#	ARTICLE	IF	CITATIONS
1	The cryptic plasmid is more important for Chlamydia muridarum to colonize the mouse gastrointestinal tract than to infect the genital tract. PLoS ONE, 2017, 12, e0177691.	2.5	28
2	Intravenous Inoculation with Chlamydia muridarum Leads to a Long-Lasting Infection Restricted to the Gastrointestinal Tract. Infection and Immunity, 2016, 84, 2382-2388.	2.2	38
3	Intrauterine Infection with Plasmid-Free Chlamydia muridarum Reveals a Critical Role of the Plasmid in Chlamydial Ascension and Establishes a Model for Evaluating Plasmid-Independent Pathogenicity. Infection and Immunity, 2015, 83, 2583-2592.	2.2	17
4	Plasmid-Encoded Pgp3 Is a Major Virulence Factor for Chlamydia muridarum To Induce Hydrosalpinx in Mice. Infection and Immunity, 2014, 82, 5327-5335.	2.2	111
5	Chlamydial Induction of Hydrosalpinx in 11 Strains of Mice Reveals Multiple Host Mechanisms for Preventing Upper Genital Tract Pathology. PLoS ONE, 2014, 9, e95076.	2.5	70
6	Reduced Live Organism Recovery and Lack of Hydrosalpinx in Mice Infected with Plasmid-Free Chlamydia muridarum. Infection and Immunity, 2014, 82, 983-992.	2.2	75
7	Lack of Long-Lasting Hydrosalpinx in A/J Mice Correlates with Rapid but Transient Chlamydial Ascension and Neutrophil Recruitment in the Oviduct following Intravaginal Inoculation with Chlamydia muridarum. Infection and Immunity, 2014, 82, 2688-2696.	2.2	38
8	Transformation of Chlamydia muridarum Reveals a Role for Pgp5 in Suppression of Plasmid-Dependent Gene Expression. Journal of Bacteriology, 2014, 196, 989-998.	2.2	71
9	Induction of protective immunity against Chlamydia muridarum intracervical infection in DBA/1j mice. Vaccine, 2014, 32, 1407-1413.	3.8	20
10	Oviduct Infection and Hydrosalpinx in DBA1/j Mice Is Induced by Intracervical but Not Intravaginal Inoculation with Chlamydia muridarum. PLoS ONE, 2013, 8, e71649.	2.5	47
