

Joseph F Debold

List of Publications by Citations

Source: <https://exaly.com/author-pdf/11615359/joseph-f-debold-publications-by-citations.pdf>

Version: 2024-04-23

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
73	Effects of coital stimulation upon behavior of the female rat. <i>Journal of Comparative and Physiological Psychology</i> , 1972 , 78, 400-8		225
72	Persistent escalation of alcohol drinking in C57BL/6J mice with intermittent access to 20% ethanol. <i>Alcoholism: Clinical and Experimental Research</i> , 2011 , 35, 1938-47	3.7	219
71	Effects of mounts without intromission upon the behavior of female rats during the onset of estrogen-induced heat. <i>Physiology and Behavior</i> , 1971 , 7, 643-5	3.5	164
70	The relationship between levels of exogenous hormones and the display of lordosis by the female rat. <i>Hormones and Behavior</i> , 1971 , 2, 287-297	3.7	164
69	Alcohol, allopregnanolone and aggression in mice. <i>Psychopharmacology</i> , 2001 , 153, 473-83	4.7	94
68	Aggression persists after ovariectomy in female rats. <i>Hormones and Behavior</i> , 1984 , 18, 177-90	3.7	81
67	GABA(B) receptor modulation of serotonin neurons in the dorsal raphe nucleus and escalation of aggression in mice. <i>Journal of Neuroscience</i> , 2010 , 30, 11771-80	6.6	80
66	Alcohol and "bursts" of aggressive behavior: ethological analysis of individual differences in rats. <i>Psychopharmacology</i> , 1992 , 107, 551-63	4.7	79
65	Escalated aggression as a reward: corticosterone and GABA(A) receptor positive modulators in mice. <i>Psychopharmacology</i> , 2005 , 182, 116-27	4.7	74
64	Sex differences in behavioral and neural cross-sensitization and escalated cocaine taking as a result of episodic social defeat stress in rats. <i>Psychopharmacology</i> , 2012 , 224, 179-88	4.7	73
63	Repeated alcohol: behavioral sensitization and alcohol-heightened aggression in mice. <i>Psychopharmacology</i> , 2002 , 160, 39-48	4.7	72
62	Social stress and CRF-dopamine interactions in the VTA: role in long-term escalation of cocaine self-administration. <i>Journal of Neuroscience</i> , 2014 , 34, 6659-67	6.6	71
61	Comparative effectiveness of testosterone, androstenedione and dihydrotestosterone in maintaining mating behavior in the castrated male hamster. <i>Endocrinology</i> , 1974 , 95, 1674-9	4.8	69
60	Prevention of social stress-escalated cocaine self-administration by CRF-R1 antagonist in the rat VTA. <i>Psychopharmacology</i> , 2011 , 218, 257-69	4.7	67
59	Fighting Females: Neural and Behavioral Consequences of Social Defeat Stress in Female Mice. <i>Biological Psychiatry</i> , 2019 , 86, 657-668	7.9	62
58	Blunted accumbal dopamine response to cocaine following chronic social stress in female rats: exploring a link between depression and drug abuse. <i>Psychopharmacology</i> , 2011 , 218, 271-9	4.7	61
57	The excitation and inhibition of sexual receptivity in female hamsters by progesterone: time and dose relationships, neural localization and mechanisms of action. <i>Endocrinology</i> , 1976 , 99, 1519-27	4.8	60

56	Social stress and escalated drug self-administration in mice I. Alcohol and corticosterone. <i>Psychopharmacology</i> , 2015 , 232, 991-1001	4.7	59
55	Escalated aggressive behavior: new pharmacotherapeutic approaches and opportunities. <i>Annals of the New York Academy of Sciences</i> , 2004 , 1036, 336-55	6.5	59
54	Episodic Social Stress-Escalated Cocaine Self-Administration: Role of Phasic and Tonic Corticotropin Releasing Factor in the Anterior and Posterior Ventral Tegmental Area. <i>Journal of Neuroscience</i> , 2016 , 36, 4093-105	6.6	57
53	Increased mesocorticolimbic dopamine during acute and repeated social defeat stress: modulation by corticotropin releasing factor receptors in the ventral tegmental area. <i>Psychopharmacology</i> , 2015 , 232, 4469-79	4.7	55
52	Alcohol in excess: CRF β receptors in the rat and mouse VTA and DRN. <i>Psychopharmacology</i> , 2013 , 225, 313-27	4.7	54
51	Facilitation of sexual receptivity by hypothalamic and midbrain implants of progesterone in female hamsters. <i>Physiology and Behavior</i> , 1989 , 46, 655-60	3.5	54
50	Sexual dimorphism in the hormonal control of aggressive behavior of rats. <i>Pharmacology Biochemistry and Behavior</i> , 1981 , 14 Suppl 1, 89-93	3.9	53
49	Aromatization and the induction of male sexual behavior in male, female, and androgenized female hamsters. <i>Hormones and Behavior</i> , 1978 , 11, 401-13	3.7	52
48	Facilitation of sexual receptivity in hamsters by simultaneous progesterone implants into the VMH and ventral mesencephalon. <i>Hormones and Behavior</i> , 1990 , 24, 139-51	3.7	51
47	Individual differences in anhedonic and accumbal dopamine responses to chronic social stress and their link to cocaine self-administration in female rats. <i>Psychopharmacology</i> , 2015 , 232, 825-34	4.7	49
46	Effects of repeated testing on sexual behavior of the female rat. <i>Journal of Comparative and Physiological Psychology</i> , 1973 , 85, 195-202		47
45	Maternal aggression in mice and rats towards male and female conspecifics. <i>Aggressive Behavior</i> , 1989 , 15, 443-453	2.8	46
44	Social stress-escalated intermittent alcohol drinking: modulation by CRF-R1 in the ventral tegmental area and accumbal dopamine in mice. <i>Psychopharmacology</i> , 2016 , 233, 681-90	4.7	43
43	Corticotropin Releasing Factor Binding Protein and CRF2 Receptors in the Ventral Tegmental Area: Modulation of Ethanol Binge Drinking in C57BL/6J Mice. <i>Alcoholism: Clinical and Experimental Research</i> , 2015 , 39, 1609-18	3.7	43
42	Testosterone modulates the effects of ethanol on male mouse aggression. <i>Psychopharmacology</i> , 1985 , 86, 286-90	4.7	41
41	Alcohol and violence: neuropeptidergic modulation of monoamine systems. <i>Annals of the New York Academy of Sciences</i> , 2015 , 1349, 96-118	6.5	40
40	Benzodiazepines and heightened aggressive behavior in rats: reduction by GABA(A)/alpha(1) receptor antagonists. <i>Psychopharmacology</i> , 2005 , 178, 232-40	4.7	38
39	GABA(A) receptors in the dorsal rapht nucleus of mice: escalation of aggression after alcohol consumption. <i>Psychopharmacology</i> , 2010 , 211, 467-77	4.7	37

38	Social stress and escalated drug self-administration in mice II. Cocaine and dopamine in the nucleus accumbens. <i>Psychopharmacology</i> , 2015 , 232, 1003-10	4-7	35
37	Heightened aggressive behavior by animals interacting with alcohol-treated conspecifics: studies with mice, rats and squirrel monkeys. <i>Pharmacology Biochemistry and Behavior</i> , 1984 , 20, 349-53	3-9	35
36	Differential sensitivity of mounting and lordosis control systems to early androgen treatment in male and female hamsters. <i>Hormones and Behavior</i> , 1975 , 6, 197-209	3-7	35
35	Aggression and increased glutamate in the mPFC during withdrawal from intermittent alcohol in outbred mice. <i>Psychopharmacology</i> , 2015 , 232, 2889-902	4-7	33
34	NMDA receptor antagonism: escalation of aggressive behavior in alcohol-drinking mice. <i>Psychopharmacology</i> , 2012 , 224, 167-77	4-7	33
33	Alcohol, GABAA-benzodiazepine receptor complex, and aggression. <i>Recent Developments in Alcoholism: an Official Publication of the American Medical Society on Alcoholism, and the Research Society on Alcoholism, and the National Council on Alcoholism</i> , 1997 , 13, 139-71		32
32	Role of alcohol consumption in escalation to violence. <i>Annals of the New York Academy of Sciences</i> , 2004 , 1036, 278-89	6-5	30
31	Persistent escalation of alcohol consumption by mice exposed to brief episodes of social defeat stress: suppression by CRF-R1 antagonism. <i>Psychopharmacology</i> , 2018 , 235, 1807-1820	4-7	28
30	Behavioral characterization of escalated aggression induced by GABA(B) receptor activation in the dorsal raphe nucleus. <i>Psychopharmacology</i> , 2012 , 224, 155-66	4-7	26
29	Ventral tegmental lesions impair sexual receptivity in female hamsters. <i>Brain Research Bulletin</i> , 1991 , 26, 877-83	3-9	23
28	Prevention of alcohol-heightened aggression by CRF-R1 antagonists in mice: critical role for DRN-PFC serotonin pathway. <i>Neuropsychopharmacology</i> , 2014 , 39, 2874-83	8-7	22
27	Prevention and reversal of social stress-escalated cocaine self-administration in mice by intra-VTA CRFR1 antagonism. <i>Psychopharmacology</i> , 2017 , 234, 2813-2821	4-7	21
26	CRF type 1 receptor antagonism in ventral tegmental area of adolescent rats during social defeat: prevention of escalated cocaine self-administration in adulthood and behavioral adaptations during adolescence. <i>Psychopharmacology</i> , 2016 , 233, 2727-36	4-7	20
25	The inhibitory actions of progesterone: effects on male and female sexual behavior of the hamster. <i>Hormones and Behavior</i> , 1978 , 11, 28-41	3-7	20
24	Escalated cocaine "binges" in rats: enduring effects of social defeat stress or intra-VTA CRF. <i>Psychopharmacology</i> , 2017 , 234, 2823-2836	4-7	19
23	Alcohol Effects on the Aggressive Behaviour of Squirrel Monkeys and Mice are Modulated by Testosterone. <i>Topics in the Neurosciences</i> , 1987 , 223-244		19
22	Chronic high-dose creatine has opposing effects on depression-related gene expression and behavior in intact and sex hormone-treated gonadectomized male and female rats. <i>Pharmacology Biochemistry and Behavior</i> , 2015 , 130, 22-33	3-9	17
21	Implants of testosterone into the septal forebrain activate aggressive behavior in male mice. <i>Aggressive Behavior</i> , 1990 , 16, 249-258	2-8	17

20	A Role for Prefrontal Cortical NMDA Receptors in Murine Alcohol-Heightened Aggression. <i>Neuropsychopharmacology</i> , 2018 , 43, 1224-1234	8.7	16
19	MK-801 infusions to the ventral tegmental area and ventromedial hypothalamus produce opposite effects on lordosis of hormone-primed rats. <i>Pharmacology Biochemistry and Behavior</i> , 2007 , 86, 377-85	3.9	16
18	Dissociation of μ -opioid receptor and CRF-R1 antagonist effects on escalated ethanol consumption and mPFC serotonin in C57BL/6J mice. <i>Addiction Biology</i> , 2016 , 21, 111-24	4.6	15
17	Site-specific inhibition of receptivity by intracranial anisomycin in hamsters. <i>Brain Research Bulletin</i> , 1988 , 21, 581-5	3.9	14
16	Persistent increase of I.V. cocaine self-administration in a subgroup of C57BL/6J male mice after social defeat stress. <i>Psychopharmacology</i> , 2019 , 236, 2027-2037	4.7	13
15	α -containing GABA(A) receptors: a requirement for midazolam-escalated aggression and social approach in mice. <i>Psychopharmacology</i> , 2015 , 232, 4359-69	4.7	13
14	The Urge to Fight: Persistent Escalation by Alcohol and Role of NMDA Receptors in Mice. <i>Frontiers in Behavioral Neuroscience</i> , 2018 , 12, 206	3.5	13
13	Sexual differentiation and the effects of alcohol on aggressive behavior in mice. <i>Pharmacology Biochemistry and Behavior</i> , 1990 , 35, 357-62	3.9	12
12	Protein synthesis in the medial preoptic area is important for the mating-induced decrease in estrus duration in hamsters. <i>Hormones and Behavior</i> , 1999 , 35, 177-85	3.7	11
11	Fos expression in female hamsters after various stimuli associated with mating. <i>Physiology and Behavior</i> , 2000 , 70, 557-66	3.5	10
10	Hormone-Drug Interactions and Their Influence on Aggressive Behavior 1983 , 313-347		10
9	Inhibition of sexual receptivity after intracranial cycloheximide infusions in female hamsters. <i>Brain Research Bulletin</i> , 1983 , 11, 633-6	3.9	9
8	Effects of midbrain lesions on lordosis and ultrasound production. <i>Physiology and Behavior</i> , 2004 , 82, 791-804	3.5	8
7	Maladaptive choices by defeated rats: link between rapid approach to social threat and escalated cocaine self-administration. <i>Psychopharmacology</i> , 2016 , 233, 3173-86	4.7	7
6	Effects of Gabra2 Point Mutations on Alcohol Intake: Increased Binge-Like and Blunted Chronic Drinking by Mice. <i>Alcoholism: Clinical and Experimental Research</i> , 2016 , 40, 2445-2455	3.7	7
5	The Role of Neurotransmitters in Violence and Aggression 2017 , 1-13		6
4	Intravenous administration of progesterone and the onset of receptivity in female hamsters. <i>Physiology and Behavior</i> , 1991 , 49, 679-83	3.5	6
3	Modification of nuclear retention of [3H]estradiol by cells of the hypothalamus as a function of early hormone experience. <i>Brain Research</i> , 1978 , 159, 416-20	3.7	6

- 2 6-hydroxydopamine lesions enhance progesterone-facilitated lordosis of rats and hamsters, independent of effects on motor behavior. *Physiology and Behavior*, **2010**, 99, 218-24 3.5 5
- 1 Direct CRFR1 antagonism within the VTA prevents the induction and expression of neural cross-sensitization to cocaine caused by social defeat stress. *FASEB Journal*, **2013**, 27, 659.9 0.9
