#	ARTICLE	IF	CITATIONS
1	The Influence of Sensation Level on Speech-Evoked Envelope Following Responses. <i>Ear and Hearing</i> , 2022, 43, 250-254.	1.0	5
2	Performance of Statistical Indicators in the Objective Detection of Speech-Evoked Envelope Following Responses. <i>Ear and Hearing</i> , 2022, 43, 1669-1677.	1.0	1
3	The Influence of Vowel Identity, Vowel Production Variability, and Consonant Environment on Envelope Following Responses. <i>Ear and Hearing</i> , 2021, 42, 662-672.	1.0	6
4	Montage-related Variability in the Characteristics of Envelope Following Responses. <i>Ear and Hearing</i> , 2021, Publish Ahead of Print, 1436-1440.	1.0	1
5	Test-Retest Variability in the Characteristics of Envelope Following Responses Evoked by Speech Stimuli. <i>Ear and Hearing</i> , 2020, 41, 150-164.	1.0	17
6	The Accuracy of Envelope Following Responses in Predicting Speech Audibility. <i>Ear and Hearing</i> , 2020, 41, 1732-1746.	1.0	12
7	Investigating potential interactions between envelope following responses elicited simultaneously by different vowel formants. <i>Hearing Research</i> , 2019, 380, 35-45.	0.9	13
8	Phase delays between tone pairs reveal interactions in scalp-recorded envelope following responses. <i>Neuroscience Letters</i> , 2018, 665, 257-262.	1.0	17
9	Cochlear Delay and Medial Olivocochlear Functioning in Children with Suspected Auditory Processing Disorder. <i>PLoS ONE</i> , 2015, 10, e0136906.	1.1	17
10	Sensitivity of envelope following responses to vowel polarity. <i>Hearing Research</i> , 2015, 320, 38-50.	0.9	20
11	Influence of 100Hz amplitude modulation on the human medial olivocochlear reflex. <i>Neuroscience Letters</i> , 2014, 580, 56-61.	1.0	10
12	Human auditory steady-state responses: Respuestas auditivas de estado estable en humanos. <i>International Journal of Audiology</i> , 2003, 42, 177-219.	0.9	730
