

Pieter Poot

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/11898138/pieter-poot-publications-by-year.pdf>
Version: 2024-04-09

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.
The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

24 papers	7,242 citations	14 h-index	26 g-index
26 ext. papers	8,557 ext. citations	6.9 avg, IF	4.9 L-index

#	Paper	IF	Citations
24	AusTraits, a curated plant trait database for the Australian flora. <i>Scientific Data</i> , 2021 , 8, 254	8.2	6
23	Effects of fragmentation on the plant functional composition and diversity of remnant woodlands in a young and rapidly expanding city. <i>Journal of Vegetation Science</i> , 2018 , 29, 285-296	3.1	11
22	Shallow soils negatively affect water relations and photosynthesis in two semi-arid Eucalyptus species. <i>Environmental and Experimental Botany</i> , 2018 , 155, 239-250	5.9	5
21	Informing arid region mine-site restoration through comparative ecophysiology of Acacia species under drought. <i>Journal of Arid Environments</i> , 2016 , 133, 73-84	2.5	3
20	Links between soil texture and root architecture of Eucalyptus species may limit distribution ranges under future climates. <i>Plant and Soil</i> , 2016 , 403, 217-229	4.2	12
19	A climate change context for the decline of a foundation tree species in south-western Australia: insights from phylogeography and species distribution modelling. <i>Annals of Botany</i> , 2015 , 116, 941-52	4.1	16
18	Isometric partitioning of hydraulic conductance between leaves and stems: balancing safety and efficiency in different growth forms and habitats. <i>Plant, Cell and Environment</i> , 2015 , 38, 1628-36	8.4	11
17	Shallow environmental gradients put inland species at risk: Insights and implications from predicting future distributions of Eucalyptus species in South Western Australia. <i>Austral Ecology</i> , 2015 , 40, 923-932	1.5	7
16	Global variability in leaf respiration in relation to climate, plant functional types and leaf traits. <i>New Phytologist</i> , 2015 , 206, 614-36	9.8	244
15	Spatio-temporal water dynamics in mature Banksia menziesii trees during drought. <i>Physiologia Plantarum</i> , 2014 , 152, 301-15	4.6	16
14	Complex effects of fragmentation on remnant woodland plant communities of a rapidly urbanizing biodiversity hotspot. <i>Ecology</i> , 2014 , 95, 2466-2478	4.6	61
13	Simulation of the evolution of root water foraging strategies in dry and shallow soils. <i>Annals of Botany</i> , 2014 , 114, 763-78	4.1	11
12	Species distribution and crown decline are associated with contrasting water relations in four common sympatric eucalypt species in southwestern Australia. <i>Plant and Soil</i> , 2013 , 364, 409-423	4.2	31
11	Biomass allocation to leaves, stems and roots: meta-analyses of interspecific variation and environmental control. <i>New Phytologist</i> , 2012 , 193, 30-50	9.8	1490
10	Simulation of optimal rooting strategies: What's the best way to find a wet crack? 2012 ,		1
9	Exploring rock fissures: does a specialized root morphology explain endemism on granite outcrops?. <i>Annals of Botany</i> , 2012 , 110, 291-300	4.1	53
8	Shallow-soil endemics: adaptive advantages and constraints of a specialized root-system morphology. <i>New Phytologist</i> , 2008 , 178, 371-381	9.8	83

7	Adaptations to winter-wet ironstone soils: a comparison between rare ironstone Hakea (Proteaceae) species and their common congeners. <i>Australian Journal of Botany</i> , 2008 , 56, 574	1.2	9
6	The worldwide leaf economics spectrum. <i>Nature</i> , 2004 , 428, 821-7	50.4	4915
5	Short Communication: Leaf trait relationships in Australian plant species. <i>Functional Plant Biology</i> , 2004 , 31, 551-558	2.7	103
4	Growth responses to waterlogging and drainage of woody Hakea (Proteaceae) seedlings, originating from contrasting habitats in south-western Australia. <i>Plant and Soil</i> , 2003 , 253, 57-70	4.2	24
3	Seasonal patterns in water use and leaf turnover of different plant functional types in a species-rich woodland, south-western Australia. <i>Plant and Soil</i> , 2003 , 257, 295-304	4.2	40
2	Are trade-offs in allocation pattern and root morphology related to species abundance? A congeneric comparison between rare and common species in the south-western Australian flora. <i>Journal of Ecology</i> , 2003 , 91, 58-67	6	54
1	AusTraits  curated plant trait database for the Australian flora		1
