David Barner

List of Publications by Year in Descending Order

Source: https://exaly.com/author-pdf/12059754/david-barner-publications-by-year.pdf

Version: 2024-04-20

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

73	2,051	27	44
papers	citations	h-index	g-index
75 ext. papers	2,481 ext. citations	3.1 avg, IF	5.47 L-index

#	Paper	IF	Citations
73	Assessing the knower-level framework: How reliable is the Give-a-Number task?. <i>Cognition</i> , 2022 , 222, 104998	3.5	O
72	Counting and the ontogenetic origins of exact equality. <i>Cognition</i> , 2022 , 218, 104952	3.5	O
71	Starting small: exploring the origins of successor function knowledge. <i>Developmental Science</i> , 2021 , 24, e13091	4.5	1
70	Numerical Symbols as Explanations of Human Perceptual Experience 2021 , 201-242		
69	Do children derive exact meanings pragmatically? Evidence from a dual morphology language. <i>Cognition</i> , 2021 , 207, 104527	3.5	1
68	What Counts? Sources of Knowledge in Children's Acquisition of the Successor Function. <i>Child Development</i> , 2021 , 92, e476-e492	4.9	3
67	Disjunction Triggers Exhaustivity Implicatures in 4- to 5-Year-Olds: Investigating the Role of Access to Alternatives. <i>Journal of Semantics</i> , 2020 , 37, 219-245	0.8	O
66	Do Children Interpret Briconjunctively?. <i>Journal of Semantics</i> , 2020 , 37, 247-267	0.8	3
65	Lexical, syntactic, and pragmatic sources of countability. Language Faculty and Beyond, 2020, 159-190	0.2	
64	Language-specific numerical estimation in bilingual children. <i>Journal of Experimental Child Psychology</i> , 2020 , 197, 104860	2.3	2
63	Do children use language structure to discover the recursive rules of counting?. <i>Cognitive Psychology</i> , 2020 , 117, 101263	3.1	6
62	Counting to Infinity: Does Learning the Syntax of the Count List Predict Knowledge That Numbers Are Infinite?. <i>Cognitive Science</i> , 2020 , 44, e12875	2.2	2
61	Differentiating scalar implicature from exclusion inferences in language acquisition. <i>Journal of Child Language</i> , 2019 , 46, 733-759	2.3	2
60	Ontogenetic Origins of Human Integer Representations. <i>Trends in Cognitive Sciences</i> , 2019 , 23, 823-835	14	50
59	Contrast and entailment: Abstract logical relations constrain how 2- and 3-year-old children interpret unknown numbers. <i>Cognition</i> , 2019 , 183, 192-207	3.5	2
58	Discourse Coherence as a Cue to Reference in Word Learning: Evidence for Discourse Bootstrapping. <i>Cognitive Science</i> , 2019 , 43, e12702	2.2	4
57	Do children's number words begin noisy?. <i>Developmental Science</i> , 2019 , 22, e12752	4.5	19

(2016-2018)

56	The Role of Design and Training in Artifact Expertise: The Case of the Abacus and Visual Attention. <i>Cognitive Science</i> , 2018 , 42 Suppl 3, 757-782	2.2	3	
55	Partial Color Word Comprehension Precedes Production. <i>Language Learning and Development</i> , 2018 , 14, 241-261	1.3	3	
54	Scalar Implicature in Absence of Epistemic Reasoning? The Case of Autism Spectrum Disorder. Language Learning and Development, 2018 , 14, 224-240	1.3	23	
53	The Role of Gesture in Supporting Mental Representations: The Case of Mental Abacus Arithmetic. <i>Cognitive Science</i> , 2018 , 42, 554-575	2.2	29	
52	Most Preschoolers Don EKnow Most. Language Learning and Development, 2018, 14, 320-338	1.3	3	
51	Quantity judgment and the mass-count distinction across languages: Advances, problems, and future directions for research. <i>Glossa</i> , 2018 , 3,	1.2	3	
50	Chapter 14. Four-year-old children compute scalar implicatures in absence of epistemic reasoning. <i>Trends in Language Acquisition Research</i> , 2018 , 326-349	0.2	4	
49	Analogical Mapping in Numerical Development 2018 , 31-47		3	
48	The mental timeline is gradually constructed in childhood. <i>Developmental Science</i> , 2018 , 21, e12679	4.5	19	
47	To infinity and beyond: Children generalize the successor function to all possible numbers years after learning to count. <i>Cognitive Psychology</i> , 2017 , 92, 22-36	3.1	43	
46	Language, procedures, and the non-perceptual origin of number word meanings. <i>Journal of Child Language</i> , 2017 , 44, 553-590	2.3	28	
45	Today is tomorrow's yesterday: Children's acquisition of deictic time words. <i>Cognitive Psychology</i> , 2017 , 92, 87-100	3.1	41	
44	Learning language from within: Children use semantic generalizations to infer word meanings. <i>Cognition</i> , 2017 , 159, 11-24	3.5	9	
43	Discourse bootstrapping: preschoolers use linguistic discourse to learn new words. <i>Developmental Science</i> , 2016 , 19, 63-75	4.5	20	
42	Does Grammatical Structure Accelerate Number Word Learning? Evidence from Learners of Dual and Non-Dual Dialects of Slovenian. <i>PLoS ONE</i> , 2016 , 11, e0159208	3.7	27	
41	Intensive math training does not affect approximate number acuity: Evidence from a three-year longitudinal curriculum intervention. <i>Journal of Numerical Cognition</i> , 2016 , 2, 57-76	1.6	12	
40	Encoding individuals in language using syntax, words, and pragmatic inference. <i>Wiley Interdisciplinary Reviews: Cognitive Science</i> , 2016 , 7, 341-53	4.5	3	
39	Inferring Number, Time, and Color Concepts from Core Knowledge and Linguistic Structure 2016 , 105-	126	3	

38	Do attitudes toward societal structure predict beliefs about free will and achievement? Evidence from the Indian caste system. <i>Developmental Science</i> , 2016 , 19, 109-25	4.5	8
37	Learning the language of time: Children's acquisition of duration words. <i>Cognitive Psychology</i> , 2015 , 78, 57-77	3.1	28
36	Why is number word learning hard? Evidence from bilingual learners. <i>Cognitive Psychology</i> , 2015 , 83, 1-21	3.1	26
35	The development of structural analogy in number-line estimation. <i>Journal of Experimental Child Psychology</i> , 2014 , 128, 171-89	2.3	25
34	Ignorance and Inference: Do Problems with Gricean Epistemic Reasoning Explain Children Difficulty with Scalar Implicature?. <i>Journal of Semantics</i> , 2014 , ffu015	0.8	17
33	Inference and association in children's early numerical estimation. <i>Child Development</i> , 2014 , 85, 1740-5	5 4.9	48
32	Grammatical morphology as a source of early number word meanings. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2013 , 110, 18448-53	11.5	60
31	Sortal concepts and pragmatic inference in children's early quantification of objects. <i>Cognitive Psychology</i> , 2013 , 66, 302-26	3.1	10
30	Slow mapping: color word learning as a gradual inductive process. <i>Cognition</i> , 2013 , 127, 307-17	3.5	26
29	How are number words mapped to approximate magnitudes?. <i>Quarterly Journal of Experimental Psychology</i> , 2013 , 66, 389-402	1.8	34
28	Pragmatic inference, not semantic competence, guides 3-year-olds' interpretation of unknown number words. <i>Developmental Psychology</i> , 2013 , 49, 1066-75	3.7	14
27	Grammatical Alternatives and Pragmatic Development 2013 , 238-266		4
26	Is two a plural marker in early child language?. Developmental Psychology, 2012, 48, 10-7	3.7	7
25	Bootstrapping Numeral Meanings and the Origin of Exactness. <i>Language Learning and Development</i> , 2012 , 8, 177-185	1.3	14
24	Does learning to count involve a semantic induction?. <i>Cognition</i> , 2012 , 123, 162-73	3.5	124
23	Representing exact number visually using mental abacus. <i>Journal of Experimental Psychology: General</i> , 2012 , 141, 134-49	4.7	81
22	Piecing together numerical language: children's use of default units in early counting and quantification. <i>Developmental Science</i> , 2011 , 14, 44-57	4.5	20
21	Accessing the unsaid: the role of scalar alternatives in children's pragmatic inference. <i>Cognition</i> , 2011 , 118, 84-93	3.5	172

(2005-2011)

20	Number words, quantifiers, and principles of word learning. <i>Wiley Interdisciplinary Reviews: Cognitive Science</i> , 2011 , 2, 639-645	4.5	10
19	Words as windows to thought: The case of object representation. <i>Current Directions in Psychological Science</i> , 2010 , 19, 195-200	6.5	12
18	Inference and exact numerical representation in early language development. <i>Cognitive Psychology</i> , 2010 , 60, 40-62	3.1	108
17	Language, thought, and real nouns. <i>Cognition</i> , 2009 , 111, 329-44	3.5	50
16	Finding one's meaning: a test of the relation between quantifiers and integers in language development. <i>Cognitive Psychology</i> , 2009 , 58, 195-219	3.1	123
15	Cross-linguistic relations between quantifiers and numerals in language acquisition: evidence from Japanese. <i>Journal of Experimental Child Psychology</i> , 2009 , 103, 421-40	2.3	70
14	Does the conceptual distinction between singular and plural sets depend on language?. <i>Developmental Psychology</i> , 2009 , 45, 1644-53	3.7	46
13	Syntactic Cues to Individuation in Mandarin Chinese. <i>Journal of Cognitive Science</i> , 2009 , 10, 135-148	0.5	5
12	Compositionality and statistics in adjective acquisition: 4-year-olds interpret tall and short based on the size distributions of novel noun referents. <i>Child Development</i> , 2008 , 79, 594-608	4.9	39
11	Free-ranging rhesus monkeys spontaneously individuate and enumerate small numbers of non-solid portions. <i>Cognition</i> , 2008 , 106, 207-21	3.5	31
10	Events and the ontology of individuals: verbs as a source of individuating mass and count nouns. <i>Cognition</i> , 2008 , 106, 805-32	3.5	40
9	Evidence for a non-linguistic distinction between singular and plural sets in rhesus monkeys. <i>Cognition</i> , 2008 , 107, 603-22	3.5	39
8	Classifiers as Count Syntax: Individuation and Measurement in the Acquisition of Mandarin Chinese. <i>Language Learning and Development</i> , 2008 , 4, 249	1.3	38
7	In defense of intuitive mathematical theories as the basis for natural number. <i>Behavioral and Brain Sciences</i> , 2008 , 31, 643-644	0.9	
6	Evolutionary Linguistics: A New Look at an Old Landscape. <i>Language Learning and Development</i> , 2007 , 3, 101-132	1.3	25
5	On the relation between the acquisition of singular-plural morpho-syntax and the conceptual distinction between one and more than one. <i>Developmental Science</i> , 2007 , 10, 365-73	4.5	90
4	Children's Early Understanding of Mass-Count Syntax: Individuation, Lexical Content, and the Number Asymmetry Hypothesis. <i>Language Learning and Development</i> , 2006 , 2, 163-194	1.3	48
3	No nouns, no verbs? A rejoinder to Panagiotidis. <i>Lingua</i> , 2005 , 115, 1169-1179	0.7	6

Quantity judgments and individuation: evidence that mass nouns count. *Cognition*, **2005**, 97, 41-66

3.5 152

No nouns, no verbs: psycholinguistic arguments in favor of lexical underspecification. *Lingua*, **2002**, 112, 771-791

0.7 30
