

Dirk Muller

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/12090457/dirk-muller-publications-by-year.pdf>

Version: 2024-04-26

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
100	State of the Art of Technologies in Adaptive Dynamic Building Envelopes (ADBEs). <i>Energies</i> , 2022 , 15, 829	3.1	2
99	Evaluating heat pump system design methods towards a sustainable heat supply in residential buildings. <i>Applied Energy</i> , 2022 , 308, 118204	10.7	4
98	Optimal scheduling of modernization measures for typical non-residential buildings. <i>Energy</i> , 2022 , 238, 121871	7.9	3
97	Enhancing Building Monitoring and Control for District Energy Systems: Technology Selection and Installation within the Living Lab Energy Campus. <i>Applied Sciences (Switzerland)</i> , 2022 , 12, 3305	2.6	1
96	Influence of gender, age and BMI on human physiological response and thermal sensation for transient indoor environments with displacement ventilation. <i>Building and Environment</i> , 2022 , 109045	6.5	0
95	Nonlinear Distributed Model Predictive Control for multi-zone building energy systems. <i>Energy and Buildings</i> , 2022 , 264, 112066	7	1
94	Operational optimization of a 4th generation district heating network with mixed integer quadratically constrained programming. <i>Energy</i> , 2022 , 250, 123766	7.9	0
93	Modular hydronic subsystem models for testing and improving control algorithms of air-handling units. <i>Journal of Building Engineering</i> , 2022 , 104439	5.2	0
92	Comparative study of supervised algorithms for topology detection of sensor networks in building energy systems. <i>Automation in Construction</i> , 2022 , 138, 104248	9.6	
91	IoT Middleware Platforms for Smart Energy Systems: An Empirical Expert Survey. <i>Buildings</i> , 2022 , 12, 526	3.2	0
90	A tool for automated detection of hidden operation modes in building energy systems. <i>Journal of Physics: Conference Series</i> , 2021 , 2042, 012071	0.3	
89	Self-adjusting model predictive control for modular subsystems in HVAC systems. <i>Journal of Physics: Conference Series</i> , 2021 , 2042, 012037	0.3	
88	Towards an integrated design of heat pump systems: Application of process intensification using two-stage optimization. <i>Energy Conversion and Management</i> , 2021 , 250, 114888	10.6	6
87	Temperature control in 5th generation district heating and cooling networks: An MILP-based operation optimization. <i>Applied Energy</i> , 2021 , 288, 116608	10.7	12
86	Monitoring data-driven Reinforcement Learning controller training: A comparative study of different training strategies for a real-world energy system. <i>Energy and Buildings</i> , 2021 , 239, 110856	7	6
85	Temperature control of a low-temperature district heating network with Model Predictive Control and Mixed-Integer Quadratically Constrained Programming. <i>Energy</i> , 2021 , 224, 120140	7.9	7
84	Design optimization of a heating network with multiple heat pumps using mixed integer quadratically constrained programming. <i>Energy</i> , 2021 , 226, 120384	7.9	2

83	Influence of data acquisition on the Bayesian calibration of urban building energy models. <i>Energy and Buildings</i> , 2021 , 230, 110512	7	10
82	Systematische Anwendung des Entscheidungsprozesses zur Arbeitsmittelauswahl für Wärmepumpen. <i>Forschung Im Ingenieurwesen/Engineering Research</i> , 2021 , 85, 21-38	0.8	0
81	On modelling effects in the battery and thermal storage scheduling problem. <i>Journal of Building Performance Simulation</i> , 2021 , 14, 38-51	2.8	0
80	Design optimization of multi-energy systems using mixed-integer linear programming: Which model complexity and level of detail is sufficient?. <i>Energy Conversion and Management</i> , 2021 , 240, 114249	10.6	7
79	Application of data-driven methods for energy system modelling demonstrated on an adaptive cooling supply system. <i>Energy</i> , 2021 , 230, 120894	7.9	4
78	COMANDO: A Next-Generation Open-Source Framework for Energy Systems Optimization. <i>Computers and Chemical Engineering</i> , 2021 , 152, 107366	4	6
77	MILP design optimization of heat pump systems in German residential buildings. <i>Energy and Buildings</i> , 2021 , 249, 111204	7	4
76	Simulation-based design optimization of heat pump systems considering building variations. <i>Energy and Buildings</i> , 2021 , 251, 111310	7	4
75	ACoolHead: Framework for Automated Cooling and Heating Demand calculations using spatially and temporally resolved building performance simulations applied to the estimation of heating demand in Germany. <i>Energy and Buildings</i> , 2021 , 252, 111442	7	2
74	Real-world application of machine-learning-based fault detection trained with experimental data. <i>Energy</i> , 2020 , 198, 117323	7.9	24
73	Quantifying Demand Balancing in Bidirectional Low Temperature Networks. <i>Energy and Buildings</i> , 2020 , 224, 110245	7	10
72	Model compendium, data, and optimization benchmarks for sector-coupled energy systems. <i>Computers and Chemical Engineering</i> , 2020 , 135, 106760	4	5
71	5th Generation District Heating: A novel design approach based on mathematical optimization. <i>Applied Energy</i> , 2020 , 260, 114158	10.7	48
70	Application of two promising Reinforcement Learning algorithms for load shifting in a cooling supply system. <i>Energy and Buildings</i> , 2020 , 229, 110490	7	21
69	EHDO: A free and open-source webtool for designing and optimizing multi-energy systems based on MILP. <i>Computer Applications in Engineering Education</i> , 2020 , 29, 983	1.6	0
68	Self-learning model predictive control for dynamic activation of structural thermal mass in residential buildings. <i>Energy and Buildings</i> , 2020 , 207, 109542	7	13
67	Validation, optimisation and comparison of carbon dioxide-based occupancy estimation algorithms. <i>Indoor and Built Environment</i> , 2020 , 29, 820-834	1.8	1
66	Exergy-based control strategies for the efficient operation of building energy systems. <i>Journal of Cleaner Production</i> , 2019 , 241, 118277	10.3	14

65	Automated data-driven modeling of building energy systems via machine learning algorithms. <i>Energy and Buildings</i> , 2019 , 202, 109384	7	23
64	A time series clustering approach for Building Automation and Control Systems. <i>Applied Energy</i> , 2019 , 238, 1337-1345	10.7	20
63	Application of the second law of thermodynamics to control: A review. <i>Energy</i> , 2019 , 174, 938-953	7.9	13
62	Distributed model predictive control of building energy systems coupled to geothermal fields. <i>Journal of Physics: Conference Series</i> , 2019 , 1343, 012074	0.3	
61	Bidirectional low temperature networks in urban districts: A novel design methodology based on mathematical optimization. <i>Journal of Physics: Conference Series</i> , 2019 , 1343, 012111	0.3	0
60	Automated urban energy system modeling and thermal building simulation based on OpenStreetMap data sets. <i>Building and Environment</i> , 2019 , 149, 630-639	6.5	35
59	Real-life implementation of a linear model predictive control in a building energy system. <i>Journal of Building Engineering</i> , 2019 , 22, 451-463	5.2	11
58	Thermal comfort in environments with different vertical air temperature gradients. <i>Indoor Air</i> , 2019 , 29, 101-111	5.4	15
57	A combined moving boundary and discretized approach for dynamic modeling and simulation of geothermal heat pump systems. <i>Thermal Science and Engineering Progress</i> , 2019 , 9, 215-234	3.6	8
56	Large-scale grid integration of residential thermal energy storages as demand-side flexibility resource: A review of international field studies. <i>Renewable and Sustainable Energy Reviews</i> , 2019 , 101, 527-547	16.2	77
55	Numerical robustness analysis of natural and mechanical smoke extraction systems for buildings. <i>International Journal of Ventilation</i> , 2019 , 18, 79-95	1.1	2
54	Implementation of a solution to the problem of reference environment in the exergy evaluation of building energy systems. <i>Energy</i> , 2018 , 149, 830-836	7.9	9
53	WinProGen: A Markov-Chain-based stochastic window status profile generator for the simulation of realistic energy performance in buildings. <i>Building and Environment</i> , 2018 , 136, 240-258	6.5	16
52	Dynamic modelling and simulation of a slinky-coil horizontal ground heat exchanger using Modelica. <i>Journal of Building Engineering</i> , 2018 , 16, 159-168	5.2	20
51	Data Center Control Strategy for Participation in Demand Response Programs. <i>IEEE Transactions on Industrial Informatics</i> , 2018 , 14, 5087-5099	11.9	25
50	TEASER: an open tool for urban energy modelling of building stocks. <i>Journal of Building Performance Simulation</i> , 2018 , 11, 84-98	2.8	84
49	Distributed exergy-based simulation-assisted control of HVAC supply chains. <i>Energy and Buildings</i> , 2018 , 175, 131-140	7	12
48	Selecting statistical indices for calibrating building energy models. <i>Building and Environment</i> , 2018 , 144, 94-107	6.5	8

47	Comparison of clustering algorithms for the selection of typical demand days for energy system synthesis. <i>Renewable Energy</i> , 2018 , 129, 570-582	8.1	50
46	Bidirectional low temperature district energy systems with agent-based control: Performance comparison and operation optimization. <i>Applied Energy</i> , 2018 , 209, 502-515	10.7	77
45	Mode and storage load based control of a complex building system with a geothermal field. <i>Energy and Buildings</i> , 2018 , 158, 1337-1345	7	7
44	Energy-efficient HVAC management using cooperative, self-trained, control agents: A real-life German building case study. <i>Applied Energy</i> , 2018 , 211, 113-125	10.7	37
43	A novel hybrid agent-based model predictive control for advanced building energy systems. <i>Energy Conversion and Management</i> , 2018 , 178, 415-427	10.6	19
42	Optimal design of decentralized energy conversion systems for smart microgrids using decomposition methods. <i>Energy</i> , 2018 , 156, 250-263	7.9	17
41	A Modelica library for the agent-based control of building energy systems. <i>Applied Energy</i> , 2017 , 193, 52-59	10.7	23
40	Cost optimal sizing of smart buildings energy system components considering changing end-consumer electricity markets. <i>Energy</i> , 2017 , 137, 715-728	7.9	26
39	Modelling diversity in building occupant behaviour: a novel statistical approach. <i>Journal of Building Performance Simulation</i> , 2017 , 10, 527-544	2.8	41
38	Identification and utilization of flexibility in non-residential buildings. <i>Energy Procedia</i> , 2017 , 122, 997-1003	2.3	7
37	Application of selected supervised learning methods for time series classification in Building Automation and Control Systems. <i>Energy Procedia</i> , 2017 , 122, 943-948	2.3	6
36	Dynamic exergy analysis [Modelica]-based tool development: A case study of CHP district heating in Bottrop, Germany. <i>Thermal Science and Engineering Progress</i> , 2017 , 4, 231-240	3.6	17
35	Requirements for flexible districts to provide smart grid demand side services 2017 ,		2
34	Optimal design of energy conversion units for residential buildings considering German market conditions. <i>Energy</i> , 2017 , 139, 895-915	7.9	11
33	Primary energy evaluation of heat pumps considering dynamic boundary conditions in the energy system. <i>Energy</i> , 2017 , 138, 60-78	7.9	7
32	Optimal design of energy conversion units and envelopes for residential building retrofits using a comprehensive MILP model. <i>Applied Energy</i> , 2017 , 185, 1-15	10.7	42
31	A Platform for the Agent-based Control of HVAC Systems 2017 ,		6
30	MIP approach for designing heating systems in residential buildings and neighbourhoods. <i>Journal of Building Performance Simulation</i> , 2016 , 9, 316-330	2.8	11

29	Feasibility and potential of thermal demand side management in residential buildings considering different developments in the German energy market. <i>Energy Conversion and Management</i> , 2016 , 107, 86-95	10.6	30
28	Quantifying the operational flexibility of building energy systems with thermal energy storages. <i>Applied Energy</i> , 2016 , 181, 140-154	10.7	124
27	Next generation automation architecture for DC smart homes 2016 ,		6
26	Energy performance gap in refurbished German dwellings: Lesson learned from a field test. <i>Energy and Buildings</i> , 2016 , 127, 1146-1158	7	142
25	Analysis of occupants behavior related to the use of windows in German households. <i>Building and Environment</i> , 2016 , 103, 54-69	6.5	79
24	Workflow automation for combined modeling of buildings and district energy systems. <i>Energy</i> , 2016 , 117, 478-484	7.9	27
23	Thermoeconomic analysis of a building heating system. <i>Energy</i> , 2016 , 111, 351-363	7.9	14
22	Development and validation of grey-box models for forecasting the thermal response of occupied buildings. <i>Energy and Buildings</i> , 2016 , 117, 199-207	7	78
21	Potential and Optimal Sizing of Combined Heat and Electrical Storage in Private Households. <i>Energy Procedia</i> , 2016 , 99, 174-181	2.3	3
20	Ancillary services from Data Center HVAC systems and back-up generator sets 2016 ,		1
19	Exergy-based approaches for performance evaluation of building energy systems. <i>Sustainable Cities and Society</i> , 2016 , 25, 25-32	10.1	18
18	Simulation-based implementation and evaluation of a system of systems optimization algorithm in a building control system 2016 ,		7
17	Auswirkung von Wärmeverchiebungsvorgängen in energieeffizient sanierten Bestandswohngebäuden. <i>Bauphysik</i> , 2016 , 38, 19-24	0.4	5
16	Demand side management for city districts. <i>Building and Environment</i> , 2015 , 91, 283-293	6.5	50
15	The Effect of Furniture and Floor Covering Upon Dynamic Thermal Building Simulations. <i>Energy Procedia</i> , 2015 , 78, 2154-2159	2.3	13
14	Demonstration of an easy-to-apply, automated control tuning method for typical PID control loops in building energy systems 2015 ,		3
13	Decentralized scheduling strategy of heating systems for balancing the residual load. <i>Building and Environment</i> , 2015 , 86, 132-140	6.5	20
12	A comparison of thermal energy storage models for building energy system optimization. <i>Energy and Buildings</i> , 2015 , 93, 23-31	7	33

11	Exergetic Evaluation of Solar Controller Using Software-in-the-Loop Method. <i>Energy Procedia</i> , 2014 , 48, 850-857	2.3	6
10	Modelling long-wave radiation heat exchange for thermal network building simulations at urban scale using Modelica 2014 ,		6
9	A Medium Model for the Refrigerant Propane for Fast and Accurate Dynamic Simulations 2014 ,		3
8	Experimental study of the effect of turbulence intensities on the maximum velocity decay of an attached plane jet. <i>Energy and Buildings</i> , 2013 , 65, 127-136	7	16
7	Multiphysics Test Bed for Renewable Energy Systems in Smart Homes. <i>IEEE Transactions on Industrial Electronics</i> , 2013 , 60, 1235-1248	8.9	43
6	2013 ,		8
5	Dynamic Modeling, Simulation and Exergy Analysis of an Innovative Hydronic Heating System 2013 ,		6
4	New energy concepts and related information technologies: Dual Demand Side Management 2012 ,		20
3	Consumer benefits of electricity-price-driven heat pump operation in future smart grids 2011 ,		7
2	Energy and Comfort Model for Automobile Interior Spaces. <i>ATZ Worldwide</i> , 2011 , 113, 10-15	0.1	
1	Retrofit Solutions for Residential Buildings. <i>International Journal of Sustainable Building Technology and Urban Development</i> , 2011 , 2, 131-136		7
