#	ARTICLE	IF	CITATIONS
1	Impaired Insulin Sensitivity, Insulin Secretion, and Glucose Effectiveness Predict Future Development of Impaired Glucose Tolerance and Type 2 Diabetes in Pre-Diabetic African Americans: Implications for primary diabetes prevention. <i>Diabetes Care</i> , 2004, 27, 1439-1446.	8.6	112
2	Is Glycosylated Hemoglobin A1c a Surrogate for Metabolic Syndrome in Nondiabetic, First-Degree Relatives of African-American Patients with Type 2 Diabetes?. <i>Journal of Clinical Endocrinology and Metabolism</i> , 2003, 88, 4596-4601.	3.6	74
3	Plasma Adiponectin Levels in High Risk African Americans with Normal Glucose Tolerance, Impaired Glucose Tolerance, and Type 2 Diabetes. <i>Obesity</i> , 2005, 13, 179-185.	4.0	41
4	Effects of rosiglitazone on plasma adiponectin, insulin sensitivity, and insulin secretion in high-risk African Americans with impaired glucose tolerance test and type 2 diabetes. <i>Metabolism: Clinical and Experimental</i> , 2004, 53, 1552-1557.	3.4	40
5	Disparities in Cardiovascular Disease and Type 2 Diabetes Risk Factors in Blacks and Whites: Dissecting Racial Paradox of Metabolic Syndrome. <i>Frontiers in Endocrinology</i> , 2017, 8, 204.	3.5	37
6	Metabolic syndrome in nondiabetic, obese, first-degree relatives of African American patients with type 2 diabetes: African American triglycerides-HDL-C and insulin resistance paradox. <i>Ethnicity and Disease</i> , 2006, 16, 830-6.	2.3	33
7	Metabolic syndrome in Black people of the African diaspora: the paradox of current classification, definition and criteria. <i>Ethnicity and Disease</i> , 2009, 19, S2-1-7.	2.3	27
8	Differential impact of serum glucose, triglycerides, and high-density lipoprotein cholesterol on cardiovascular risk factor burden in nondiabetic, obese African American women: implications for the prevalence of metabolic syndrome. <i>Metabolism: Clinical and Experimental</i> , 2010, 59, 1115-1123.	3.4	24
9	Thiazolidinediones increase hepatic insulin extraction in African Americans with impaired glucose tolerance and type 2 diabetes mellitus. A pilot study of rosiglitazone. <i>Metabolism: Clinical and Experimental</i> , 2007, 56, 24-29.	3.4	17
10	HDL Dysfunctionality (Paraoxonase) Is Worse in Nondiabetic, Postmenopausal African American Than in White Women. <i>Diabetes Care</i> , 2011, 34, e19-e19.	8.6	15
11	Comparative Study of Glucose Homeostasis, Lipids and Lipoproteins, HDL Functionality, and Cardiometabolic Parameters in Modestly Severely Obese African Americans and White Americans With Prediabetes: Implications for the Metabolic Paradoxes. <i>Diabetes Care</i> , 2015, 38, 228-235.	8.6	13
12	Ethnic differences in serum lipids and lipoproteins in overweight/obese African-American and white American women with pre-diabetes: significance of NMR-derived lipoprotein particle concentrations and sizes. <i>BMJ Open Diabetes Research and Care</i> , 2016, 4, e000246.	2.8	12
13	Consequences of Abdominal Adiposity within the Metabolic Syndrome Paradigm in Black People of African Ancestry. <i>Journal of Clinical Medicine</i> , 2014, 3, 897-912.	2.4	11
14	Guidelines for Stroke Survivors With Diabetes Mellitus. <i>Stroke</i> , 2018, 49, e215-e217.	2.0	11
15	Impact of Metformin on Glucose Metabolism in Nondiabetic, Obese African Americans: A placebo-controlled, 24-month randomized study. <i>Diabetes Care</i> , 2004, 27, 2768-2769.	8.6	10
16	Independent role of blood pressure on cardiovascular risk factors in nondiabetic, obese African-American women with family history of type 2 diabetes: Implications for metabolic syndrome components. <i>Journal of the American Society of Hypertension</i> , 2009, 3, 25-34.	2.3	10
17	Metabolic effects of chronic glipizide gastrointestinal therapeutic system on serum glucose, insulin secretion, insulin sensitivity, and hepatic insulin extraction in glucose-tolerant, first-degree relatives of African American patients with type 2 diabetes: New insights on mechanisms of action. <i>Metabolism: Clinical and Experimental</i> , 2003, 52, 565-572.	3.4	9
18	Ethnic differences in glucose effectiveness and disposition index in overweight/obese African American and white women with prediabetes: A study of compensatory mechanisms. <i>Diabetes Research and Clinical Practice</i> , 2017, 130, 278-285.	2.8	8

#	ARTICLE	IF	CITATIONS
19	Insulin resistance, beta cell function and cardiovascular risk factors in Ghanaians with varying degrees of glucose tolerance. <i>Ethnicity and Disease</i> , 2002, 12, S3-10-7.	2.3	8
20	Insulin Resistance and Cardiovascular Disease Risk in Black People of the African Diaspora. <i>Current Cardiovascular Risk Reports</i> , 2010, 4, 186-194.	2.0	5
21	Pathogenic Mechanisms of Prediabetes in Obese vs. Very Obese African American Women: Implications for Diabetes Prevention. <i>Journal of the National Medical Association</i> , 2019, 111, 76-82.	0.8	2
22	Response to Comment on: Gaillard et al. HDL Dysfunctionalilty (Paraoxonase) Is Worse in Nondiabetic, Postmenopausal African American Than in White Women. <i>Diabetes Care</i> 2011;34:e19. <i>Diabetes Care</i> , 2011, 34, e151-e151.	8.6	1
23	Abstract 25: Mild Cognitive Impairment the New Risk Factor for Stroke?. <i>Stroke</i> , 2017, 48, .	2.0	0
24	Factors Associated with Self-Reported Hypertension Among Black Women. <i>Journal of National Black Nurses' Association: JNBNA</i> , 2020, 31, 32-38.	0.4	0
