citing authors

#	ARTICLE	IF	CITATIONS
1	Exponential processes in human auditory excitation and adaptation. <i>Hearing Research</i> , 2002, 164, 215-230.	0.9	3
2	Temporal Integration of Sinusoidal Increments in the Absence of Absolute Energy Cues. <i>Journal of Speech, Language, and Hearing Research</i> , 2002, 45, 1285-1296.	0.7	4
3	Enhancement of the edges of temporal masking functions by complex patterns of overshoot and undershoot. <i>Journal of the Acoustical Society of America</i> , 2000, 107, 2169-2187.	0.5	10
4	Measurement of vestibular ocular reflex (VOR) time constants with a caloric step stimulus*. <i>Journal of Vestibular Research: Equilibrium and Orientation</i> , 2000, 10, 25-39.	0.8	21
5	Measurement of vestibular ocular reflex (VOR) time constants with a caloric step stimulus. <i>Journal of Vestibular Research: Equilibrium and Orientation</i> , 2000, 10, 25-39.	0.8	8
6	Detection of time- and bandlimited increments and decrements in a random-level noise. <i>Journal of the Acoustical Society of America</i> , 1999, 106, 313-326.	0.5	17
7	Evidence for an across-frequency, between-channel process in asymptotic monaural temporal gap detection. <i>Journal of the Acoustical Society of America</i> , 1998, 103, 3554-3560.	0.5	38
8	Temporal gap detection measured with multiple sinusoidal markers: Effects of marker number, frequency, and temporal position. <i>Journal of the Acoustical Society of America</i> , 1998, 104, 984-998.	0.5	28
9	Evidence from a simple two-channel model for asymptotic gap detection. <i>Journal of the Acoustical Society of America</i> , 1997, 101, 3150-3150.	0.5	0
10	Labelling and Discrimination of a Synthetic Fricative Continuum in Noise: A Study of Absolute Duration and Relative Onset Time Cues. <i>Journal of Speech, Language, and Hearing Research</i> , 1996, 39, 4-18.	0.7	2
11	Evaluation of a maximum likelihood procedure for measuring pure-tone thresholds under computer control. <i>Journal of the American Academy of Audiology</i> , 1996, 7, 125-9.	0.4	7
12	Temporal gap detection thresholds in sinusoidal markers simulated with a single-channel envelope detector model. <i>Journal of the Acoustical Society of America</i> , 1994, 95, 2940-2941.	0.5	0
13	Masked detection thresholds and temporal integration for noise band signals. <i>Journal of the Acoustical Society of America</i> , 1994, 96, 102-114.	0.5	6
14	Detection of silent temporal gaps between narrow-band noise markers having second-formantlike properties of voiceless stop/vowel combinations. <i>Journal of the Acoustical Society of America</i> , 1993, 93, 1023-1027.	0.5	21
15	Measurement, Analysis, and Modelling of the Caloric Response. 1.: A Descriptive Mathematical Model of the Caloric Response Over Time. <i>Acta Oto-Laryngologica</i> , 1992, 112, 4-18.	0.3	7
16	Measurement, Analysis, and Modelling of the Caloric Response. 2.: Evaluation of Mental Alerting Tasks for Measurement of Caloric-induced Nystagmus. <i>Acta Oto-Laryngologica</i> , 1992, 112, 19-29.	0.3	10
17	The role of frequency selectivity in measures of auditory and vibrotactile temporal resolution. <i>Journal of the Acoustical Society of America</i> , 1992, 91, 293-305.	0.5	32
18	Response to Moore. <i>Journal of Speech, Language, and Hearing Research</i> , 1991, 34, 1440-1441.	0.7	0

#	ARTICLE	IF	CITATIONS
19	Detection of silent temporal gaps in sinusoidal markers. Journal of the Acoustical Society of America, 1991, 89, 830-837.	0.5	46
20	Simple Triangular Approximations of Auditory Filter Shapes. Journal of Speech, Language, and Hearing Research, 1990, 33, 530-539.	0.7	5
21	Regional cerebral blood flow for singers and nonsingers while speaking, singing, and humming a rote passage*1. Brain and Language, 1989, 36, 690-698.	0.8	14
22	Preliminary Evaluation of a Weibull Function for Fitting Slow-Component Eye Velocity over the Time Course of Caloric-Induced Nystagmus. Journal of Speech, Language, and Hearing Research, 1989, 32, 681-687.	0.7	1
23	Modulation and gap detection for broadband and filtered noise signals. Journal of the Acoustical Society of America, 1988, 84, 545-550.	0.5	67
24	Modulation Threshold Functions for Chronically Impaired MeniÃre Patients: Seuils de modulation et maladie de MeniÃre chronique. International Journal of Audiology, 1987, 26, 89-102.	0.9	24
25	The effects of continuous phonation on ¹³³ Xenon-inhalation air curves (of the kind used in deriving) Tj ETQq1 1 0.784314 rgBT /Overlo	0.8	13
26	Modulation Detection by Patients with Eighth-Nerve Tumors. Journal of Speech, Language, and Hearing Research, 1986, 29, 413-419.	0.7	9
27	Frequency and Rate Discrimination by MeniÃre Patients. International Journal of Audiology, 1986, 25, 10-18.	0.9	8
28	Differential sensitivity to tonal frequency and to the rate of amplitude modulation of broadband noise by normally hearing listeners. Journal of the Acoustical Society of America, 1985, 78, 70-77.	0.5	65
29	Frequency-Discrimination Ability of Hearing-Impaired Listeners. Journal of Speech, Language, and Hearing Research, 1981, 24, 108-112.	0.7	37
