#	ARTICLE	IF	CITATIONS
1	High-Frequency Deep Brain Stimulation of the Nucleus Accumbens Region Suppresses Neuronal Activity and Selectively Modulates Afferent Drive in Rat Orbitofrontal Cortex <i>In Vivo</i> . Journal of Neuroscience, 2007, 27, 12601-12610.	3.6	177
2	Nucleus Accumbens Deep Brain Stimulation Produces Region-Specific Alterations in Local Field Potential Oscillations and Evoked Responses <i>In Vivo</i> . Journal of Neuroscience, 2009, 29, 5354-5363.	3.6	128
3	Persistent Cocaine-Induced Reversal Learning Deficits Are Associated with Altered Limbic Cortico-Striatal Local Field Potential Synchronization. Journal of Neuroscience, 2013, 33, 17469-17482.	3.6	37
4	Neuronal Gap Junctions: Expression, Function, And Implications For Behavior. International Review of Neurobiology, 2006, 73, 125-151.	2.0	31
5	Amphetamine withdrawal produces region-specific and time-dependent changes in connexin36 expression in rat brain. Synapse, 2005, 56, 39-44.	1.2	24
6	Extended cocaine self-administration and deprivation produces region-specific and time-dependent changes in connexin36 expression in rat brain. Synapse, 2005, 58, 141-150.	1.2	22
7	Time and Frequency-Dependent Modulation of Local Field Potential Synchronization by Deep Brain Stimulation. PLoS ONE, 2014, 9, e102576.	2.5	20
8	A single evoked afterdischarge produces rapid time-dependent changes in connexin36 protein expression in adult rat dorsal hippocampus. Neuroscience Letters, 2006, 405, 84-88.	2.1	15
9	Spatiotemporal dynamics of cortical perfusion in response to thalamic deep brain stimulation. NeuroImage, 2016, 126, 131-139.	4.2	14
