Hasan Turhan

List of Publications by Year in Descending Order

52 papers	1,144 citations	22 h-index	33 g-index
52 ext. papers	1,228 ext. citations	2.7 avg, IF	3.35 L-index

#	Paper	IF	Citations
52	Symptoms in Dilating Venous Disease. *Current Cardiology Reviews*, **2020**, 16, 164-172	2.4	4
51	The impact of metabolic syndrome on left ventricular function: evaluated by using the index of myocardial performance. *International Journal of Cardiology*, **2009**, 132, 382-6	3.2	18
50	Bone mineral density and frequency of coronary heart disease. *American Journal of Cardiology*, **2008**, 101, 1680	3	
49	Increased P-wave dispersion in patients with Behçet's disease: is there an exaggeration in explaining the meaning?. *International Journal of Cardiology*, **2008**, 129, 302-3	3.2	
48	Evaluation of cardiovascular risk factors and bone mineral density in post menopausal women undergoing coronary angiography. *International Journal of Cardiology*, **2008**, 131, 66-9	3.2	32
47	Increased dilator response to nitrate and decreased flow-mediated dilatation in migraineurs. *Headache*, **2007**, 47, 104-10	4.2	38
46	Is it worthwhile to test statin in migraine?. *Headache*, **2007**, 47, 448-50	4.2	4
45	Evaluation of cardiovascular risk factors and bone mineral density in patients undergoing coronary angiography and relation of findings to mitral annular calcium. *American Journal of Cardiology*, **2007**, 99, 159-62	3	8
44	Changes in bone mineral composition at the arm after coronary artery bypass grafting surgery. *American Journal of Cardiology*, **2007**, 100, 559	3	1
43	Increased plasma levels of cystatin C and transforming growth factor-beta1 in patients with coronary artery ectasia: can there be a potential interaction between cystatin C and transforming growth factor-beta1. *Coronary Artery Disease*, **2007**, 18, 211-4	1.4	13
42	Increased platelet activity in patients with isolated coronary artery ectasia. *Coronary Artery Disease*, **2007**, 18, 451-4	1.4	22
41	Cocaine-induced acute myocardial infarction in young individuals with otherwise normal coronary risk profile: is coronary microvascular dysfunction one of the underlying mechanisms?. *International Journal of Cardiology*, **2007**, 114, 106-7	3.2	15
40	Does metabolic syndrome attenuate the advantages of being a young woman regarding the risk of cardiovascular disease?. *International Journal of Cardiology*, **2007**, 114, 277-8	3.2	3
39	What are the impacts of chronic subclinic inflammation in patients with rheumatic mitral stenosis?. *International Journal of Cardiology*, **2007**, 117, 140	3.2	2
38	Coronary artery ectasia: is it a destructive inflammatory lesion of the vascular wall?. *International Journal of Cardiology*, **2007**, 118, 241	3.2	6
37	Effects of smoking on myocardial infarction at early ages. *International Journal of Cardiology*, **2007**, 120, 134-5; author reply 136-7	3.2	4
36	Increased plasma soluble adhesion molecules; ICAM-1, VCAM-1, and E-selectin levels in patients with slow coronary flow. *International Journal of Cardiology*, **2006**, 108, 224-30	3.2	94

35	Aborted sudden cardiac death in a 20-year-old man with slow coronary flow. *International Journal of Cardiology*, **2006**, 109, 427-9	3.2	28
34	Does gender modify the detrimental coronary effects of metabolic syndrome?. *International Journal of Cardiology*, **2006**, 110, 261-2	3.2	1
33	Poor in-hospital outcome in young women with acute myocardial infarction. Does metabolic syndrome play a role?. *International Journal of Cardiology*, **2006**, 112, 257-8	3.2	2
32	Coronary vasospasm due to hypercholinergic crisis: an example of normal coronary arteriogram and myocardial infarction. *International Journal of Cardiology*, **2006**, 113, 270-1	3.2	2
31	Homocysteine and coronary microcirculation: is it a microvasculopathic agent?. *International Journal of Cardiology*, **2006**, 110, 269-70	3.2	4
30	Impact of high altitude on flow-mediated dilatation: is it more pronounced in metabolic syndrome?. *International Journal of Cardiology*, **2006**, 111, 472-3	3.2	
29	Atrial fibrillation recurrence after cardioversion: is there a simple electrocardiographic parameter to predict it?. *International Journal of Cardiology*, **2006**, 113, 435-6	3.2	2
28	Is it necessary to add fibrate to statin therapy in the management of dyslipidemia of metabolic syndrome?. *International Journal of Cardiology*, **2006**, 110, 276-7	3.2	2
27	The relation between insulin resistance and slow coronary flow: the development of microvascular dysfunction in insulin resistant state may be a plausible explanation. *International Journal of Cardiology*, **2006**, 111, 474-5	3.2	1
26	Decreased endothelium-dependent vasodilatation in patients with migraine: a new aspect to vascular pathophysiology of migraine. *Coronary Artery Disease*, **2006**, 17, 29-33	1.4	40
25	Impact of metabolic syndrome on myocardial perfusion grade after primary percutaneous coronary intervention in patients with acute ST elevation myocardial infarction. *Coronary Artery Disease*, **2006**, 17, 339-43	1.4	14
24	Decreased nitrate-mediated dilatation in patients with coronary artery ectasia: an ultrasonographic evaluation of brachial artery. *Coronary Artery Disease*, **2006**, 17, 365-9	1.4	7
23	Increased thrombolysis in myocardial infarction frame count in patients with myocardial infarction and normal coronary arteriogram: a possible link between slow coronary flow and myocardial infarction. *Atherosclerosis*, **2005**, 181, 193-9	3.1	34
22	Effects of long-term beta-blocker therapy on P-wave duration and dispersion in patients with rheumatic mitral stenosis. *International Journal of Cardiology*, **2005**, 102, 33-7	3.2	29
21	Elevated level of plasma homocysteine in patients with slow coronary flow. *International Journal of Cardiology*, **2005**, 102, 419-23	3.2	48
20	Plasma homocysteine levels in patients with isolated coronary artery ectasia. *International Journal of Cardiology*, **2005**, 104, 158-62	3.2	15
19	Aneurismal disease of different vascular territories: is it a rare association?. *International Journal of Cardiology*, **2005**, 105, 100-1	3.2	2
18	Increased prevalence of varicocele in patients with coronary artery ectasia. *Coronary Artery Disease*, **2005**, 16, 261-4	1.4	48

17	Plasma soluble adhesion molecules; intercellular adhesion molecule-1, vascular cell adhesion molecule-1 and E-selectin levels in patients with isolated coronary artery ectasia. *Coronary Artery Disease*, **2005**, 16, 45-50	1.4	80
16	Decreased carotid intima-media thickness in patients with coronary artery ectasia compared with patients with coronary artery disease. *Coronary Artery Disease*, **2005**, 16, 495-8	1.4	18
15	Impaired coronary collateral vessel development in patients with metabolic syndrome. *Coronary Artery Disease*, **2005**, 16, 281-5	1.4	31
14	High prevalence of metabolic syndrome among young women with premature coronary artery disease. *Coronary Artery Disease*, **2005**, 16, 37-40	1.4	40
13	Aortic valve calcification: association with bone mineral density and cardiovascular risk factors. *Coronary Artery Disease*, **2005**, 16, 379-83	1.4	42
12	Impaired coronary collateral vessel development in patients with proliferative diabetic retinopathy. *Clinical Cardiology*, **2005**, 28, 384-8	3.3	16
11	P-wave duration and P-wave dispersion in patients with dilated cardiomyopathy. *European Journal of Heart Failure*, **2004**, 6, 567-9	12.3	45
10	Comparison of C-reactive protein levels in patients with coronary artery ectasia versus patients with obstructive coronary artery disease. *American Journal of Cardiology*, **2004**, 94, 1303-6	3	85
9	Increased thrombolysis in myocardial infarction frame counts in patients with isolated coronary artery ectasia. *Heart and Vessels*, **2004**, 19, 23-6	2.1	33
8	Documentation of slow coronary flow by the thrombolysis in myocardial infarction frame count in habitual smokers with angiographically normal coronary arteries. *Heart and Vessels*, **2004**, 19, 271-4	2.1	16
7	Impaired coronary blood flow in patients with metabolic syndrome: documented by Thrombolysis in Myocardial Infarction (TIMI) frame count method. *American Heart Journal*, **2004**, 148, 789-94	4.9	38
6	Changes in plasma levels of adhesion molecules after percutaneous mitral balloon valvuloplasty. *Cardiovascular Pathology*, **2004**, 13, 103-8	3.8	7
5	Comparison of P-wave duration and dispersion in patients aged > or =65 years with those aged Journal of Electrocardiology, **2003**, 36, 321-6	1.4	11
4	Increased p-wave duration and p-wave dispersion in patients with aortic stenosis. *Annals of Noninvasive Electrocardiology*, **2003**, 8, 18-21	1.5	37
3	Effects of slow coronary artery flow on QT interval duration and dispersion. *Annals of Noninvasive Electrocardiology*, **2003**, 8, 107-11	1.5	28
2	Effects of percutaneous mitral balloon valvuloplasty on P-wave dispersion in patients with mitral stenosis. *American Journal of Cardiology*, **2002**, 89, 607-9	3	41
1	Levels of circulating adhesion molecules in rheumatic mitral stenosis. *American Journal of Cardiology*, **2001**, 88, 1209-11	3	33
