#	ARTICLE	IF	CITATIONS
1	Selection of appropriate time scale with Boruta algorithm for regional drought monitoring using multi-scaler drought index. <i>Tellus, Series A: Dynamic Meteorology and Oceanography</i> , 2022, 71, 1604057.	0.8	12
2	A novel spatially weighted accumulative procedure for regional drought monitoring. <i>Tellus, Series A: Dynamic Meteorology and Oceanography</i> , 2022, 72, 1838194.	0.8	16
3	A new spatiotemporal two-stage standardized weighted procedure for regional drought analysis. <i>PeerJ</i> , 2022, 10, e13249.	0.9	7
4	Improving business process and functionality using IoT based E3-value business model. <i>Electronic Markets</i> , 2021, 31, 17-26.	4.4	13
5	A seasonally blended and regionally integrated drought index using Bayesian network theory. <i>Meteorological Applications</i> , 2021, 28, e1992.	0.9	12
6	An ensemble procedure for pattern recognition of regional drought. <i>International Journal of Climatology</i> , 2020, 40, 94-114.	1.5	5
7	Predicting consumer preferences in electronic market based on IoT and Social Networks using deep learning based collaborative filtering techniques. <i>Electronic Commerce Research</i> , 2020, 20, 241-258.	3.0	8
8	Bayesian network based procedure for regional drought monitoring: The Seasonally Combinative Regional Drought Indicator. <i>Journal of Environmental Management</i> , 2020, 276, 111296.	3.8	16
9	On the more generalized non-parametric framework for the propagation of uncertainty in drought monitoring. <i>Meteorological Applications</i> , 2020, 27, e1914.	0.9	3
10	Achieving environmental sustainability through information technology: "Digital Pakistan" initiative for green development. <i>Environmental Science and Pollution Research</i> , 2020, 27, 10011-10026.	2.7	52
11	Monthly drought prediction based on ensemble models. <i>PeerJ</i> , 2020, 8, e9853.	0.9	2
12	Evaluation of wet and dry event's trend and instability based on the meteorological drought index. <i>PeerJ</i> , 2020, 8, e9729.	0.9	4
13	Socio-economic and environmental factors influenced pro-poor growth process: new development triangle. <i>Environmental Science and Pollution Research</i> , 2019, 26, 29157-29172.	2.7	16
14	Economics of death and dying: a critical evaluation of environmental damages and healthcare reforms across the globe. <i>Environmental Science and Pollution Research</i> , 2019, 26, 29799-29809.	2.7	4
15	Green is clean: the role of ICT in resource management. <i>Environmental Science and Pollution Research</i> , 2019, 26, 25341-25358.	2.7	90
16	Imperatives of Sustainable University Excellence: A Conceptual Framework. <i>Sustainability</i> , 2019, 11, 5242.	1.6	19
17	Dynamic linkages between tourism, energy, environment, and economic growth: evidence from top 10 tourism-induced countries. <i>Environmental Science and Pollution Research</i> , 2019, 26, 31273-31283.	2.7	75
18	Development of Multidecomposition Hybrid Model for Hydrological Time Series Analysis. <i>Complexity</i> , 2019, 2019, 1-14.	0.9	13

#	ARTICLE	IF	CITATIONS
19	The impact of financial development indicators on natural resource markets: Evidence from two-step GMM estimator. <i>Resources Policy</i> , 2019, 62, 240-255.	4.2	51
20	Tourism logistics management through financial and regulatory measures: evidence from a panel of countries. <i>Asia Pacific Journal of Tourism Research</i> , 2019, 24, 443-458.	1.8	12
21	Natural disasters and economic losses: controlling external migration, energy and environmental resources, water demand, and financial development for global prosperity. <i>Environmental Science and Pollution Research</i> , 2019, 26, 14287-14299.	2.7	59
22	Minimum Cost Multiobjective Programming Model for Target Efficiency in Sample Selection. <i>Scientific Programming</i> , 2019, 2019, 1-9.	0.5	0
23	A framework to identify homogeneous drought characterization regions. <i>Theoretical and Applied Climatology</i> , 2019, 137, 3161-3172.	1.3	21
24	The impact of air transportation, railways transportation, and port container traffic on energy demand, customs duty, and economic growth: Evidence from a panel of low-, middle-, and high-income countries. <i>Journal of Air Transport Management</i> , 2018, 70, 18-35.	2.4	38
25	A note on poverty, growth, and inequality nexus: evidence from a panel of sub-Saharan African countries. <i>Quality and Quantity</i> , 2018, 52, 2173-2195.	2.0	6
26	Energy, tourism, finance, and resource depletion: panel data analysis. <i>Energy Sources, Part B: Economics, Planning and Policy</i> , 2018, 13, 463-474.	1.8	32
27	Sustainable Enterprise Excellence: Attribute-Based Assessment Protocol. <i>Sustainability</i> , 2018, 10, 4097.	1.6	11
28	Forecasting Drought Using Multilayer Perceptron Artificial Neural Network Model. <i>Advances in Meteorology</i> , 2017, 2017, 1-9.	0.6	74
29	Genetic Algorithm for Traveling Salesman Problem with Modified Cycle Crossover Operator. <i>Computational Intelligence and Neuroscience</i> , 2017, 2017, 1-7.	1.1	95
