

Edward G Cape

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/11866737/edward-g-cape-publications-by-year.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

28
papers

#	Paper	IF	Citations
28	Effect of three-dimensional valve shape on the hemodynamics of aortic stenosis: three-dimensional echocardiographic stereolithography and patient studies. <i>Journal of the American College of Cardiology</i> , 2002 , 40, 1479-86	15.1	95
27	Development of a Noninvasive Marker of Wall Shear Stress Effects in Discrete Subaortic Stenosis. <i>Cardiovascular Engineering (Dordrecht, Netherlands)</i> , 2001 , 1, 137-146		2
26	Bidirectional superior cavopulmonary anastomosis improves mechanical efficiency in dilated atriopulmonary connections. <i>Journal of Thoracic and Cardiovascular Surgery</i> , 1999 , 118, 681-91	1.5	15
25	Fluid dynamic comparison of intra-atrial and extracardiac total cavopulmonary connections. <i>Journal of Thoracic and Cardiovascular Surgery</i> , 1999 , 117, 697-704	1.5	125
24	Insights into catheter/Doppler discrepancies in congenital aortic stenosis. <i>American Journal of Cardiology</i> , 1999 , 83, 1447-50	3	16
23	In vitro Doppler assessment of pressure gradients across modified Blalock-Taussig shunts. <i>American Journal of Cardiology</i> , 1998 , 81, 1219-23	3	18
22	Simultaneous Doppler and catheter transvalvular pressure gradients across St Jude bileaflet mitral valve prosthesis: in vivo study in a chronic animal model with pediatric valve sizes. <i>Journal of the American Society of Echocardiography</i> , 1998 , 11, 1145-54	5.8	5
21	Potential role of mechanical stress in the etiology of pediatric heart disease: septal shear stress in subaortic stenosis. <i>Journal of the American College of Cardiology</i> , 1997 , 30, 247-54	15.1	96
20	Abnormalities of the left ventricular outflow tract associated with discrete subaortic stenosis in children: an echocardiographic study. <i>Journal of the American College of Cardiology</i> , 1997 , 30, 255-9	15.1	53
19	Hemodynamic effect of progressive right atrial dilatation in atriopulmonary connections. <i>Journal of Thoracic and Cardiovascular Surgery</i> , 1997 , 114, 2-8	1.5	19
18	How sensitive are jet centerline velocities to an opposing flow? Implications for using the centerline method to quantify regurgitant jet flow. <i>Journal of Biomechanics</i> , 1996 , 29, 967-71	2.9	0
17	Quantification of Mitral and Tricuspid Regurgitation Using Jet Centerline Velocities: An In Vitro Study of Jets in an Ambient Counterflow. <i>Echocardiography</i> , 1996 , 13, 357-372	1.5	2
16	Turbulent/viscous interactions control Doppler/catheter pressure discrepancies in aortic stenosis. The role of the Reynolds number. <i>Circulation</i> , 1996 , 94, 2975-81	16.7	30
15	Insights from three-dimensional echocardiographic laser stereolithography. Effect of leaflet funnel geometry on the coefficient of orifice contraction, pressure loss, and the Gorlin formula in mitral stenosis. <i>Circulation</i> , 1996 , 94, 452-9	16.7	28
14	Ambient Fluid Velocity Influences Proximal Isovelocity Surface Area Calculations. <i>Echocardiography</i> , 1995 , 12, 581-589	1.5	2
13	Three-dimensional surface geometry correction is required for calculating flow by the proximal isovelocity surface area technique. <i>Journal of the American Society of Echocardiography</i> , 1995 , 8, 585-94	5.8	24
12	Papillary muscle displacement causes systolic anterior motion of the mitral valve. Experimental validation and insights into the mechanism of subaortic obstruction. <i>Circulation</i> , 1995 , 91, 1189-95	16.7	147

11	Quantification of regurgitant flow through bileaflet heart valve prostheses: theoretical and in vitro studies. <i>Ultrasound in Medicine and Biology</i> , 1993 , 19, 461-8	3.5	5
10	Pressure recovery distal to stenoses: expanding clinical applications of engineering principles. <i>Journal of the American College of Cardiology</i> , 1993 , 21, 1026-8	15.1	14
9	Increased heart rate can cause underestimation of regurgitant jet size by Doppler color flow mapping. <i>Journal of the American College of Cardiology</i> , 1993 , 21, 1029-37	15.1	35
8	Cardiac motion can alter proximal isovelocity surface area calculations of regurgitant flow. <i>Journal of the American College of Cardiology</i> , 1993 , 22, 1730-7	15.1	19
7	Effect of heart rate on centerline velocities of pulsatile intracardiac jets: an in vitro study with laser Doppler anemometry and pulsed Doppler ultrasound. <i>Journal of the American Society of Echocardiography</i> , 1992 , 5, 393-404	5.8	14
6	Adjacent solid boundaries alter the size of regurgitant jets on Doppler color flow maps. <i>Journal of the American College of Cardiology</i> , 1991 , 17, 1094-102	15.1	131
5	A new theoretical model for noninvasive quantification of mitral regurgitation. <i>Journal of Biomechanics</i> , 1990 , 23, 27-33	2.9	36
4	Chordal geometry determines the shape and extent of systolic anterior mitral motion: in vitro studies. <i>Journal of the American College of Cardiology</i> , 1989 , 13, 1438-48	15.1	66
3	Pressure recovery distal to a stenosis: potential cause of gradient "overestimation" by Doppler echocardiography. <i>Journal of the American College of Cardiology</i> , 1989 , 13, 706-15	15.1	124
2	Quantitative Approaches to Color Doppler Flow Mapping of Intracardiac Blood Flow: A Review of In Vitro Methods. <i>Echocardiography</i> , 1989 , 6, 371-383	1.5	11
1	Review of hydrodynamic principles for the cardiologist: applications to the study of blood flow and jets by imaging techniques. <i>Journal of the American College of Cardiology</i> , 1988 , 12, 1344-53	15.1	255
