#	Paper	IF	Citations
9	Exercise training for patients with heart failure: a systematic review of factors that improve mortality and morbidity. <i>American Journal of Medicine</i> , 2004 , 116, 693-706	2.4	300
8	Exercise training in systolic and diastolic dysfunction: effects on cardiac function, functional capacity, and quality of life. <i>American Heart Journal</i> , 2007 , 153, 530-6	4.9	115
7	Determinants of functional capacity in patients with chronic heart failure: role of filling pressure and systolic and diastolic function. <i>American Heart Journal</i> , 2005 , 149, 152-8	4.9	64
6	Exercise & Sports Science Australia Position Statement on exercise training and chronic heart failure. <i>Journal of Science and Medicine in Sport</i> , 2010 , 13, 288-94	4.4	47
5	Predictors of a sustained response to exercise training in patients with chronic heart failure: a telemonitoring study. <i>American Heart Journal</i> , 2005 , 150, 1240-7	4.9	47
4	Exercise training for chronic heart failure (ExTraMATCH II): protocol for an individual participant data meta-analysis. <i>International Journal of Cardiology</i> , 2014 , 174, 683-7	3.2	21
3	Cardiac contributions to exercise training responses in patients with chronic heart failure: a strain imaging study. <i>Echocardiography</i> , 2006 , 23, 376-82	1.5	16
2	Exercise Training for Heart Failure Patients with and without Systolic Dysfunction: An Evidence-Based Analysis of How Patients Benefit. <i>Cardiology Research and Practice</i> , 2010 , 2011,	1.9	14
1	Exercise training programmes improve survival and delay hospital admission in people with chronic heart failure. <i>Evidence-Based Healthcare and Public Health</i> , 2004 , 8, 200-201
