

Hkan Hjalmarsson

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/11778587/hakan-hjalmarsson-publications-by-year.pdf>

Version: 2024-04-26

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
99	Bayes Control of Hammerstein Systems. <i>IFAC-PapersOnLine</i> , 2021 , 54, 755-760	0.7	
98	Identification of stochastic nonlinear models using optimal estimating functions. <i>Automatica</i> , 2020 , 119, 109055	5.7	5
97	Learning Robust LQ-Controllers Using Application Oriented Exploration 2020 , 4, 19-24		8
96	Modeling and identification of uncertain-input systems. <i>Automatica</i> , 2019 , 105, 130-141	5.7	6
95	Linear prediction error methods for stochastic nonlinear models. <i>Automatica</i> , 2019 , 105, 49-63	5.7	6
94	Bayesian nonparametric identification of Wiener systems. <i>Automatica</i> , 2019 , 108, 108480	5.7	11
93	An empirical Bayes approach to identification of modules in dynamic networks. <i>Automatica</i> , 2018 , 91, 144-151	5.7	20
92	Application of a Linear PEM Estimator to a Stochastic Wiener-Hammerstein Benchmark Problem. <i>IFAC-PapersOnLine</i> , 2018 , 51, 784-789	0.7	2
91	Covariance analysis in SISO linear systems identification. <i>Automatica</i> , 2017 , 77, 82-92	5.7	1
90	Application-Oriented Input Design in System Identification: Optimal Input Design for Control [Applications of Control]. <i>IEEE Control Systems</i> , 2017 , 37, 31-56	2.9	20
89	A nonparametric kernel-based approach to Hammerstein system identification. <i>Automatica</i> , 2017 , 85, 234-247	5.7	20
88	Adaptive Input Design for LTI Systems. <i>IEEE Transactions on Automatic Control</i> , 2017 , 62, 2390-2405	5.9	2
87	Variational Bayes identification of acyclic dynamic networks * *This work was supported by the Swedish Research Council under contracts 2015-05285 and 2016-06079, and by the European Research Council under the advanced grants LEARN, contract 267381, and SYSIDNET, contract 694504. <i>IFAC-PapersOnLine</i> , 2017 , 50, 10556-10561	0.7	1
86	Generation of signals with specified second-order properties for constrained systems. <i>International Journal of Adaptive Control and Signal Processing</i> , 2016 , 30, 456-472	2.8	2
85	Identification of modules in dynamic networks: An empirical Bayes approach 2016 ,		5
84	An application-oriented approach to dual control with excitation for closed-loop identification. <i>European Journal of Control</i> , 2016 , 29, 1-16	2.5	12
83	A graph theoretical approach to input design for identification of nonlinear dynamical models. <i>Automatica</i> , 2015 , 51, 233-242	5.7	14

82	Experimental evaluation of model predictive control with excitation (MPC-X) on an industrial depropanizer. <i>Journal of Process Control</i> , 2015 , 31, 1-16	3.9	31
81	A Multi-Time-Scale Generalization of Recursive Identification Algorithm for ARMAX Systems. <i>IEEE Transactions on Automatic Control</i> , 2015 , 60, 2242-2247	5.9	3
80	Uncertainty in system identification: learning from the theory of risk. <i>IFAC-PapersOnLine</i> , 2015 , 48, 1053-1058	1.05	2
79	On the variance analysis of identified linear MIMO models 2015 ,		2
78	Iterative Data-Driven \mathcal{H}_{∞} Norm Estimation of Multivariable Systems With Application to Robust Active Vibration Isolation. <i>IEEE Transactions on Control Systems Technology</i> , 2014 , 22, 2247-2260	4.8	30
77	Input Signal Generation for Constrained Multiple-Input Multiple-Output Systems. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2014 , 47, 1410-1415		3
76	Applications oriented input design for closed-loop system identification: a graph-theory approach 2014 ,		1
75	Application set approximation in optimal input design for model predictive control 2014 ,		7
74	Input design as a tool to improve the convergence of PEM. <i>Automatica</i> , 2013 , 49, 3282-3291	5.7	8
73	2013 ,		8
72	Training sequence design for MIMO channels: an application-oriented approach. <i>Eurasip Journal on Wireless Communications and Networking</i> , 2013 , 2013,	3.2	7
71	Model predictive control with integrated experiment design for output error systems 2013 ,		17
70	Robust and adaptive excitation signal generation for input and output constrained systems 2013 ,		3
69	Analyzing iterations in identification with application to nonparametric H_{∞} norm estimation. <i>Automatica</i> , 2012 , 48, 2776-2790	5.7	19
68	A Chernoff convexification for chance constrained MIMO training sequence design 2012 ,		1
67	On the Performance of Optimal Input Signals for Frequency Response Estimation. <i>IEEE Transactions on Automatic Control</i> , 2012 , 57, 766-771	5.9	8
66	Order and structural dependence selection of LPV-ARX models revisited 2012 ,		3
65	A Tutorial on Applications-Oriented Optimal Experiment Design. <i>Lecture Notes in Control and Information Sciences</i> , 2012 , 149-164	0.5	2

64	Mean-squared error experiment design for linear regression models*. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2012 , 45, 1629-1634		2
63	Application-Oriented Finite Sample Experiment Design: A Semidefinite Relaxation Approach*. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2012 , 45, 1635-1640		4
62	Robust Experiment Design for System Identification via Semi-Infinite Programming Techniques*. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2012 , 45, 680-685		
61	System Identification for Automotive Systems: Opportunities and Challenges. <i>Lecture Notes in Control and Information Sciences</i> , 2012 , 1-10	0.5	1
60	Four Encounters with System Identification. <i>European Journal of Control</i> , 2011 , 17, 449-471	2.5	41
59	How to Make Bias and Variance Errors Insensitive to System and Model Complexity in Identification. <i>IEEE Transactions on Automatic Control</i> , 2011 , 56, 100-112	5.9	12
58	A Geometric Approach to Variance Analysis in System Identification. <i>IEEE Transactions on Automatic Control</i> , 2011 , 56, 983-997	5.9	17
57	Analyzing Iterations in Identification with Application to Nonparametric Norm Estimation. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2011 , 44, 9972-9977		
56	MPC oriented experiment design. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2011 , 44, 9966-9971		9
55	A design algorithm using external perturbation to improve Iterative Feedback Tuning convergence. <i>Automatica</i> , 2011 , 47, 2665-2670	5.7	15
54	The cost of complexity in system identification: The Output Error case. <i>Automatica</i> , 2011 , 47, 1938-1948	5.7	4
53	On the accuracy in errors-in-variables identification compared to prediction-error identification. <i>Automatica</i> , 2011 , 47, 2704-2712	5.7	11
52	Conditions when minimum variance control is the optimal experiment for identifying a minimum variance controller. <i>Automatica</i> , 2011 , 47, 578-583	5.7	11
51	An adaptive method for consistent estimation of real-valued non-minimum phase zeros in stable LTI systems. <i>Automatica</i> , 2011 , 47, 1388-1398	5.7	10
50	Chance constrained input design 2011 ,		10
49	Predictor-based multivariable closed-loop system identification of the EXTRAP T2R reversed field pinch external plasma response. <i>Plasma Physics and Controlled Fusion</i> , 2011 , 53, 084003	2	6
48	Input design using cylindrical algebraic decomposition 2011 ,		2
47	On optimal input design in system identification for model predictive control 2011 ,		10

46	On optimal input design in system identification for control 2010 ,		18
45	The Cost of Complexity in System Identification: Frequency Function Estimation of Finite Impulse Response Systems. <i>IEEE Transactions on Automatic Control</i> , 2010 , 55, 2298-2309	5.9	10
44	Identification of nonlinear systems using misspecified predictors 2010 ,		4
43	Non-parametric methods for . <i>Automatica</i> , 2010 , 46, 1376-1381	5.7	33
42	Variance-error quantification for identified poles and zeros. <i>Automatica</i> , 2009 , 45, 2512-2525	5.7	12
41	Identification of ARX systems with non-stationary inputs Asymptotic analysis with application to adaptive input design. <i>Automatica</i> , 2009 , 45, 623-633	5.7	43
40	Variance results for identification of cascade systems. <i>Automatica</i> , 2009 , 45, 1443-1448	5.7	22
39	System Identification of Complex and Structured Systems. <i>European Journal of Control</i> , 2009 , 15, 275-310.5	5.5	98
38	A System, Signals and Identification Toolbox in Mathematica with Symbolic Capabilities. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2009 , 42, 747-751		3
37	Consistent estimation of real NMP zeros in stable LTI systems of arbitrary complexity. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2009 , 42, 922-927		1
36	Data-Driven Methods for L2-Gain Estimation. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2009 , 42, 1597-1602		6
35	Improving convergence of Iterative Feedback Tuning using optimal external perturbations 2008 ,		2
34	The Cost of Complexity in Identification of FIR Systems. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2008 , 41, 11451-11456		5
33	Identification and control: Joint input design and H _∞ state feedback with ellipsoidal parametric uncertainty via LMIs. <i>Automatica</i> , 2008 , 44, 543-551	5.7	23
32	Identification for control of multivariable systems: Controller validation and experiment design via LMIs. <i>Automatica</i> , 2008 , 44, 3070-3078	5.7	40
31	Closed loop experiment design for linear time invariant dynamical systems via LMIs. <i>Automatica</i> , 2008 , 44, 623-636	5.7	41
30	Adaptive input design for ARX systems 2007 ,		3
29	Optimal Input Design for Identification of Non-linear Systems: Learning From the Linear Case. <i>Proceedings of the American Control Conference</i> , 2007 ,	1.2	30

28	GAIN ESTIMATION FOR HAMMERSTEIN SYSTEMS. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2006 , 39, 784-789		6
27	MIXED H ₂ AND H _∞ INPUT DESIGN FOR MULTIVARIABLE SYSTEMS. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2006 , 39, 1335-1340		2
26	ON OPTIMAL INPUT DESIGN IN SYSTEM IDENTIFICATION ¹ . <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2006 , 39, 499-504		1
25	ON SOME ROBUSTNESS ISSUES IN INPUT DESIGN. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2006 , 39, 511-516		8
24	ROBUST INPUT DESIGN USING SUM OF SQUARES CONSTRAINTS. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2006 , 39, 1352-1357		9
23	Least-squares estimation of a class of frequency functions: A finite sample variance expression. <i>Automatica</i> , 2006 , 42, 589-600	5-7	19
22	OPTIMAL EXPERIMENT DESIGN IN CLOSED LOOP. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2005 , 38, 488-493		10
21	From experiment design to closed-loop control. <i>Automatica</i> , 2005 , 41, 393-438	5-7	314
20	On the frequency domain accuracy of closed-loop estimates. <i>Automatica</i> , 2005 , 41, 1109-1122	5-7	22
19	Gradient approximations in iterative feedback tuning for multivariable processes. <i>International Journal of Adaptive Control and Signal Processing</i> , 2004 , 18, 665-681	2.8	23
18	On Direct Identification of Physical Parameters in Non-Linear Models. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2004 , 37, 375-380		4
17	From experiments to closed loop control. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2003 , 36, 1-14		4
16	Using a sufficient condition to analyze the interplay between identification and control. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2003 , 36, 45-50		4
15	Iterative feedback tuning—An overview. <i>International Journal of Adaptive Control and Signal Processing</i> , 2002 , 16, 373-395	2.8	275
14	RANDOMIZED ITERATIVE FEEDBACK TUNING. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2002 , 35, 361-366		3
13	IDENTIFICATION OF PERFORMANCE LIMITATIONS IN CONTROL USING ARX-MODELS. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2002 , 35, 283-288		2
12	ON METHODS FOR GRADIENT ESTIMATION IN IFT FOR MIMO SYSTEMS. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2002 , 35, 379-384		3
11	A GENERAL FRAMEWORK FOR ITERATIVE LEARNING CONTROL. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2002 , 35, 387-392		4

10	Identification of performance limitations in control 2001 ,			1
9	Optimal Input Design Using Linear Matrix Inequalities. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2000 , 33, 1085-1090			12
8	Spectral Based Parameter Estimation in Nonlinear Stochastic Models. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 2000 , 33, 911-916			
7	Efficient tuning of linear multivariable controllers using iterative feedback tuning. <i>International Journal of Adaptive Control and Signal Processing</i> , 1999 , 13, 553-572	2.8		64
6	Iterative Feedback Tuning. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 1998 , 31, 101-108			3
5	Frequency Domain Expressions of the Accuracy of a Model-Free Control Design Scheme. <i>IFAC Postprint Volumes IPPV / International Federation of Automatic Control</i> , 1997 , 30, 149-154			2
4	For model-based control design, closed-loop identification gives better performance. <i>Automatica</i> , 1996 , 32, 1659-1673	5.7		157
3	Model-free Tuning of a Robust Regulator for a Flexible Transmission System. <i>European Journal of Control</i> , 1995 , 1, 148-156	2.5		49
2	Nonlinear black-box models in system identification: Mathematical foundations. <i>Automatica</i> , 1995 , 31, 1725-1750	5.7		257
1	Nonlinear black-box modeling in system identification: a unified overview. <i>Automatica</i> , 1995 , 31, 1691-1724	5.7		1340
