#	ARTICLE	IF	CITATIONS
1	Sparse vector heterogeneous autoregressive model with nonconvex penalties. <i>Communications for Statistical Applications and Methods</i> , 2022, 29, 733-744.	0.3	0
2	Sparse vector heterogeneous autoregressive model with nonconvex penalties. <i>Communications for Statistical Applications and Methods</i> , 2022, 29, 53-64.	0.3	1
3	Sparse vector heterogeneous autoregressive modeling for realized volatility. <i>Journal of the Korean Statistical Society</i> , 2021, 50, 495-510.	0.4	6
4	Two sample tests for high-dimensional autocovariances. <i>Computational Statistics and Data Analysis</i> , 2021, 153, 107067.	1.2	3
5	Robust test for structural instability in dynamic factor models. <i>Annals of the Institute of Statistical Mathematics</i> , 2021, 73, 821-853.	0.8	1
6	Factor-augmented HAR model improves realized volatility forecasting. <i>Applied Economics Letters</i> , 2020, 27, 1002-1009.	1.8	3
7	Asymptotics of bivariate local Whittle estimators with applications to fractal connectivity. <i>Journal of Statistical Planning and Inference</i> , 2020, 205, 245-268.	0.6	7
8	Block wild bootstrap-based CUSUM tests robust to high persistence and misspecification. <i>Computational Statistics and Data Analysis</i> , 2020, 150, 106996.	1.2	3
9	Detecting structural breaks in realized volatility. <i>Computational Statistics and Data Analysis</i> , 2019, 134, 58-75.	1.2	6
10	Estimation of long memory parameter in nonparametric regression. <i>Communications for Statistical Applications and Methods</i> , 2019, 26, 611-622.	0.3	0
11	Periodic dynamic factor models: estimation approaches and applications. <i>Electronic Journal of Statistics</i> , 2018, 12, .	0.7	7
12	Neural network heterogeneous autoregressive models for realized volatility. <i>Communications for Statistical Applications and Methods</i> , 2018, 25, 659-671.	0.3	1
13	ARMA Cholesky factor models for the covariance matrix of linear models. <i>Computational Statistics and Data Analysis</i> , 2017, 115, 267-280.	1.2	10
14	Sparse seasonal and periodic vector autoregressive modeling. <i>Computational Statistics and Data Analysis</i> , 2017, 106, 103-126.	1.2	9
15	Threshold estimation for the composite lognormal-GPD models. <i>Ungyong T'onggye Yon'gu = the Korean Journal of Applied Statistics</i> , 2016, 29, 807-822.	0.1	2
16	A piecewise polynomial trend against long range dependence. <i>Journal of the Korean Statistical Society</i> , 2015, 44, 457-468.	0.4	2
17	Tests for Volatility Shifts in Garch Against Long-Range Dependence. <i>Journal of Time Series Analysis</i> , 2015, 36, 127-153.	1.2	10
18	Can Markov switching model generate long memory?. <i>Economics Letters</i> , 2014, 124, 117-121.	1.9	3

#	ARTICLE	IF	CITATIONS
19	Quasi-maximum likelihood estimation for multiple volatility shifts. <i>Statistics and Probability Letters</i> , 2014, 86, 50-60.	0.7	0
20	On integral representations of operator fractional Brownian fields. <i>Statistics and Probability Letters</i> , 2014, 92, 190-198.	0.7	8
21	On distinguishing multiple changes in mean and long-range dependence using local Whittle estimation. <i>Electronic Journal of Statistics</i> , 2014, 8, .	0.7	10
22	The sparse vector autoregressive model for PM10 in Korea. <i>Journal of the Korean Data and Information Science Society</i> , 2014, 25, 807-817.	0.2	0
23	Time Series Modelling of Air Quality in Korea: Long Range Dependence or Changes in Mean?. <i>Ungyong T'onggye Yon'gu = the Korean Journal of Applied Statistics</i> , 2013, 26, 987-998.	0.1	3
24	Statistical tests for a single change in mean against long-range dependence. <i>Journal of Time Series Analysis</i> , 2012, 33, 131-151.	1.2	16
25	Estimation of parameters in heavy-tailed distribution when its second order tail parameter is known. <i>Journal of Statistical Planning and Inference</i> , 2010, 140, 1957-1967.	0.6	6
26	LONG RANGE DEPENDENCE, UNBALANCED HAAR WAVELET TRANSFORMATION AND CHANGES IN LOCAL MEAN LEVEL. <i>International Journal of Wavelets, Multiresolution and Information Processing</i> , 2009, 07, 23-58.	1.3	5
27	Second order properties of distribution tails and estimation of tail exponents in random difference equations. <i>Extremes</i> , 2009, 12, 361-400.	1.0	6
28	Volatility changes in cryptocurrencies: evidence from sparse VHAR-MGARCH model. <i>Applied Economics Letters</i> , 0, , 1-9.	1.8	1
