#	ARTICLE	IF	CITATIONS
1	Frequency domain identification of FIR models in the presence of additive input-output noise. Automatica, 2020, 115, 108879.	3.0	9
2	Blind identification of two-channel FIR systems: a frequency domain approach. IFAC-PapersOnLine, 2020, 53, 914-920.	0.5	0
3	The Frisch scheme for EIV system identification: time and frequency domain formulations. IFAC-PapersOnLine, 2020, 53, 907-913.	0.5	0
4	A note on the estimation of real- and complex-valued parameters in frequency domain maximum likelihood identification. Automatica, 2019, 110, 108584.	3.0	4
5	A user perspective on errors-in-variables methods in system identification. Control Engineering Practice, 2019, 89, 56-69.	3.2	12
6	Identification of two dimensional complex sinusoids in white noise: a state-space frequency approach. IFAC-PapersOnLine, 2018, 51, 996-1001.	0.5	0
7	2D-frequency domain identification of complex sinusoids in the presence of additive noise. IFAC-PapersOnLine, 2018, 51, 820-825.	0.5	4
8	Errors-in-variables identification using maximum likelihood estimation in the frequency domain. Automatica, 2017, 79, 131-143.	3.0	44
9	Frequency domain identification of ARX models in the presence of additive input-output noise. IFAC-PapersOnLine, 2017, 50, 6226-6231.	0.5	2
10	Frequency domain identification of complex sinusoids in the presence of additive noise. IFAC-PapersOnLine, 2017, 50, 6244-6250.	0.5	2
11	Errors-in-variables system identification using structural equation modeling. Automatica, 2016, 66, 218-230.	3.0	25
12	Frequency domain EIV identification combining the Frisch scheme and Yule-Walker equations. , 2015, , .		8
13	A unified framework for EIV identification methods when the measurement noises are mutually correlated. Automatica, 2014, 50, 3216-3223.	3.0	11
14	Extended accuracy analysis of a covariance matching approach for identifying errors-in-variables systems. Automatica, 2014, 50, 2597-2605.	3.0	6
15	Frequency domain EIV identification: a Frisch Scheme approach. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2014, 47, 4631-4636.	0.4	6
16	A unified framework for EIV identification methods in the presence of mutually correlated noises. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2014, 47, 4644-4649.	0.4	1
17	Frequency domain maximum likelihood identification of noisy input-output models. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2014, 47, 4625-4630.	0.4	8
18	Can errors-in-variables systems be identified from closed-loop experiments?. Automatica, 2013, 49, 681-684.	3.0	16

#	ARTICLE	IF	CITATIONS
19	Comparing some classes of bias-compensating least squares methods. Automatica, 2013, 49, 840-845.	3.0	18
20	On the accuracy of a covariance matching method for continuous-time errors-in-variables identification. Automatica, 2013, 49, 2982-2993.	3.0	9
21	Parameter estimation from wave propagation tests on a tube perforated by helical slots. Mechanical Systems and Signal Processing, 2013, 40, 385-399.	4.4	0
22	System identification in a networked environment using second order statistical properties. Automatica, 2013, 49, 652-659.	3.0	6
23	Model validation methods for errors-in-variables estimation. , 2013, , .		0
24	Errors-in-variables identification using covariance matching and structural equation modeling. , 2013, , .		2
25	Model order determination based on rank properties of almost singular covariance matrices*. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2012, 45, 1653-1658.	0.4	0
26	On model order determination for errors-in-variables estimation. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2012, 45, 1347-1352.	0.4	7
27	On covariance matching for multiple input multiple output errors-in-variables systems. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2012, 45, 1371-1376.	0.4	3
28	Accuracy Analysis of a Covariance Matching Method for Continuous-time Errors-in-variables System Identification*. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2012, 45, 1383-1388.	0.4	1
29	A generalised instrumental variable estimator for multivariable errors-in-variables identification problems. International Journal of Control, 2012, 85, 287-303.	1.2	9
30	System identification for the errors-in-variables problem. Transactions of the Institute of Measurement and Control, 2012, 34, 780-792.	1.1	51
31	Estimation of material functions using system identification techniques. Control Engineering Practice, 2012, 20, 972-990.	3.2	6
32	Optimal Excitation for Nonparametric Identification of Viscoelastic Materials. IEEE Transactions on Control Systems Technology, 2011, 19, 238-244.	3.2	5
33	A generalized instrumental variable estimation method for errors-in-variables identification problems. Automatica, 2011, 47, 1656-1666.	3.0	62
34	On the accuracy in errors-in-variables identification compared to prediction-error identification. Automatica, 2011, 47, 2704-2712.	3.0	12
35	On identification methods for direct data-driven controller tuning. International Journal of Adaptive Control and Signal Processing, 2011, 25, 448-465.	2.3	30
36	Approximative weighting for a covariance-matching approach for identifying errors-in-variables systems. International Journal of Adaptive Control and Signal Processing, 2011, 25, 535-543.	2.3	2

#	ARTICLE	IF	CITATIONS
37	Accuracy analysis of a covariance matching approach for identifying errors-in-variables systems. Automatica, 2011, 47, 272-282.	3.0	28
38	Covariance Matching for Continuous-Time Errors-in-Variables Problems. IEEE Transactions on Automatic Control, 2011, 56, 1478-1483.	3.6	10
39	Asymptotic accuracy of covariance function based errors-in-variables system parameter estimates. , 2010, , .		0
40	Accuracy analysis of time domain maximum likelihood method and sample maximum likelihood method for errors-in-variables and output error identification. Automatica, 2010, 46, 721-727.	3.0	49
41	Errors-in-variables identification using a Generalized Instrumental Variable Estimation method. , 2010, , .		4
42	Continuous-time errors-in-variables system identification through covariance matching without input signal modeling. , 2009, , .		4
43	Separation of waves governed by the one-dimensional wave equation—a stochastic systems approach. Mechanical Systems and Signal Processing, 2009, 23, 823-844.	4.4	2
44	Relations between Bias-Eliminating Least Squares, the Frisch scheme and Extended Compensated Least Squares methods for identifying errors-in-variables systems. Automatica, 2009, 45, 277-282.	3.0	30
45	A covariance matching approach for identifying errors-in-variables systems. Automatica, 2009, 45, 2018-2031.	3.0	40
46	Sampled Data Errors-in-Variables Systems. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2009, 42, 1157-1162.	0.4	3
47	Sampling approximations for continuous-time identification. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2009, 42, 1145-1150.	0.4	2
48	Identifying Errors-in-Variables Systems By Using A Covariance Matching Approach. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2009, 42, 1551-1556.	0.4	2
49	Extending the Frisch scheme for errors-in-variables identification to correlated output noise. International Journal of Adaptive Control and Signal Processing, 2008, 22, 55-73.	2.3	37
50	Optimal sensor locations for nonparametric identification of viscoelastic materials. Automatica, 2008, 44, 28-38.	3.0	14
51	Estimation of Continuous-time Stochastic System Parameters. , 2008, , 31-66.		7
52	Comparison of three Frisch methods for errors-in-variables identification. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2008, 41, 414-419.	0.4	10
53	Statistical Analysis of a Third-Order Cumulants Based Algorithm for Discrete-Time Errors-in-Variables Identification. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2008, 41, 420-425.	0.4	6
54	Accuracy Analysis of Time-domain Maximum Likelihood Method and Sample Maximum Likelihood Method for Errors-in-Variables Identification. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2008, 41, 1372-1377.	0.4	1

#	ARTICLE	IF	CITATIONS
55	Feedforward Design for a Mechanical System with Marginally Stable Inverse. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2008, 41, 2270-2275.	0.4	0
56	Separation of One-dimensional Waves - a Stochastic Systems Approach. Conference Record of the Asilomar Conference on Signals, Systems and Computers, 2007, , .	0.0	0
57	Accuracy Analysis of the Frisch Scheme for Identifying Errors-in-Variables Systems. IEEE Transactions on Automatic Control, 2007, 52, 985-997.	3.6	31
58	A Mechanical Wave Diode: Using Feedforward Control for One-Way Transmission of Elastic Extensional Waves. IEEE Transactions on Control Systems Technology, 2007, 15, 715-724.	3.2	13
59	Identification of Continuous-Time ARX Models From Irregularly Sampled Data. IEEE Transactions on Automatic Control, 2007, 52, 417-427.	3.6	29
60	A Simplified Form of the Bias-Eliminating Least Squares Method for Errors-in-Variables Identification. IEEE Transactions on Automatic Control, 2007, 52, 1754-1756.	3.6	26
61	A Frisch scheme for correlated output noise errors-in-variables identification. , 2007, , .		1
62	Bayesian approaches for identification of the complex modulus of viscoelastic materials. Automatica, 2007, 43, 1369-1376.	3.0	9
63	Errors-in-variables methods in system identification. Automatica, 2007, 43, 939-958.	3.0	357
64	Accuracy analysis of bias-eliminating least squares estimates for errors-in-variables systems. Automatica, 2007, 43, 1590-1596.	3.0	29
65	ERRORS-IN-VARIABLES METHODS IN SYSTEM IDENTIFICATION. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2006, 39, 1-19.	0.4	9
66	USING CONTINUOUS-TIME MODELING FOR ERRORS-IN-VARIABLES IDENTIFICATION. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2006, 39, 428-433.	0.4	19
67	NONPARAMETRIC IDENTIFICATION OF COMPLEX MODULUS USING A NON-EQUILIBRIUM SHPB PROCEDURE. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2006, 39, 1318-1323.	0.4	2
68	A SEPARABLE NONLINEAR LEAST-SQUARES APPROACH FOR IDENTIFICATION OF LINEAR SYSTEMS WITH ERRORS IN VARIABLES. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2006, 39, 178-183.	0.4	25
69	ACCURACY ANALYSIS OF BIAS-ELIMINATING LEAST SQUARES ESTIMATES FOR ERRORS-IN-VARIABLES IDENTIFICATION. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2006, 39, 190-195.	0.4	6
70	ON COMPUTING THE CRAMER-RAO BOUND AND COVARIANCE MATRICES FOR PEM ESTIMATES IN LINEAR STATE SPACE MODELS. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2006, 39, 600-605.	0.4	26
71	On the estimation of complex modulus and Poisson's ratio using longitudinal wave experiments. Mechanical Systems and Signal Processing, 2006, 20, 2080-2094.	4.4	12
72	An Overview of Important Practical Aspects of Continuous-Time ARMA System Identification. Circuits, Systems, and Signal Processing, 2006, 25, 17-46.	1.2	44

#	ARTICLE	IF	CITATIONS
73	OPTIMAL SENSOR LOCATIONS FOR NONPARAMETRIC IDENTIFICATION OF VISCOELASTIC MATERIALS. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2005, 38, 686-691.	0.4	2
74	IDENTIFICATION OF DYNAMIC ERRORS-IN-VARIABLES SYSTEMS WITH PERIODIC DATA. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2005, 38, 809-814.	0.4	13
75	Periodic signal analysis by maximum likelihood modeling of orbits of nonlinear ODEs. Automatica, 2005, 41, 793-805.	3.0	5
76	Convergence properties of bias-eliminating algorithms for errors-in-variables identification. International Journal of Adaptive Control and Signal Processing, 2005, 19, 703-722.	2.3	37
77	Reduced order models for a two-dimensional heat diffusion system. International Journal of Control, 2004, 77, 1532-1548.	1.2	3
78	Computationally efficient estimation of wave propagation functions from 1-D wave experiments on viscoelastic materials. Automatica, 2004, 40, 713-727.	3.0	4
79	Improved estimation performance using known linear constraints. Automatica, 2004, 40, 1307-1318.	3.0	20
80	Identification of dynamic errors-in-variables models: Approaches based on two-dimensional ARMA modeling of the data. Automatica, 2003, 39, 929-935.	3.0	24
81	Least Squares Harmonic Signal Analysis Using Periodic Orbits of ODEs. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2003, 36, 1543-1548.	0.4	9
82	Why are errors-in-variables problems often tricky?., 2003, , .		6
83	On instrumental variable and total least squares approaches for identification of noisy systems. International Journal of Control, 2002, 75, 381-389.	1.2	49
84	BIAS AND VARIANCE OF THE PARAMETER ESTIMATES FOR A ONE DIMENSIONAL HEAT DIFFUSION SYSTEM. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2002, 35, 259-264.	0.4	0
85	IDENTIFICATION OF DYNAMIC ERRORS-IN-VARIABLES MODEL USING A FREQUENCY DOMAIN FRISCH SCHEME. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2002, 35, 361-366.	0.4	5
86	System Identification Techniques for Estimating Material Functions from Wave Propagation Experiments. Inverse Problems in Science and Engineering, 2002, 10, 413-439.	0.5	8
87	Instrumental variable methods for system identification. Circuits, Systems, and Signal Processing, 2002, 21, 1-9.	1.2	170
88	Model validation and model structure determination. Circuits, Systems, and Signal Processing, 2002, 21, 83-90.	1.2	8
89	Perspectives on errors-in-variables estimation for dynamic systems. Signal Processing, 2002, 82, 1139-1154.	2.1	97
90	Identification of continuous-time AR processes from unevenly sampled data. Automatica, 2002, 38, 709-718.	3.0	69

#	ARTICLE	IF	CITATIONS
91	Perspectives on Errors-In-Variables Estimation for Dynamic Systems. , 2002, , 271-280.		3
92	Reduced order models for diffusion systems. International Journal of Control, 2001, 74, 1543-1557.	1.2	11
93	Reduced order models for diffusion systems using singular perturbations. Energy and Buildings, 2001, 33, 769-781.	3.1	11
94	Reduced Order Models for Diffusion Systems via Collocation Methods. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2000, 33, 977-982.	0.4	5
95	Identification Methods of Dynamic Systems in Presence of Input Noise. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 2000, 33, 199-204.	0.4	9
96	The Cram�r-Rao lower bound for noisy input-output systems. Signal Processing, 2000, 80, 2421-2447.	2.1	28
97	Comments on "identification of closed-loop systems via least-squares method". International Journal of Adaptive Control and Signal Processing, 1999, 13, 37-41.	2.3	2
98	Common factor detection and estimation. Automatica, 1997, 33, 985-989.	3.0	27
99	Computationally and Statistically Efficient Common Factor Detection and Estimation with Application in System Identification. IFAC Postprint Volumes IPPV / International Federation of Automatic Control, 1996, 29, 4279-4284.	0.4	0
100	Optimally Weighted MUSIC for Frequency Estimation. SIAM Journal on Matrix Analysis and Applications, 1995, 16, 811-827.	0.7	5
101	An efficient linear method for ARMA spectral estimation. International Journal of Control, 1994, 59, 337-356.	1.2	18
102	Approximate maximum likelihood frequency estimation. Automatica, 1994, 30, 131-145.	3.0	17
103	Asymptotic statistical analysis of autoregressive frequency estimates. Signal Processing, 1994, 39, 277-292.	2.1	6
104	Comparative performance study of SVD-based and QRD-based high-order Yule-Walker methods for frequency estimation. Circuits, Systems, and Signal Processing, 1993, 12, 105-117.	1.2	1
105	On SVD-based and TLS-based high-order Yule-Walker methods of frequency estimation. Signal Processing, 1992, 29, 309-317.	2.1	10
106	Adaptive instrumental variable methods for frequency estimation. International Journal of Adaptive Control and Signal Processing, 1992, 6, 441-469.	2.3	3
107	On spectral and root forms of sinusoidal frequency estimators. Signal Processing, 1991, 24, 93-103.	2.1	13
108	Computing stochastic continuous-time models from ARMA models. International Journal of Control, 1991, 53, 1311-1326.	1.2	32

#	ARTICLE	IF	CITATIONS
109	High-order Yule-Walker equations for estimating sinusoidal frequencies: The complete set of solutions. <i>Signal Processing</i> , 1990, 20, 257-263.	2.1	16
110	Investigation of the intersample variance in sampled-data control. <i>International Journal of Control</i> , 1989, 50, 1587-1602.	1.2	14
111	Inter-sample behaviour as measured by continuous-time quadratic criteria. <i>International Journal of Control</i> , 1989, 49, 2077-2083.	1.2	10
112	Approximate maximum-likelihood approach to ARMA spectral estimation. <i>International Journal of Control</i> , 1987, 45, 1281-1310.	1.2	15
113	Instrumental Variable Methods for ARMA Models. <i>Control and Dynamic Systems</i> , 1987, 25, 79-150.	0.1	5
114	Least-squares, Yule-Walker, and overdetermined Yule-Walker estimation of AR parameters: a Monte Carlo analysis of finite-sample properties. <i>International Journal of Control</i> , 1986, 43, 13-27.	1.2	13
115	Model-structure selection by cross-validation. <i>International Journal of Control</i> , 1986, 43, 1841-1878.	1.2	101
116	An investigation of the intersample variance for linear stochastic control. , 1986, , .		2
117	Optimization with respect to covariance sequence parameters. <i>Automatica</i> , 1985, 21, 671-675.	3.0	11
118	An approximate maximum likelihood approach to ARMA spectral estimation. , 1985, , .		19
119	Asymptotic accuracy of the Aitken-Markov estimator. <i>International Journal of Control</i> , 1985, 41, 1175-1188.	1.2	0
120	On the convergence of pseudo-linear regression algorithms. <i>International Journal of Control</i> , 1985, 41, 1429-1444.	1.2	13
121	On the asymptotic accuracy of pseudo-linear regression algorithms. <i>International Journal of Control</i> , 1984, 39, 115-126.	1.2	23
122	Uniqueness of estimated k-step prediction models of ARMA processes. <i>Systems and Control Letters</i> , 1984, 4, 325-331.	1.3	15
123	Optimal instrumental-variable methods for identification of multivariable linear systems. <i>Automatica</i> , 1983, 19, 425-429.	3.0	19
124	On the parsimony principle. <i>International Journal of Control</i> , 1982, 36, 409-418.	1.2	30
125	Instrumental-variable methods for identification of Hammerstein systems. <i>International Journal of Control</i> , 1982, 35, 459-476.	1.2	145
126	Bias correction in least-squares identification. <i>International Journal of Control</i> , 1982, 35, 449-457.	1.2	100
