citing authors

#	ARTICLE	IF	CITATIONS
1	A roadmap for China to peak carbon dioxide emissions and achieve a 20% share of non-fossil fuels in primary energy by 2030. Applied Energy, 2019, 239, 793-819.	10.1	197
2	Comprehensive assessment of energy conservation and CO2 emissions mitigation in China's iron and steel industry based on dynamic material flows. Applied Energy, 2018, 209, 251-265.	10.1	147
3	Pathways to a low-carbon iron and steel industry in the medium-term – the case of Germany. Journal of Cleaner Production, 2017, 163, 84-98.	9.3	106
4	Energy conservation and CO2 mitigation potentials in the Chinese pulp and paper industry. Resources, Conservation and Recycling, 2017, 117, 74-84.	10.8	44
5	Energy efficiency in the Mexican iron and steel industry from an international perspective. Journal of Cleaner Production, 2017, 158, 335-348.	9.3	37
6	Moving beyond equipment and to systems optimization: techno-economic analysis of energy efficiency potentials in industrial steam systems in China. Journal of Cleaner Production, 2016, 120, 53-63.	9.3	34
7	Comparison of carbon dioxide emissions intensity of steel production in China, Germany, Mexico, and the United States. Resources, Conservation and Recycling, 2016, 113, 127-139.	10.8	90
8	Assessment of emerging energy-efficiency technologies for the pulp and paper industry: a technical review. Journal of Cleaner Production, 2016, 122, 5-28.	9.3	107
9	Assessment of energy-saving and emission reduction potentials in China's ammonia industry. Clean Technologies and Environmental Policy, 2015, 17, 1633-1644.	4.1	18
10	Comparison of iron and steel production energy use and energy intensity in China and the U.S.. Journal of Cleaner Production, 2014, 65, 108-119.	9.3	79
11	Alternative emerging ironmaking technologies for energy-efficiency and carbon dioxide emissions reduction: A technical review. Renewable and Sustainable Energy Reviews, 2014, 33, 645-658.	16.4	217
12	Retrospective and prospective analysis of the trends of energy use in Chinese iron and steel industry. Journal of Cleaner Production, 2014, 74, 105-118.	9.3	52
13	Assessment of energy efficiency improvement and CO2 emission reduction potentials in India's cement and iron & steel industries. Journal of Cleaner Production, 2014, 65, 131-141.	9.3	147
14	A bottom-up model to estimate the energy efficiency improvement and CO2 emission reduction potentials in the Chinese iron and steel industry. Energy, 2013, 50, 315-325.	8.8	218
15	Energy efficiency improvement and CO2 emission reduction opportunities in the cement industry in China. Energy Policy, 2013, 57, 287-297.	8.8	123
16	Potential for reducing paper mill energy use and carbon dioxide emissions through plant-wide energy audits: A case study in China. Applied Energy, 2013, 102, 1334-1342.	10.1	73
17	Quantifying the co-benefits of energy-efficiency policies: A case study of the cement industry in Shandong Province, China. Science of the Total Environment, 2013, 458-460, 624-636.	8.0	48
18	Emerging energy-efficiency and CO2 emission-reduction technologies for cement and concrete production: A technical review. Renewable and Sustainable Energy Reviews, 2012, 16, 6220-6238.	16.4	425

#	ARTICLE	IF	CITATIONS
19	Energy Efficiency Potential for China's Cement Industry: A Bottom-Up Technology-Level Analysis. , 2012, , 91-96.		0
20	Motor systems energy efficiency supply curves: A methodology for assessing the energy efficiency potential of industrial motor systems. Energy Policy, 2011, 39, 6595-6607.	8.8	40
21	Technical and cost assessment of energy efficiency improvement and greenhouse gas emission reduction potentials in Thai cement industry. Energy Efficiency, 2011, 4, 93-113.	2.8	27
22	The use of conservation supply curves in energy policy and economic analysis: The case study of Thai cement industry. Energy Policy, 2010, 38, 392-405.	8.8	98
23	The CO2 abatement cost curve for the Thailand cement industry. Journal of Cleaner Production, 2010, 18, 1509-1518.	9.3	115
24	Barriers to energy efficiency improvement and decision-making behavior in Thai industry. Energy Efficiency, 2010, 3, 33-52.	2.8	100
25	Analysis of energy-efficiency opportunities for the cement industry in Shandong Province, China: A case study of 16 cement plants. Energy, 2010, 35, 3461-3473.	8.8	153
