#	Article	IF	CITATIONS
1	Increased postflight carotid artery stiffness and inflight insulin resistance resulting from 6-mo spaceflight in male and female astronauts. American Journal of Physiology - Heart and Circulatory Physiology, 2016, 310, H628-H638.	3.2	145
2	Exercise training regulates SOD-1 and oxidative stress in porcine aortic endothelium. American Journal of Physiology - Heart and Circulatory Physiology, 2003, 284, H1378-H1387.	3.2	128
3	AMPK expression and phosphorylation are increased in rodent muscle after chronic leptin treatment. American Journal of Physiology - Endocrinology and Metabolism, 2003, 284, E648-E654.	3.5	110
4	Vascular Nitric Oxide and Oxidative Stress: Determinants of Endothelial Adaptations to Cardiovascular Disease and to Physical Activity. Applied Physiology, Nutrition, and Metabolism, 2005, 30, 442-474.	1.7	100
5	Encapsulation-stucturing of edible oil attenuates acute elevation of blood lipids and insulin in humans. Soft Matter, 2007, 3, 183-187.	2.7	99
6	Exercise training improves aortic endothelium-dependent vasorelaxation and determinants of nitric oxide bioavailability in spontaneously hypertensive rats. Journal of Applied Physiology, 2004, 96, 2088-2096.	2.5	97
7	Plasma glutathione peroxidase in healthy young adults: influence of gender and physical activity. Clinical Biochemistry, 2003, 36, 345-351.	1.9	96
8	SOD-1 expression in pig coronary arterioles is increased by exercise training. American Journal of Physiology - Heart and Circulatory Physiology, 2000, 279, H2068-H2076.	3.2	78
9	Short-term exercise training increases ACh-induced relaxation and eNOS protein in porcine pulmonary arteries. Journal of Applied Physiology, 2001, 90, 1102-1110.	2.5	74
10	Flow regulation of ecNOS and Cu/Zn SOD mRNA expression in porcine coronary arterioles. American Journal of Physiology - Heart and Circulatory Physiology, 1999, 276, H1058-H1063.	3.2	61
11	Gender, exercise training, and eNOS expression in porcine skeletal muscle arteries. Journal of Applied Physiology, 2003, 95, 250-264.	2.5	60
12	Exercise preserves endothelium-dependent relaxation in coronary arteries of hypercholesterolemic male pigs. Journal of Applied Physiology, 2004, 96, 1114-1126.	2.5	59
13	AMP-activated protein kinase activator AICAR acutely lowers blood pressure and relaxes isolated resistance arteries of hypertensive rats. Journal of Hypertension, 2012, 30, 725-733.	0.5	58
14	Myoadenylate deaminase deficiency does not affect muscle anaplerosis during exhaustive exercise in humans. Journal of Physiology, 2001, 533, 881-889.	2.9	56
15	Vascular biology of angiotensin and the impact of physical activity. Applied Physiology, Nutrition and Metabolism, 2008, 33, 162-171.	1.9	55
16	Hindlimb unweighting decreases endothelium-dependent dilation and eNOS expression in soleus not gastrocnemius. Journal of Applied Physiology, 2001, 91, 1091-1098.	2.5	54
17	Endothelial function in coronary arterioles from pigs with early-stage coronary disease induced by high-fat, high-cholesterol diet: effect of exercise. Journal of Applied Physiology, 2004, 97, 1159-1168.	2.5	54
18	Chronic resveratrol enhances endothelium-dependent relaxation but does not alter eNOS levels in aorta of spontaneously hypertensive rats. Experimental Biology and Medicine, 2007, 232, 814-22.	2.4	50

JAMES W E RUSH

#	Article	IF	CITATIONS
19	Nitric oxide and coronary vascular endothelium adaptations in hypertension. Vascular Health and Risk Management, 2009, 5, 1075.	2.3	44
20	Endothelium-dependent vasorelaxation to the AMPK activator AICAR is enhanced in aorta from hypertensive rats and is NO and EDCF dependent. American Journal of Physiology - Heart and Circulatory Physiology, 2011, 300, H64-H75.	3.2	44
21	Short-term training enhances endothelium-dependent dilation of coronary arteries, not arterioles. Journal of Applied Physiology, 2003, 94, 234-244.	2.5	43
22	Skeletal muscle glycogen phosphorylase <i>a</i> kinetics: effects of adenine nucleotides and caffeine. Journal of Applied Physiology, 2001, 91, 2071-2078.	2.5	40
23	Autophagic Signaling and Proteolytic Enzyme Activity in Cardiac and Skeletal Muscle of Spontaneously Hypertensive Rats following Chronic Aerobic Exercise. PLoS ONE, 2015, 10, e0119382.	2.5	39
24	Exercise attenuates the effects of hypercholesterolemia on endothelium-dependent relaxation in coronary arteries from adult female pigs. Journal of Applied Physiology, 2004, 96, 1105-1113.	2.5	35
25	Low-intensity resistance training attenuates dexamethasone-induced atrophy in the flexor hallucis longus muscle. Journal of Steroid Biochemistry and Molecular Biology, 2014, 143, 357-364.	2.5	33
26	RhoA-Rho kinase signaling mediates endothelium- and endoperoxide-dependent contractile activities characteristic of hypertensive vascular dysfunction. American Journal of Physiology - Heart and Circulatory Physiology, 2010, 298, H1391-H1405.	3.2	30
27	Elevated skeletal muscle apoptotic signaling following glutathione depletion. Apoptosis: an International Journal on Programmed Cell Death, 2012, 17, 48-60.	4.9	30
28	Increased DNA fragmentation and altered apoptotic protein levels in skeletal muscle of spontaneously hypertensive rats. Journal of Applied Physiology, 2006, 101, 1149-1161.	2.5	29
29	Highâ€intensity resistance training attenuates dexamethasoneâ€induced muscle atrophy. Muscle and Nerve, 2016, 53, 779-788.	2.2	29
30	Molecular and kinetic alterations of muscle AMP deaminase during chronic creatine depletion. American Journal of Physiology - Cell Physiology, 1998, 274, C465-C471.	4.6	27
31	Fasting triacylglycerol status, but not polyunsaturated/saturated fatty acid ratio, influences the postprandial response to a series of oral fat tolerance tests. Journal of Nutritional Biochemistry, 2009, 20, 694-704.	4.2	27
32	Glutathione depletion in vivo enhances contraction and attenuates endothelium-dependent relaxation of isolated rat aorta. Free Radical Biology and Medicine, 2006, 40, 670-678.	2.9	26
33	Decreased DNA fragmentation and apoptotic signaling in soleus muscle of hypertensive rats following 6 weeks of treadmill training. Journal of Applied Physiology, 2012, 113, 1048-1057.	2.5	26
34	Time-course changes of catabolic proteins following muscle atrophy induced by dexamethasone. Steroids, 2016, 107, 30-36.	1.8	24
35	Dietary docosahexaenoic acid supplementation reduces SERCA Ca2+ transport efficiency in rat skeletal muscle. Chemistry and Physics of Lipids, 2015, 187, 56-61.	3.2	22
36	Cyclooxygenase and thromboxane/prostaglandin receptor contribute to aortic endothelium-dependent dysfunction in aging female spontaneously hypertensive rats. Journal of Applied Physiology, 2009, 107, 1059-1067.	2.5	20

JAMES W E RUSH

#	Article	IF	CITATIONS
37	Controlled Release of Food Lipids Using Monoglyceride Gel Phases Regulates Lipid and Insulin Metabolism in Humans. Food Biophysics, 2008, 3, 241-245.	3.0	18
38	Evidence for a pro-apoptotic phenotype in skeletal muscle of hypertensive rats. Biochemical and Biophysical Research Communications, 2008, 368, 168-174.	2.1	16
39	Nitric oxide, oxidative stress and vascular endothelium in health and hypertension. Clinical Hemorheology and Microcirculation, 2007, 37, 185-92.	1.7	16
40	Exercise Does Not Attenuate Early CAD Progression in a Pig Model. Medicine and Science in Sports and Exercise, 2012, 44, 27-38.	0.4	11
41	Influence of training status and eNOS haplotypes on plasma nitrite concentrations in normotensive older adults: a hypothesis-generating study. Aging Clinical and Experimental Research, 2014, 26, 591-598.	2.9	10
42	Impaired hemodynamics and endothelial vasomotor function via endoperoxide-mediated vasoconstriction in the carotid artery of spontaneously hypertensive rats. American Journal of Physiology - Heart and Circulatory Physiology, 2009, 296, H1038-H1047.	3.2	8
43	The effects of buthionine sulfoximine treatment on diaphragm contractility and SERCA pump function in adult and middle aged rats. Physiological Reports, 2015, 3, e12547.	1.7	8
44	Effects of Glutathione-depleting Drug Buthionine Sulfoximine and Aging on Activity of Endothelium-derived Relaxing and Contracting Factors in Carotid Artery of Sprague–Dawley Rats. Journal of Cardiovascular Pharmacology, 2011, 58, 272-283.	1.9	7
45	Chronic in vivo or acute in vitro resveratrol attenuates endothelium-dependent cyclooxygenase-mediated contractile signaling in hypertensive rat carotid artery. Journal of Applied Physiology, 2016, 120, 1141-1150.	2.5	4
46	Exercising an option to prevent age related decline of vascular BH <sub>4</sub> and uncoupling of eNOS. Journal of Physiology, 2009, 587, 3755-3755.	2.9	2
47	Markers of Cardiovascular Risk and Metabolism Assessed on Multiple Baseline Occasions and in Response to a Single Fatty Meal in Healthy Young Adults. Food Digestion, 2013, 4, 49-57.	0.9	2
48	Glutathione enhances endothelium-mediated control of coronary vascular resistance via a ROS- and NO intermediate-dependent mechanism. Journal of Applied Physiology, 2012, 113, 246-254.	2.5	1
49	Suppression of phenylephrine contraction by AMPK inhibition in isolated carotid artery from normotensive WKY and hypertensive SHR rats. FASEB Journal, 2013, 27, lb662.	0.5	0
