

Edy Tonnizam Mohamad

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/11806617/edy-tonnizam-mohamad-publications-by-year.pdf>

Version: 2024-04-29

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

55

#	Paper	IF	Citations
55	Rock mass classification for the assessment of blastability in tropically weathered igneous rocks 2022 , 255-283		
54	Recent Developments in Machine Learning and Flyrock Prediction. <i>Lecture Notes in Civil Engineering</i> , 2022 , 597-612	0.3	
53	Excavation Assessment on Granitic Area at Ulu Kinta, Perak, Malaysia for an Earthwork Project. <i>Lecture Notes in Civil Engineering</i> , 2022 , 521-536	0.3	
52	Rock Mass Classification for the Assessment of Blastability in Tropically Weathered Limestones. <i>Lecture Notes in Civil Engineering</i> , 2021 , 13-44	0.3	3
51	Application of Tree-Based Predictive Models to Forecast Air Overpressure Induced by Mine Blasting. <i>Natural Resources Research</i> , 2021 , 30, 1865-1887	4.9	15
50	Strength evaluation of granite block samples with different predictive models. <i>Engineering With Computers</i> , 2021 , 37, 891-908	4.5	12
49	Optimal ELM-Barris Hawks Optimization and ELM-Grasshopper Optimization Models to Forecast Peak Particle Velocity Resulting from Mine Blasting. <i>Natural Resources Research</i> , 2021 , 30, 2647-2662	4.9	20
48	Prediction of TBM performance in fresh through weathered granite using empirical and statistical approaches. <i>Tunnelling and Underground Space Technology</i> , 2021 , 118, 104183	5.7	17
47	GEOSPATIAL APPROACH FOR GEOLOGICAL INVESTIGATION AT DISTRICT OF MERSING. <i>Journal of Information System and Technology Management</i> , 2021 , 6, 174-185	0.1	
46	Estimation of the TBM advance rate under hard rock conditions using XGBoost and Bayesian optimization. <i>Underground Space (China)</i> , 2020 , 6, 506-506	3.7	50
45	Development of fuzzy-GMDH model optimized by GSA to predict rock tensile strength based on experimental datasets. <i>Neural Computing and Applications</i> , 2020 , 32, 14047-14067	4.8	19
44	A Novel Intelligent ELM-BBO Technique for Predicting Distance of Mine Blasting-Induced Flyrock. <i>Natural Resources Research</i> , 2020 , 29, 4103-4120	4.9	38
43	Intelligence Prediction of Some Selected Environmental Issues of Blasting: A Review. <i>Open Construction and Building Technology Journal</i> , 2020 , 14, 298-308	1.1	17
42	The use of new intelligent techniques in designing retaining walls. <i>Engineering With Computers</i> , 2020 , 36, 283-294	4.5	45
41	The effects of particle swarm optimisation and genetic algorithm on ANN results in predicting pile bearing capacity. <i>International Journal of Hydromechatronics</i> , 2020 , 3, 69	4.2	26
40	Machine Learning Classifiers for Modeling Soil Characteristics by Geophysics Investigations: A Comparative Study. <i>Applied Sciences (Switzerland)</i> , 2020 , 10, 5734	2.6	4
39	The effects of ABC, ICA, and PSO optimization techniques on prediction of ripping production. <i>Engineering With Computers</i> , 2020 , 36, 1355-1370	4.5	19

38	Estimating the friction angle of black shale core specimens with hybrid-ANN approaches. <i>Measurement: Journal of the International Measurement Confederation</i> , 2019 , 145, 744-755	4.6	30
37	Application of deep neural networks in predicting the penetration rate of tunnel boring machines. <i>Bulletin of Engineering Geology and the Environment</i> , 2019 , 78, 6347-6360	4	64
36	Predicting tunnel boring machine performance through a new model based on the group method of data handling. <i>Bulletin of Engineering Geology and the Environment</i> , 2019 , 78, 3799-3813	4	82
35	A combination of artificial bee colony and neural network for approximating the safety factor of retaining walls. <i>Engineering With Computers</i> , 2019 , 35, 647-658	4.5	58
34	A new hybrid method for predicting ripping production in different weathering zones through in situ tests. <i>Measurement: Journal of the International Measurement Confederation</i> , 2019 , 147, 106826	4.6	32
33	Estimating and optimizing safety factors of retaining wall through neural network and bee colony techniques. <i>Engineering With Computers</i> , 2019 , 35, 945-954	4.5	48
32	Prediction of rock interlocking by developing two hybrid models based on GA and fuzzy system. <i>Engineering With Computers</i> , 2019 , 35, 1419-1430	4.5	7
31	Overbreak prediction and optimization in tunnel using neural network and bee colony techniques. <i>Engineering With Computers</i> , 2019 , 35, 1191-1202	4.5	44
30	Three hybrid intelligent models in estimating flyrock distance resulting from blasting. <i>Engineering With Computers</i> , 2019 , 35, 243-256	4.5	108
29	Effect of Geological Structure on Flyrock Prediction in Construction Blasting. <i>Geotechnical and Geological Engineering</i> , 2018 , 36, 2217-2235	1.5	11
28	Feasibility of ICA in approximating ground vibration resulting from mine blasting. <i>Neural Computing and Applications</i> , 2018 , 29, 457-465	4.8	86
27	Prediction and minimization of blast-induced flyrock using gene expression programming and firefly algorithm. <i>Neural Computing and Applications</i> , 2018 , 29, 269-281	4.8	38
26	An excavatability classification system for surface excavation in sedimentary rocks. <i>Bulletin of Engineering Geology and the Environment</i> , 2017 , 76, 241-251	4	5
25	An optimized ANN model based on genetic algorithm for predicting ripping production. <i>Neural Computing and Applications</i> , 2017 , 28, 393-406	4.8	63
24	Performance evaluation of existing surface excavation assessment methods on weathered sedimentary rock. <i>Bulletin of Engineering Geology and the Environment</i> , 2017 , 76, 205-218	4	2
23	Ripping Production Prediction in Different Weathering Zones According to Field Data. <i>Geotechnical and Geological Engineering</i> , 2017 , 35, 2381-2399	1.5	11
22	Development of hybrid intelligent models for predicting TBM penetration rate in hard rock condition. <i>Tunnelling and Underground Space Technology</i> , 2017 , 63, 29-43	5.7	211
21	Utilizing regression models to find functions for determining ripping production based on laboratory tests. <i>Measurement: Journal of the International Measurement Confederation</i> , 2017 , 111, 216-225	4.6	9

20	Improvement of Problematic Soils with Biopolymer An Environmentally Friendly Soil Stabilizer. <i>Journal of Materials in Civil Engineering</i> , 2017 , 29, 04016204	3	125
19	Application of several non-linear prediction tools for estimating uniaxial compressive strength of granitic rocks and comparison of their performances. <i>Engineering With Computers</i> , 2016 , 32, 189-206	4.5	72
18	A combination of the ICA-ANN model to predict air-overpressure resulting from blasting. <i>Engineering With Computers</i> , 2016 , 32, 155-171	4.5	98
17	Genetic programming and gene expression programming for flyrock assessment due to mine blasting. <i>International Journal of Rock Mechanics and Minings Sciences</i> , 2016 , 88, 254-264	6	62
16	Effects of moisture content on the strength of tropically weathered granite from Malaysia. <i>Bulletin of Engineering Geology and the Environment</i> , 2016 , 75, 369-390	4	9
15	Rock strength assessment based on regression tree technique. <i>Engineering With Computers</i> , 2016 , 32, 343-354	4.5	45
14	Estimation of air-overpressure produced by blasting operation through a neuro-genetic technique. <i>Environmental Earth Sciences</i> , 2016 , 75, 1	2.9	51
13	Prediction of the strength and elasticity modulus of granite through an expert artificial neural network. <i>Arabian Journal of Geosciences</i> , 2016 , 9, 1	1.8	90
12	EFFECT OF GEOLOGICAL STRUCTURE AND BLASTING PRACTICE IN FLY ROCK ACCIDENT AT JOHOR, MALAYSIA. <i>Jurnal Teknologi (Sciences and Engineering)</i> , 2016 , 78,	1.2	7
11	Ground vibration prediction in quarry blasting through an artificial neural network optimized by imperialist competitive algorithm. <i>Bulletin of Engineering Geology and the Environment</i> , 2015 , 74, 873-886	4	170
10	Blast-induced air and ground vibration prediction: a particle swarm optimization-based artificial neural network approach. <i>Environmental Earth Sciences</i> , 2015 , 74, 2799-2817	2.9	129
9	Prediction of blast-induced air overpressure: a hybrid AI-based predictive model. <i>Environmental Monitoring and Assessment</i> , 2015 , 187, 666	3.1	42
8	An adaptive neuro-fuzzy inference system for predicting unconfined compressive strength and Young's modulus: a study on Main Range granite. <i>Bulletin of Engineering Geology and the Environment</i> , 2015 , 74, 1301-1319	4	116
7	Prediction of the unconfined compressive strength of soft rocks: a PSO-based ANN approach. <i>Bulletin of Engineering Geology and the Environment</i> , 2015 , 74, 745-757	4	122
6	A typical weathering profile of granitic rock in Johor, Malaysia based on joint characterization. <i>Arabian Journal of Geosciences</i> , 2015 , 8, 2191-2201	1.8	10
5	Neuro-fuzzy technique to predict air-overpressure induced by blasting. <i>Arabian Journal of Geosciences</i> , 2015 , 8, 10937-10950	1.8	81
4	Application of two intelligent systems in predicting environmental impacts of quarry blasting. <i>Arabian Journal of Geosciences</i> , 2015 , 8, 9647-9665	1.8	85
3	Indirect measure of shale shear strength parameters by means of rock index tests through an optimized artificial neural network. <i>Measurement: Journal of the International Measurement Confederation</i> , 2014 , 55, 487-498	4.6	98
