene studies and the quest for the entrepreneurial gene. Small Business Economics, 2011, 37, 269-275. | 4.4 | 22 |
| 45 | The heritability of moral standards for everyday dishonesty. Journal of Economic Behavior and Organization, 2013, 93, 363-366. | 1.0 | 22 |
| 46 | Genome-wide association studies and the genetics of entrepreneurship. European Journal of Epidemiology, 2010, 25, 1-3. | 2.5 | 20 |
| 47 | Genetic underpinnings of risky behaviour relate to altered neuroanatomy. Nature Human Behaviour, 2021, 5, 787-794. | 6.2 | 20 |
| 48 | Joy Leads to Overconfidence, and a Simple Countermeasure. PLoS ONE, 2015, 10, e0143263. | 1.1 | 17 |
| 49 | Sadder but wiser: The effects of emotional states on ambiguity attitudes. Journal of Economic Psychology, 2016, 53, 67-82. | 1.1 | 12 |
| 50 | Excess Entry and Entrepreneurial Decisions: The Role of Overconfidence. , 2011, , 11-30. | | 11 |
| 51 | Human brain anatomy reflects separable genetic and environmental components of socioeconomic status. Science Advances, 2022, 8, eabm2923. | 4.7 | 11 |
| 52 | Entrepreneurship and organization design. European Economic Review, 2012, 56, 888-902. | 1.2 | 9 |
| 53 | Do Affective States Influence Risk Preferences?. Schmalenbach Business Review, 2016, 17, 309-335. | 0.9 | 8 |
| 54 | Multivariate analysis reveals shared genetic architecture of brain morphology and human behavior. Communications Biology, 2021, 4, 1180. | 2.0 | 7 |
