Atko Heinsalu

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/11999968/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Lateglacial vegetation dynamics in the eastern Baltic region between 14,500 and 11,400calyrBP: A complete record since the BÃ,lling (GI-1e) to the Holocene. Quaternary Science Reviews, 2012, 40, 39-53.	3.0	61
2	Broadleaf deciduous forest counterbalanced the direct effect of climate on Holocene fire regime in hemiboreal/boreal region (NE Europe). Quaternary Science Reviews, 2017, 169, 378-390.	3.0	61
3	From microbial eukaryotes to metazoan vertebrates: Wide spectrum paleoâ€diversity in sedimentary ancient DNA over the last ~14,500Âyears. Geobiology, 2018, 16, 628-639.	2.4	49
4	Quantitative summer and winter temperature reconstructions from pollen and chironomid data between 15 and 8Âka BP in the Baltic–Belarus area. Quaternary International, 2015, 388, 4-11.	1.5	47
5	Early Holocene coastal settlements and palaeoenvironment on the shore of the Baltic Sea at PÃ r hu, southwestern Estonia. Quaternary International, 2005, 130, 75-85.	1.5	43
6	Sediment diatom assemblages and composition of pore-water dissolved organic matter reflect recent eutrophication history of Lake Peipsi (Estonia/Russia). Hydrobiologia, 2007, 584, 133-143.	2.0	37
7	Ecological catastrophe in connection with the impact of the Kaali meteorite about 800–400 B.C. on the island of Saaremaa, Estonia. Meteoritics and Planetary Science, 2001, 36, 1367-1375.	1.6	32
8	History of anthropogenically mediated eutrophication of Lake Peipsi as revealed by the stratigraphy of fossil pigments and molecular size fractions of pore-water dissolved organic matter. Hydrobiologia, 2008, 599, 49-58.	2.0	30
9	Water level changes in a large shallow lake as reflected by the plankton:periphyton-ratio of sedimentary diatoms. Hydrobiologia, 2008, 599, 23-30.	2.0	29
10	Timing of Lateglacial vegetation dynamics and respective palaeoenvironmental conditions in southern Estonia: evidence from the sediment record of Lake Nakri. Journal of Quaternary Science, 2012, 27, 169-180.	2.1	28
11	Palaeoenvironmental evidence for the impact of the crusades on the local and regional environment of medieval (13th–16th century) northern Latvia, eastern Baltic. Holocene, 2016, 26, 61-69.	1.7	24
12	Characterizing changes in the sedimentary environment of a varved lake sediment record in southern central Finland around 8000 cal. yr BP. Journal of Quaternary Science, 2008, 23, 765-775.	2.1	23
13	Landscape change in central Latvia since the Iron Age: multi-proxy analysis of the vegetation impact of conflict, colonization and economic expansion during the last 2,000Âyears. Vegetation History and Archaeobotany, 2015, 24, 377-391.	2.1	21
14	The age of the Kaali meteorite craters and the effect of the impact on the environment and man: evidence from inside the Kaali craters, island of Saaremaa, Estonia. Vegetation History and Archaeobotany, 2004, 13, 197.	2.1	20
15	Detection of the Askja AD 1875 cryptotephra in Latvia, Eastern Europe. Journal of Quaternary Science, 2016, 31, 437-441.	2.1	20
16	<scp>GIS</scp> â€based multiproxy coastline reconstruction of the eastern Gulf of Riga, Baltic Sea, during the Stone Age. Boreas, 2017, 46, 83-99.	2.4	20
17	Palaeogeographic Model for the SW Estonian Coastal Zone of the Baltic Sea. Central and Eastern European Development Studies, 2011, , 165-188.	0.6	17
18	First discovery of cryptotephra in Holocene peat deposits of Estonia, eastern Baltic. Boreas, 2006, 35, 644-649.	2.4	14

Ατκο Heinsalu

#	Article	IF	CITATIONS
19	The final meltdown of dead-ice at the Holocene Thermal Maximum (8500–7400 cal. yr BP) in western Latvia, eastern Baltic. Holocene, 2017, 27, 1146-1157.	1.7	13
20	Dating early Holocene palaeoseismic event(s) in the Gulf of Bothnia, Baltic Sea. Boreas, 2007, 36, 56-64.	2.4	10
21	Development of large shallow Lake Peipsi (North-Eastern Europe) over the Holocene based on the stratigraphy of phosphorus fractions. Journal of Paleolimnology, 2017, 58, 43-56.	1.6	10
22	Deglaciation chronology of the Pandivere and Palivere ice-marginal zones in Estonia. Geological Quarterly, 0, , 353-362.	0.2	10
23	High-resolution spectroscopic study of pore-water dissolved organic matter in Holocene sediments of Lake Peipsi (Estonia/Russia). Hydrobiologia, 2010, 646, 21-31.	2.0	9
24	Large herbivore population and vegetation dynamics 14,600–8300â€⁻years ago in central Latvia, northeastern Europe. Review of Palaeobotany and Palynology, 2019, 266, 42-51.	1.5	9
25	Late glacial and early Holocene climate and environmental changes in the eastern Baltic area inferred from sediment C/N ratio. Journal of Paleolimnology, 2019, 61, 1-16.	1.6	8
26	Tracking changes in the organic matter in a lake palaeoecosystem: A spectrophotometric approach. Organic Geochemistry, 2008, 39, 915-918.	1.8	6
27	Determining reference conditions of hemiboreal lakes in Latvia, NE Europe: a palaeolimnological approach. Annales De Limnologie, 2018, 54, 22.	0.6	6
28	The Physical and Social Effects of the Kaali Meteorite Impact $\hat{a} \in $ " a Review. , 2007, , 265-275.		6
29	Biostratigraphy, shoreline changes and origin of the Limnea Sea lagoons in northern Estonia: a case study of Lake Harku. Baltica, 2014, 27, 15-24.	0.3	6
30	A 10,000 year record of sediment pore-water dissolved organic matter characteristics from Lake Peipsi as revealed by HPSEC. Chemistry and Ecology, 2010, 26, 13-24.	1.6	5
31	A comparison of the palaeolimnology of Peipsi and Võrtsjä⁄: connected shallow lakes in north-eastern Europe for the twentieth century, especially in relation to eutrophication progression and water-level fluctuations. Hydrobiologia, 2013, 710, 227-240.	2.0	5
32	Postglacial flooding and vegetation history on the Ob River terrace, central Western Siberia based on the palaeoecological record from Lake Svetlenkoye. Holocene, 2020, 30, 618-631.	1.7	5
33	Environmental drivers and abrupt changes of phytoplankton community in temperate lake Lielais Svētiņu, Eastern Latvia, over the last Post-Glacial period from 14.5 kyr. Quaternary Science Reviews, 2021, 263, 107006.	3.0	5
34	Drastic changes in lake ecosystem development as a consequence of flax retting: a multiproxy palaeolimnological study of Lake Kooraste Linajäv, Estonia. Vegetation History and Archaeobotany, 2017, 27, 437.	2.1	1
