| # | ARTICLE                                                                                                                                                                                                                                                 | IF  | CITATIONS |
|---|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1 | Adenosine Monophosphate-Activated Kinase and Its Key Role in Catabolism: Structure, Regulation, Biological Activity, and Pharmacological Activation. <i>Molecular Pharmacology</i> , 2015, 87, 363-377.                                                 | 2.3 | 74        |
| 2 | Gene of the month: <i>BECN1</i> . <i>Journal of Clinical Pathology</i> , 2014, 67, 656-660.                                                                                                                                                             | 2.0 | 57        |
| 3 | AMP kinase ( <i>PRKAA1</i> ). <i>Journal of Clinical Pathology</i> , 2014, 67, 758-763.                                                                                                                                                                 | 2.0 | 51        |
| 4 | The Anticancer Agent, Di-2-Pyridylketone 4,4-Dimethyl-3-Thiosemicarbazone (Dp44mT), Up-Regulates the AMPK-Dependent Energy Homeostasis Pathway in Cancer Cells. <i>Biochimica Et Biophysica Acta - Molecular Cell Research</i> , 2016, 1863, 2916-2933. | 4.1 | 36        |
| 5 | IRON METABOLISM AND AUTOPHAGY: A POORLY EXPLORED RELATIONSHIP THAT HAS IMPORTANT CONSEQUENCES FOR HEALTH AND DISEASE. <i>Nagoya Journal of Medical Science</i> , 2015, 77, 1-6.                                                                         | 0.3 | 17        |
| 6 | Targeting autophagy in antitumor agent design: furthering the "lysosomal love" strategy. <i>Future Medicinal Chemistry</i> , 2016, 8, 727-729.                                                                                                          | 2.3 | 0         |
