#	ARTICLE	IF	CITATIONS
1	The classical and approximate sampling theorems and their equivalence for entire functions of exponential type. <i>Journal of Approximation Theory</i> , 2014, 179, 94-111.	0.8	10
2	The sampling theorem, Poisson's summation formula, general Parseval formula, reproducing kernel formula and the Paley-Wiener theorem for bandlimited signals – their interconnections. <i>Applicable Analysis</i> , 2011, 90, 431-461.	1.3	30
3	Approximation error of the Whittaker cardinal series in terms of an averaged modulus of smoothness covering discontinuous signals. <i>Journal of Mathematical Analysis and Applications</i> , 2006, 316, 269-306.	1.0	58
4	Classical and approximate sampling theorems; studies in the $\langle \text{mml:math altimg="sl1.gif" overflow="scroll" xmlns:xocs="http://www.elsevier.com/xml/xocs/dtd" xmlns:xs="http://www.w3.org/2001/XMLSchema" xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance" xmlns="http://www.elsevier.com/xml/ja/dtd" xmlns:ja="http://www.elsevier.com/xml/ja/dtd" xmlns:mml="http://www.w3.org/1998/Math/MathML" xmlns:tb="http://www.elsevier.com/xml/common/table/dtd" xmlns:sb="http://www.elsevier.com/xml/co$	0.8	48
5	An extension of the dyadic calculus with fractional order derivatives. Further theory and applications. <i>Computers and Mathematics With Applications</i> , 1986, 12, 921-943.	2.7	2
6	An extension of the dyadic calculus with fractional order derivatives: General theory. <i>Computers and Mathematics With Applications</i> , 1986, 12, 1073-1090.	2.7	7
7	Central limit theorem and weak law of large numbers with rates for martingales in Banach spaces. <i>Journal of Multivariate Analysis</i> , 1983, 13, 287-301.	1.0	18
8	The Euler-MacLaurin summation formula, the sampling theorem, and approximate integration over the real axis. <i>Linear Algebra and Its Applications</i> , 1983, 52-53, 141-155.	0.9	18
9	Dyadic calculus and sampling theorems for functions with multidimensional domain I. General theory. <i>Information and Control</i> , 1982, 52, 333-351.	1.1	14
10	Dyadic calculus and sampling theorems for functions with multidimensional domain II. Applications to dyadic sampling representations. <i>Information and Control</i> , 1982, 52, 352-363.	1.1	0
11	Stable Limit Law and Weak Law of Large Numbers for Hilbert Space with $\epsilon$ -Large- $\epsilon$ -Rates. , 1981, , 77-100.		0
12	On quantization, truncation and jitter errors in the sampling theorem and its generalizations. <i>Signal Processing</i> , 1980, 2, 101-112.	3.7	31
13	General theorems on $\epsilon$ -rates of closeness of two weighted sums of independent Hilbert space valued random variables with applications. <i>Journal of Multivariate Analysis</i> , 1979, 9, 487-510.	1.0	4
14	Approximation by Algebraic Convolution Integrals. <i>North-Holland Mathematics Studies</i> , 1979, 35, 71-120.	0.2	17
15	General theorems on rates of convergence in distribution of random variables II. Applications to the stable limit laws and weak law of large numbers. <i>Journal of Multivariate Analysis</i> , 1978, 8, 202-221.	1.0	26
16	Sampling principle for duration-limited signals and dyadic Walsh analysis. <i>Information Sciences</i> , 1978, 14, 93-106.	6.9	12
17	General theorems on rates of convergence in distribution of random variables I. General limit theorems. <i>Journal of Multivariate Analysis</i> , 1978, 8, 181-201.	1.0	21
18	A sampling theorem for duration-limited functions with error estimates. <i>Information and Control</i> , 1977, 34, 55-65.	1.1	61

#	ARTICLE	IF	CITATIONS
19	Linear functionals defined on various spaces of continuous functions on $\mathbb{R}$ . <i>Journal of Approximation Theory</i> , 1975, 13, 451-469.	0.8	5
20	On the rate of approximation in the central limit theorem. <i>Journal of Approximation Theory</i> , 1975, 13, 327-340.	0.8	35
21	Jackson and Bernstein-type inequalities for families of commutative operators in Banach spaces. <i>Journal of Approximation Theory</i> , 1972, 5, 308-342.	0.8	50
22	Contributions to the theory of saturation for singular integrals in several variables. I. Proceedings of the Koninklijke Nederlandse Akademie Van Wetenschappen Series A, <i>Indagationes Mathematicae</i> , 1966, 69, 515-531.	0.3	18
23	Representation and approximation of functions by general singular integrals. Ia. Proceedings of the Koninklijke Nederlandse Akademie Van Wetenschappen Series A, <i>Indagationes Mathematicae</i> , 1960, 63, 1-2.	0.3	17
