

Renty B Franklin

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/11925556/renty-b-franklin-publications-by-year.pdf>

Version: 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

83

#	Paper	IF	Citations
83	Zinc: The Wonder Drug for the Treatment of Carcinomas 2020 , 4, 33-39		2
82	A Proposed Efficacious Treatment with Clioquinol (Zinc Ionophore) and Cabergoline (Prolactin Dopamine Agonist) for the Treatment of Terminal Androgen-independent Prostate Cancer. Why and How? 2019 , 2,		3
81	A Novel Patient Case Report to Show the Successful Termination of Untreatable Androgen-independent Prostate Cancer: Treatment with Cabergoline (Dopamine agonist) 2019 , 4,		2
80	The implications of the hypocitricemic response to surgery and the role of liver function and hepatocyte metabolism: An important, but neglected, clinical relationship 2018 , 4, 114-119		2
79	Energy Dispersive X-Ray Fluorescence Zn/Fe Ratiometric Determination of Zinc Levels in Expressed Prostatic Fluid: A Direct, Non-Invasive and Highly Accurate Screening for Prostate Cancer 2018 , 2, 20-26		
78	The Important Role and Implications of Citrate in the Composition, Structure, and Function of Oral/Periodontal/Craniofacial Tissues 2018 , 3, 85-90		2
77	Androgen receptor expression reduces stemness characteristics of prostate cancer cells (PC3) by repression of CD44 and SOX2. <i>Journal of Cellular Biochemistry</i> , 2018 , 120, 2413	4.7	13
76	Testosterone, prolactin, and oncogenic regulation of the prostate gland. A new concept: Testosterone-independent malignancy is the development of prolactin-dependent malignancy!. <i>Oncology Reviews</i> , 2018 , 12, 356	4.3	6
75	Decreased zinc in the development and progression of malignancy: an important common relationship and potential for prevention and treatment of carcinomas. <i>Expert Opinion on Therapeutic Targets</i> , 2017 , 21, 51-66	6.4	35
74	Plasma Citrate Homeostasis: How It Is Regulated; And Its Physiological and Clinical Implications. An Important, But Neglected, Relationship in Medicine 2016 , 1,		23
73	Zinc Ionophore (Clioquinol) Inhibition of Human ZIP1-Deficient Prostate Tumor Growth in the Mouse Ectopic Xenograft Model: A Zinc Approach for the Efficacious Treatment of Prostate Cancer. <i>International Journal of Cancer and Clinical Research</i> , 2016 , 3,	1	20
72	A comprehensive review of the role of zinc in normal prostate function and metabolism; and its implications in prostate cancer. <i>Archives of Biochemistry and Biophysics</i> , 2016 , 611, 100-112	4.1	115
71	In situ clinical evidence that zinc levels are decreased in breast invasive ductal carcinoma. <i>Cancer Causes and Control</i> , 2016 , 27, 729-35	2.8	11
70	Persistent low expression of hZip1 in mucinous carcinomas of the ovary, colon, stomach and lung. <i>Journal of Ovarian Research</i> , 2015 , 8, 40	5.5	8
69	Evidence that Human Prostate Cancer is a ZIP1-Deficient Malignancy that could be Effectively Treated with a Zinc Ionophore (Clioquinol) Approach. <i>Chemotherapy</i> , 2015 , 4,		16
68	BMP2 stimulation of osteoblast citrate production in concert with mineralized bone nodule formation. <i>Journal of Regenerative Medicine & Tissue Engineering</i> , 2015 , 4,		13
67	The status of citrate in the hydroxyapatite/collagen complex of bone; and Its role in bone formation. <i>Journal of Regenerative Medicine & Tissue Engineering</i> , 2014 , 3, 4		32

66	The cytotoxic role of RREB1, ZIP3 zinc transporter, and zinc in human pancreatic adenocarcinoma. <i>Cancer Biology and Therapy</i> , 2014 , 15, 1431-7	4.6	29
65	Evidence that Osteoblasts are Specialized Citrate-producing Cells that Provide the Citrate for Incorporation into the Structure of Bone. <i>The Open Bone Journal</i> , 2014 , 6, 1-7		25
64	The status of zinc in the development of hepatocellular cancer: an important, but neglected, clinically established relationship. <i>Cancer Biology and Therapy</i> , 2014 , 15, 353-60	4.6	15
63	A Review of the Current Status and Concept of the Emerging Implications of Zinc and Zinc Transporters in the Development of Pancreatic Cancer. <i>Pancreatic Disorders & Therapy</i> , 2013 , Suppl 4,		15
62	A review of the important central role of altered citrate metabolism during the process of stem cell differentiation. <i>Journal of Regenerative Medicine & Tissue Engineering</i> , 2013 , 2,		29
61	Evidence for changes in RREB-1, ZIP3, and Zinc in the early development of pancreatic adenocarcinoma. <i>Journal of Gastrointestinal Cancer</i> , 2012 , 43, 570-8	1.6	25
60	The Important Role of Osteoblasts and Citrate Production in Bone Formation: "Osteoblast Citration" as a New Concept for an Old Relationship. <i>The Open Bone Journal</i> , 2012 , 4,		58
59	The genetic/metabolic transformation concept of carcinogenesis. <i>Cancer and Metastasis Reviews</i> , 2012 , 31, 123-30	9.6	21
58	ZIP14 zinc transporter downregulation and zinc depletion in the development and progression of hepatocellular cancer. <i>Journal of Gastrointestinal Cancer</i> , 2012 , 43, 249-57	1.6	46
57	Cytotoxic/tumor suppressor role of zinc for the treatment of cancer: an enigma and an opportunity. <i>Expert Review of Anticancer Therapy</i> , 2012 , 12, 121-8	3.5	49
56	Integration of molecular genetics and proteomics with cell metabolism: how to proceed; how not to proceed!. <i>Gene</i> , 2011 , 486, 88-93	3.8	8
55	Zinc is decreased in prostate cancer: an established relationship of prostate cancer!. <i>Journal of Biological Inorganic Chemistry</i> , 2011 , 16, 3-8	3.7	80
54	hZIP1 zinc transporter down-regulation in prostate cancer involves the overexpression of ras responsive element binding protein-1 (RREB-1). <i>Prostate</i> , 2011 , 71, 1518-24	4.2	32
53	Evidence for operation of the direct zinc ligand exchange mechanism for trafficking, transport, and reactivity of zinc in mammalian cells. <i>Journal of Inorganic Biochemistry</i> , 2011 , 105, 589-99	4.2	75
52	Decreased zinc and downregulation of ZIP3 zinc uptake transporter in the development of pancreatic adenocarcinoma. <i>Cancer Biology and Therapy</i> , 2011 , 12, 297-303	4.6	47
51	Human prostate cancer ZIP1/zinc/citrate genetic/metabolic relationship in the TRAMP prostate cancer animal model. <i>Cancer Biology and Therapy</i> , 2011 , 12, 1078-84	4.6	42
50	Ras responsive element binding protein-1 (RREB-1) down-regulates hZIP1 expression in prostate cancer cells. <i>Prostate</i> , 2010 , 70, 288-96	4.2	29
49	The important role of the apoptotic effects of zinc in the development of cancers. <i>Journal of Cellular Biochemistry</i> , 2009 , 106, 750-7	4.7	154

48	Re: Vitamin and mineral use and risk of prostate cancer: the case-control surveillance: Zhang et al. <i>Cancer Causes and Control</i> , 2008 Dec 18 [Epub ahead of print]. <i>Cancer Causes and Control</i> , 2009 , 20, 1529-31; author reply 1533	2.8	2
47	Profiling of zinc-altered gene expression in human prostate normal vs. cancer cells: a time course study. <i>Journal of Nutritional Biochemistry</i> , 2009 , 20, 1000-12	6.3	21
46	Citrate Metabolism in Prostate and Other Cancers 2009 , 61-78		
45	Integration of Genetic, Proteomic, and Metabolic Approaches in Tumor Cell Metabolism 2009 , 79-92		2
44	The involvement of Bax in zinc-induced mitochondrial apoptogenesis in malignant prostate cells. <i>Molecular Cancer</i> , 2008 , 7, 25	42.1	71
43	Differential expression of metallothioneins (MTs) 1, 2, and 3 in response to zinc treatment in human prostate normal and malignant cells and tissues. <i>Molecular Cancer</i> , 2008 , 7, 7	42.1	43
42	The Role of Intermediary Metabolism and Molecular Genetics in Prostate Cancer 2008 , 397-413		
41	A Critical Assessment of Epidemiology Studies Regarding Dietary/Supplemental Zinc and Prostate Cancer Risk. <i>The Open Urology & Nephrology Journal</i> , 2008 , 1,	0.2	7
40	Metabolic Transformations of Malignant Cells: An Overview 2008 , 3-16		1
39	hZip2 and hZip3 zinc transporters are down regulated in human prostate adenocarcinomatous glands. <i>Molecular Cancer</i> , 2007 , 6, 37	42.1	91
38	Re: Silvano Gallus, Roberto Foschi, Eva Negri et al. Dietary zinc and prostate cancer risk: a case-control study from Italy. <i>Eur urol</i> 2007;52:1052-7. <i>European Urology</i> , 2007 , 52, 1262-3; author reply 1263-4	10.2	3
37	Zinc as an anti-tumor agent in prostate cancer and in other cancers. <i>Archives of Biochemistry and Biophysics</i> , 2007 , 463, 211-7	4.1	174
36	Mitochondrial aconitase and citrate metabolism in malignant and nonmalignant human prostate tissues. <i>Molecular Cancer</i> , 2006 , 5, 14	42.1	109
35	The clinical relevance of the metabolism of prostate cancer; zinc and tumor suppression: connecting the dots. <i>Molecular Cancer</i> , 2006 , 5, 17	42.1	271
34	Histidine residues in the region between transmembrane domains III and IV of hZip1 are required for zinc transport across the plasma membrane in PC-3 cells. <i>Biochimica Et Biophysica Acta - Biomembranes</i> , 2006 , 1758, 1696-701	3.8	37
33	Overexpression of the ZIP1 zinc transporter induces an osteogenic phenotype in mesenchymal stem cells. <i>Bone</i> , 2006 , 38, 181-98	4.7	64
32	EAAC1 is expressed in rat and human prostate epithelial cells; functions as a high-affinity L-aspartate transporter; and is regulated by prolactin and testosterone. <i>BMC Biochemistry</i> , 2006 , 7, 10	4.8	41
31	Characterization of the mitochondrial aconitase promoter and the identification of transcription factor binding. <i>Prostate</i> , 2006 , 66, 1061-9	4.2	1

30	Metallothionein transfers zinc to mitochondrial aconitase through a direct interaction in mouse hearts. <i>Biochemical and Biophysical Research Communications</i> , 2005 , 332, 853-8	3.4	94
29	hZIP1 zinc uptake transporter down regulation and zinc depletion in prostate cancer. <i>Molecular Cancer</i> , 2005 , 4, 32	42.1	178
28	Why do tumour cells glycolyse? From glycolysis through citrate to lipogenesis. <i>Molecular and Cellular Biochemistry</i> , 2005 , 280, 1-8	4.2	127
27	Zinc and prostate cancer: a critical scientific, medical, and public interest issue (United States). <i>Cancer Causes and Control</i> , 2005 , 16, 901-15	2.8	106
26	Zinc and zinc transporters in normal prostate and the pathogenesis of prostate cancer. <i>Frontiers in Bioscience - Landmark</i> , 2005 , 10, 2230-9	2.8	85
25	Re: Zinc supplement use and risk of prostate cancer. <i>Journal of the National Cancer Institute</i> , 2004 , 96, 239-40; author reply 240-1	9.7	11
24	Metallothionein can function as a chaperone for zinc uptake transport into prostate and liver mitochondria. <i>Journal of Inorganic Biochemistry</i> , 2004 , 98, 664-6	4.2	49
23	Terminal oxidation and the effects of zinc in prostate versus liver mitochondria. <i>Mitochondrion</i> , 2004 , 4, 331-8	4.9	36
22	Effect of zinc on prostatic tumorigenicity in nude mice. <i>Annals of the New York Academy of Sciences</i> , 2003 , 1010, 316-20	6.5	53
21	Kinetic identification of a mitochondrial zinc uptake transport process in prostate cells. <i>Journal of Inorganic Biochemistry</i> , 2003 , 97, 199-206	4.2	34
20	Direct effect of zinc on mitochondrial apoptogenesis in prostate cells. <i>Prostate</i> , 2002 , 52, 311-8	4.2	126
19	Zinc causes a shift toward citrate at equilibrium of the m-aconitase reaction of prostate mitochondria. <i>Journal of Inorganic Biochemistry</i> , 2000 , 78, 161-5	4.2	47
18	Protein kinase C alpha, epsilon and AP-1 mediate prolactin regulation of mitochondrial aspartate aminotransferase expression in the rat lateral prostate. <i>Molecular and Cellular Endocrinology</i> , 2000 , 170, 153-61	4.4	10
17	Evidence for a zinc uptake transporter in human prostate cancer cells which is regulated by prolactin and testosterone. <i>Journal of Biological Chemistry</i> , 1999 , 274, 17499-504	5.4	166
16	Inhibitory effect of zinc on human prostatic carcinoma cell growth. <i>Prostate</i> , 1999 , 40, 200-7	4.2	193
15	Inhibitory effect of zinc on human prostatic carcinoma cell growth 1999 , 40, 200		4
14	Zinc inhibition of mitochondrial aconitase and its importance in citrate metabolism of prostate epithelial cells. <i>Journal of Biological Chemistry</i> , 1997 , 272, 28875-81	5.4	184
13	Citrate metabolism of normal and malignant prostate epithelial cells. <i>Urology</i> , 1997 , 50, 3-12	1.6	91

12	Prolactin regulation of mitochondrial aspartate aminotransferase and protein kinase C in human prostate cancer cells. <i>Molecular and Cellular Endocrinology</i> , 1997 , 127, 19-25	4.4	19
11	Testosterone stimulates the biosynthesis of m-aconitase and citrate oxidation in prostate epithelial cells. <i>Molecular and Cellular Endocrinology</i> , 1995 , 112, 45-51	4.4	25
10	Androgen modulation of multiple transcription start sites of the mitochondrial aspartate aminotransferase gene in rat prostate. <i>Journal of Biological Chemistry</i> , 1995 , 270, 12629-34	5.4	25
9	Effect of prolactin on the prostate. <i>Prostate</i> , 1994 , 24, 162-6	4.2	100
8	Testosterone regulates mitochondrial aspartate aminotransferase gene expression and mRNA stability in prostate. <i>Journal of Steroid Biochemistry and Molecular Biology</i> , 1993 , 44, 13-9	5.1	19
7	High-affinity L-aspartate transporter in prostate epithelial cells that is regulated by testosterone. <i>Prostate</i> , 1993 , 22, 53-63	4.2	29
6	Concepts of citrate production and secretion by prostate. 1. Metabolic relationships. <i>Prostate</i> , 1991 , 18, 25-46	4.2	147
5	Concepts of citrate production and secretion by prostate: 2. Hormonal relationships in normal and neoplastic prostate. <i>Prostate</i> , 1991 , 19, 181-205	4.2	86
4	Evidence for two aspartate transport systems in prostate epithelial cells. <i>Prostate</i> , 1990 , 16, 137-45	4.2	20
3	Testosterone stimulation of mitochondrial aspartate aminotransferase levels and biosynthesis in rat ventral prostate. <i>The Journal of Steroid Biochemistry</i> , 1987 , 28, 247-56		22
2	Testosterone stimulation of mitochondrial aspartate aminotransferase in organ cultures of rat ventral prostate. <i>The Journal of Steroid Biochemistry</i> , 1984 , 20, 709-13		18
1	The disruption of trace element homeostasis due to aneuploidy as a unifying theme in the etiology of cancer		2
