

Sandra Ulrich Ngueveu

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/12064191/sandra-ulrich-ngueveu-publications-by-year.pdf>

Version: 2024-04-29

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
10	Lower and upper bounds for scheduling energy-consuming tasks with storage resources and piecewise linear costs. <i>Journal of Heuristics</i> , 2022 , 28, 93	1.9	
9	Exact methods for mono-objective and Bi-Objective Multi-Vehicle Covering Tour Problems. <i>European Journal of Operational Research</i> , 2020 , 283, 812-824	5.6	7
8	Price of anarchy and price of stability in multi-agent project scheduling. <i>Annals of Operations Research</i> , 2020 , 285, 97-119	3.2	4
7	Piecewise linear bounding of univariate nonlinear functions and resulting mixed integer linear programming-based solution methods. <i>European Journal of Operational Research</i> , 2019 , 275, 1058-1071	5.6	3
6	The multi-vehicle cumulative covering tour problem. <i>Annals of Operations Research</i> , 2017 , 258, 761-780	3.2	13
5	A dynamic programming operator for tour location problems applied to the covering tour problem. <i>Journal of Heuristics</i> , 2017 , 23, 53-80	1.9	3
4	Finding an optimal Nash equilibrium to the multi-agent project scheduling problem. <i>Journal of Scheduling</i> , 2017 , 20, 475-491	1.6	7
3	Scheduling under a non-reversible energy source: An application of piecewise linear bounding of non-linear demand/cost functions. <i>Discrete Applied Mathematics</i> , 2016 , 208, 98-113	1	5
2	A Selector Operator-Based Adaptive Large Neighborhood Search for the Covering Tour Problem. <i>Lecture Notes in Computer Science</i> , 2015 , 170-185	0.9	2
1	An effective memetic algorithm for the cumulative capacitated vehicle routing problem. <i>Computers and Operations Research</i> , 2010 , 37, 1877-1885	4.6	141
