#	ARTICLE	IF	CITATIONS
1	Therapeutic decision-making in primary care pharmacy practice. <i>Research in Social and Administrative Pharmacy</i> , 2021, 17, 326-331.	1.5	4
2	A call for the appropriate application of clinical pharmacological principles in the search for safe and efficacious COVID-19 (SARS-CoV-2) treatments. <i>British Journal of Clinical Pharmacology</i> , 2021, 87, 707-711.	1.1	20
3	Understanding the association between metformin plasma concentrations and lactate. <i>British Journal of Clinical Pharmacology</i> , 2021, 87, 700-701.	1.1	5
4	Model-Informed Precision Dosing: Background, Requirements, Validation, Implementation, and Forward Trajectory of Individualizing Drug Therapy. <i>Annual Review of Pharmacology and Toxicology</i> , 2021, 61, 225-245.	4.2	74
5	Evaluation of designs for renal drug studies based on the European Medicines Agency and Food and Drug Administration guidelines for drugs that are predominantly secreted. <i>British Journal of Clinical Pharmacology</i> , 2021, 87, 1401-1410.	1.1	2
6	Metformin doses to ensure efficacy and safety in patients with reduced kidney function. <i>PLoS ONE</i> , 2021, 16, e0246247.	1.1	8
7	Does the intact nephron hypothesis provide a reasonable model for metformin dosing in chronic kidney disease?. <i>British Journal of Clinical Pharmacology</i> , 2021, , .	1.1	1
8	Science fiction has become reality: Best practice for future viral pandemics. <i>British Journal of Clinical Pharmacology</i> , 2021, 87, 3385-3387.	1.1	0
9	Relationships Between Allopurinol Dose, Oxypurinol Concentration and Urate-Lowering Response” In Search of a Minimum Effective Oxypurinol Concentration. <i>Clinical and Translational Science</i> , 2020, 13, 110-115.	1.5	6
10	Kinetic-pharmacodynamic model for drugs with non-linear elimination: Parameterisation matters. <i>British Journal of Clinical Pharmacology</i> , 2020, 86, 196-198.	1.1	4
11	Measuring the Development of Therapeutic-Decision-Making Skills by Practicing Pharmacists Undertaking a University-Based Postgraduate Clinical Qualification at Distance. <i>Pharmacy (Basel)</i> , Tj ETQq1 1 0.78484 rgBTj Overlo		
12	The pharmacokinetics of metformin in patients receiving intermittent haemodialysis. <i>British Journal of Clinical Pharmacology</i> , 2020, 86, 1430-1443.	1.1	4
13	Population Pharmacokinetics and Pharmacokinetic-Pharmacodynamics in Clinical Pharmacology. , 2020, , 903-927.		0
14	Clinical decision-making: An essential skill for 21st century pharmacy practice. <i>Research in Social and Administrative Pharmacy</i> , 2019, 15, 600-606.	1.5	30
15	Understanding the process of clinical judgement for pharmacists when making clinical decisions. <i>Research in Social and Administrative Pharmacy</i> , 2019, 15, 607-614.	1.5	4
16	Evaluation of Assumptions Underpinning Pharmacometric Models. <i>AAPS Journal</i> , 2019, 21, 97.	2.2	3
17	Spotlight Commentary: Model-informed precision dosing must demonstrate improved patient outcomes. <i>British Journal of Clinical Pharmacology</i> , 2019, 85, 2238-2240.	1.1	17
18	The Association between Metformin Therapy and Lactic Acidosis. <i>Drug Safety</i> , 2019, 42, 1449-1469.	1.4	22

#	ARTICLE	IF	CITATIONS
19	Restricting maintenance allopurinol dose according to kidney function in patients with gout is inappropriate!. British Journal of Clinical Pharmacology, 2019, 85, 1378-1379.	1.1	5
20	The intact nephron hypothesis as a model for renal drug handling. European Journal of Clinical Pharmacology, 2019, 75, 147-156.	0.8	17
21	The impact of diuretic use and <i>ABCG2</i> genotype on the predictive performance of a published allopurinol dosing tool. British Journal of Clinical Pharmacology, 2018, 84, 937-943.	1.1	11
22	â€˜Massiveâ€™ metformin overdose. British Journal of Clinical Pharmacology, 2018, 84, 2923-2927.	1.1	20
23	A philosophical framework for pharmacy in the 21st century guided by ethical principles. Research in Social and Administrative Pharmacy, 2018, 14, 309-316.	1.5	21
24	Response to â€˜Comment on â€˜Massiveâ€™ metformin overdoseâ€™ by Chiew <i>et al.</i> â€™. British Journal of Clinical Pharmacology, 2018, 84, 2940-2941.	1.1	3
25	Population Pharmacokinetics and Pharmacokinetic-Pharmacodynamics in Clinical Pharmacology. , 2018, , 1-26.		1
26	A factor VII-based method for the prediction of anticoagulant response to warfarin. Scientific Reports, 2018, 8, 12041.	1.6	4
27	A Joint Model for Vitamin K-Dependent Clotting Factors and Anticoagulation Proteins. Clinical Pharmacokinetics, 2017, 56, 1555-1566.	1.6	9
28	Individualising the dose of allopurinol in patients with gout. British Journal of Clinical Pharmacology, 2017, 83, 2015-2026.	1.1	17
29	A general empirical model for renal drug handling in pharmacokinetic analyses. British Journal of Clinical Pharmacology, 2017, 83, 1869-1872.	1.1	7
30	A Population Pharmacokinetic Model for 51Cr EDTA to Estimate Renal Function. Clinical Pharmacokinetics, 2017, 56, 671-678.	1.6	2
31	Predicting allopurinol response in patients with gout. British Journal of Clinical Pharmacology, 2016, 81, 277-289.	1.1	46
32	Influence of Genotype on Warfarin Maintenance Dose Predictions Produced Using a Bayesian Dose Individualization Tool. Therapeutic Drug Monitoring, 2016, 38, 677-683.	1.0	10
33	Methods for Predicting Warfarin Dose Requirements. Therapeutic Drug Monitoring, 2015, 37, 531-538.	1.0	16
34	What do we learn from repeated population analyses?. British Journal of Clinical Pharmacology, 2015, 79, 40-47.	1.1	21
35	Letter by Chin <i>et al</i> Regarding Article, â€œEfficacy and Safety of Dabigatran Compared With Warfarin in Relation to Baseline Renal Function in Patients With Atrial Fibrillation: A RE-LY (Randomized) Tj ETQq1 1 0.784314 10BT /Overlock 10 Tf		
36	A proposal for dose-adjustment of dabigatran etexilate in atrial fibrillation guided by thrombin time. British Journal of Clinical Pharmacology, 2014, 78, 599-609.	1.1	25

#	ARTICLE	IF	CITATIONS
37	Impaired response or insufficient dosage?â€”Examining the potential causes of â€œinadequate responseâ€”to allopurinol in the treatment of gout. <i>Seminars in Arthritis and Rheumatism</i> , 2014, 44, 170-174.	1.6	43
38	Frequency of CYP2C9 polymorphisms in polynesian people and potential relevance to management of gout with benzbromarone. <i>Joint Bone Spine</i> , 2014, 81, 160-163.	0.8	8
39	Correlation Between Trough Plasma Dabigatran Concentrations and Estimates of Glomerular Filtration Rate Based on Creatinine and Cystatin C. <i>Drugs in R and D</i> , 2014, 14, 113-123.	1.1	38
40	Learning More From the Dabigatran Concentrations in the RE-LY Study. <i>Journal of the American College of Cardiology</i> , 2014, 63, 2746-2747.	1.2	3
41	Coagulation assays and plasma fibrinogen concentrations in realâ€”world patients with atrial fibrillation treated with dabigatran. <i>British Journal of Clinical Pharmacology</i> , 2014, 78, 630-638.	1.1	16
42	The population pharmacokinetics of allopurinol and oxypurinol in patients with gout. <i>European Journal of Clinical Pharmacology</i> , 2013, 69, 1411-1421.	0.8	26
43	A Bayesian Dose-Individualization Method for Warfarin. <i>Clinical Pharmacokinetics</i> , 2013, 52, 59-68.	1.6	41
44	Is the dose of dabigatran really more predictable than warfarin?. <i>British Journal of Clinical Pharmacology</i> , 2013, 76, 997-998.	1.1	4
45	Dabigatran: rational dose individualisation and monitoring guidance is needed. <i>New Zealand Medical Journal</i> , 2012, 125, 148-54.	0.5	9
46	Interpreting population pharmacokineticâ€”pharmacodynamic analyses â€” a clinical viewpoint. <i>British Journal of Clinical Pharmacology</i> , 2011, 71, 807-814.	1.1	86
47	Understanding the time course of pharmacological effect: a PKPD approach. <i>British Journal of Clinical Pharmacology</i> , 2011, 71, 815-823.	1.1	74
48	Development of a Bayesian Forecasting Method for Warfarin Dose Individualisation. <i>Pharmaceutical Research</i> , 2011, 28, 1100-1111.	1.7	27
49	The â€”apparent clearanceâ€” TM of free phenytoin in elderly <i>vs.</i> younger adults. <i>British Journal of Clinical Pharmacology</i> , 2010, 70, 132-138.	1.1	14
