#	ARTICLE	IF	CITATIONS
1	Modulation and gap detection for broadband and filtered noise signals. Journal of the Acoustical Society of America, 1988, 84, 545-550.	0.5	67
2	Differential sensitivity to tonal frequency and to the rate of amplitude modulation of broadband noise by normally hearing listeners. Journal of the Acoustical Society of America, 1985, 78, 70-77.	0.5	65
3	Detection of silent temporal gaps in sinusoidal markers. Journal of the Acoustical Society of America, 1991, 89, 830-837.	0.5	46
4	Evidence for an across-frequency, between-channel process in asymptotic monaural temporal gap detection. Journal of the Acoustical Society of America, 1998, 103, 3554-3560.	0.5	38
5	Frequency-Discrimination Ability of Hearing-Impaired Listeners. Journal of Speech, Language, and Hearing Research, 1981, 24, 108-112.	0.7	37
6	The role of frequency selectivity in measures of auditory and vibrotactile temporal resolution. Journal of the Acoustical Society of America, 1992, 91, 293-305.	0.5	32
7	Temporal gap detection measured with multiple sinusoidal markers: Effects of marker number, frequency, and temporal position. Journal of the Acoustical Society of America, 1998, 104, 984-998.	0.5	28
8	Modulation Threshold Functions for Chronically Impaired MeniÃre Patients: Seuils de modulation et maladie de MeniÃre chronique. International Journal of Audiology, 1987, 26, 89-102.	0.9	24
9	Detection of silent temporal gaps between narrowâband noise markers having secondâformantlike properties of voiceless stop/vowel combinations. Journal of the Acoustical Society of America, 1993, 93, 1023-1027.	0.5	21
10	Measurement of vestibular ocular reflex (VOR) time constants with a caloric step stimulus*. Journal of Vestibular Research: Equilibrium and Orientation, 2000, 10, 25-39.	0.8	21
11	Detection of time- and bandlimited increments and decrements in a random-level noise. Journal of the Acoustical Society of America, 1999, 106, 313-326.	0.5	17
12	Regional cerebral blood flow for singers and nonsingers while speaking, singing, and humming a rote passage*1. Brain and Language, 1989, 36, 690-698.	0.8	14
13	The effects of continuous phonation on 133Xenon-inhalation air curves (of the kind used in deriving) Tj ETQq1 1 0.784314 rgBT /Ove 0.8 13	0.8	13
14	Measurement, Analysis, and Modelling of the Caloric Response. 2.: Evaluation of Mental Alerting Tasks for Measurement of Caloric-induced Nystagmus. Acta Oto-Laryngologica, 1992, 112, 19-29.	0.3	10
15	Enhancement of the edges of temporal masking functions by complex patterns of overshoot and undershoot. Journal of the Acoustical Society of America, 2000, 107, 2169-2187.	0.5	10
16	Modulation Detection by Patients with Eighth-Nerve Tumors. Journal of Speech, Language, and Hearing Research, 1986, 29, 413-419.	0.7	9
17	Frequency and Rate Discrimination by MeniÃre Patients. International Journal of Audiology, 1986, 25, 10-18.	0.9	8
18	Measurement of vestibular ocular reflex (VOR) time constants with a caloric step stimulus. Journal of Vestibular Research: Equilibrium and Orientation, 2000, 10, 25-39.	0.8	8

#	ARTICLE	IF	CITATIONS
19	Measurement, Analysis, and Modelling of the Caloric Response. 1.: A Descriptive Mathematical Model of the Caloric Response Over Time. <i>Acta Oto-Laryngologica</i> , 1992, 112, 4-18.	0.3	7
20	Evaluation of a maximum likelihood procedure for measuring pure-tone thresholds under computer control. <i>Journal of the American Academy of Audiology</i> , 1996, 7, 125-9.	0.4	7
21	Masked detection thresholds and temporal integration for noise band signals. <i>Journal of the Acoustical Society of America</i> , 1994, 96, 102-114.	0.5	6
22	Simple Triangular Approximations of Auditory Filter Shapes. <i>Journal of Speech, Language, and Hearing Research</i> , 1990, 33, 530-539.	0.7	5
23	Temporal Integration of Sinusoidal Increments in the Absence of Absolute Energy Cues. <i>Journal of Speech, Language, and Hearing Research</i> , 2002, 45, 1285-1296.	0.7	4
24	Exponential processes in human auditory excitation and adaptation. <i>Hearing Research</i> , 2002, 164, 215-230.	0.9	3
25	Labelling and Discrimination of a Synthetic Fricative Continuum in Noise: A Study of Absolute Duration and Relative Onset Time Cues. <i>Journal of Speech, Language, and Hearing Research</i> , 1996, 39, 4-18.	0.7	2
26	Preliminary Evaluation of a Weibull Function for Fitting Slow-Component Eye Velocity over the Time Course of Caloric-Induced Nystagmus. <i>Journal of Speech, Language, and Hearing Research</i> , 1989, 32, 681-687.	0.7	1
27	Response to Moore. <i>Journal of Speech, Language, and Hearing Research</i> , 1991, 34, 1440-1441.	0.7	0
28	Temporal gap detection thresholds in sinusoidal markers simulated with a single-channel envelope detector model. <i>Journal of the Acoustical Society of America</i> , 1994, 95, 2940-2941.	0.5	0
29	Evidence from a simple two-channel model for asymptotic gap detection. <i>Journal of the Acoustical Society of America</i> , 1997, 101, 3150-3150.	0.5	0
