

Florence H Sheehan

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/12003954/florence-h-sheehan-publications-by-year.pdf>

Version: 2024-04-28

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
30	Comparison of systemic right ventricular function in transposition of the great arteries after atrial switch and congenitally corrected transposition of the great arteries. <i>International Journal of Cardiovascular Imaging</i> , 2017 , 33, 1993-2001	2.5	13
29	Correlation of right ventricular ejection fraction and tricuspid annular plane systolic excursion in tetralogy of Fallot by magnetic resonance imaging. <i>International Journal of Cardiovascular Imaging</i> , 2009 , 25, 263-70	2.5	70
28	Ventricular Shape and Function 2007 , 212-236		
27	Evaluation of midwall systolic function in left ventricular hypertrophy: a comparison of 3-dimensional versus 2-dimensional echocardiographic indices. <i>Journal of the American Society of Echocardiography</i> , 2006 , 19, 802-10	5.8	11
26	Defining normal left ventricular wall motion from contrast ventriculograms. <i>Physiological Measurement</i> , 2003 , 24, 785-92	2.9	2
25	Three-dimensional assessment of two-dimensional technique for evaluation of right ventricular function by tricuspid annulus motion. <i>International Journal of Cardiovascular Imaging</i> , 2003 , 19, 189-97		31
24	Cardioprotective effects of the Na(+)/H(+) exchange inhibitor cariporide in patients with acute anterior myocardial infarction undergoing direct PTCA. <i>Circulation</i> , 2000 , 101, 2902-8	16.7	189
23	Three-dimensional echocardiographic assessment of annular shape changes in the normal and regurgitant mitral valve. <i>American Heart Journal</i> , 2000 , 139, 378-87	4.9	158
22	Measurement of postsystolic shortening to assess viability and predict recovery of left ventricular function after acute myocardial infarction. <i>Journal of the American College of Cardiology</i> , 2000 , 35, 1842-9	15.1	59
21	Three-dimensional measurement of the mitral annulus by multiplane transesophageal echocardiography: in vitro validation and in vivo demonstration. <i>Journal of the American Society of Echocardiography</i> , 1998 , 11, 188-200	5.8	35
20	Myocyte degeneration and cell death in hibernating human myocardium. <i>Journal of the American College of Cardiology</i> , 1996 , 27, 1577-85	15.1	119
19	Recovery of regional left ventricular dysfunction after coronary revascularization. Impact of myocardial viability assessed by nuclear imaging and vessel patency at follow-up angiography. <i>Journal of the American College of Cardiology</i> , 1996 , 28, 948-58	15.1	80
18	Extension of hypokinesia into angiographically perfused myocardium in patients with acute infarction. <i>Journal of the American College of Cardiology</i> , 1993 , 22, 1010-5	15.1	6
17	A difference between front-loaded streptokinase and standard-dose recombinant tissue-type plasminogen activator in preserving left ventricular function after acute myocardial infarction (the Central Illinois Thrombolytic Therapy Study). <i>American Journal of Cardiology</i> , 1993 , 72, 1010-4	3	9
16	Factors influencing outcome of regional wall motion after successful elective single-vessel percutaneous transluminal coronary angioplasty. <i>Coronary Artery Disease</i> , 1992 , 3, 489-498	1.4	4
15	Early beneficial effect of streptokinase on left ventricular function in acute myocardial infarction. <i>American Journal of Cardiology</i> , 1991 , 67, 555-8	3	11
14	Prehospital thrombolysis in acute myocardial infarction. <i>American Journal of Cardiology</i> , 1990 , 66, 1429-33		97

13	Left ventricular dysfunction in acute myocardial infarction due to isolated left circumflex coronary artery stenosis. <i>American Journal of Cardiology</i> , 1989 , 64, 440-7	3	15
12	Evolution of left ventricular function after intracoronary thrombolysis for acute myocardial infarction. <i>American Journal of Cardiology</i> , 1989 , 63, 497-502	3	55
11	Lack of correlation after reperfusion between ventricular function and infarct size estimated by thallium single-photon emission computed tomography. <i>International Journal of Cardiovascular Imaging</i> , 1988 , 3, 203-8		2
10	Improved survival up to four years after early coronary thrombolysis. <i>American Journal of Cardiology</i> , 1988 , 61, 524-9	3	50
9	Limitations in the interpretation of rest-exercise ejection fraction changes after early thrombolytic therapy during acute myocardial infarction. <i>American Journal of Cardiology</i> , 1988 , 61, 743-8	3	3
8	Early recovery of left ventricular function after thrombolytic therapy for acute myocardial infarction: an important determinant of survival. <i>Journal of the American College of Cardiology</i> , 1988 , 12, 289-300	15.1	175
7	Coronary thrombolysis with intravenous urokinase in patients with acute myocardial infarction. <i>American Journal of Medicine</i> , 1987 , 83, 26-30	2.4	65
6	Determinants of improved left ventricular function after thrombolytic therapy in acute myocardial infarction. <i>Journal of the American College of Cardiology</i> , 1987 , 9, 937-44	15.1	48
5	Unreliability of the electrocardiogram in predicting left ventricular function recovery after thrombolysis. <i>American Journal of Cardiology</i> , 1987 , 60, 645	3	1
4	Measurement of improvement of left ventricular function after reperfusion using left ventricular angiography 1986 , 91-100		0
3	Time from onset of symptoms to thrombolytic therapy: a major determinant of myocardial salvage in patients with acute transmural infarction. <i>Journal of the American College of Cardiology</i> , 1985 , 6, 518-25	15.1	147
2	Intravenous urokinase in acute myocardial infarction. <i>American Journal of Cardiology</i> , 1985 , 55, 878-82	3	162
1	Effect of interventions in salvaging left ventricular function in acute myocardial infarction: a study of intracoronary streptokinase. <i>American Journal of Cardiology</i> , 1983 , 52, 431-8	3	245
