#	ARTICLE	IF	CITATIONS
1	Fast neighborhood search for the single machine earliness-tardiness scheduling problem. Computers and Operations Research, 2010, 37, 1464-1471.	2.4	23
2	Scheduling in a two-machine flowshop for the minimization of the mean absolute deviation from a common due date. Computers and Operations Research, 2009, 36, 60-72.	2.4	17
3	A new model for the preemptive earliness-tardiness scheduling problem. Computers and Operations Research, 2009, 36, 2242-2249.	2.4	12
4	The one-machine just-in-time scheduling problem with preemption. Discrete Optimization, 2009, 6, 10-22.	0.6	28
5	New Exact Algorithms for One-Machine Earliness-Tardiness Scheduling. INFORMS Journal on Computing, 2009, 21, 167-175.	1.0	57
6	Search tree based approaches for parallel machine scheduling. Computers and Operations Research, 2008, 35, 1127-1137.	2.4	11
7	Lower bounds for the earliness-tardiness scheduling problem on parallel machines with distinct due dates. European Journal of Operational Research, 2008, 189, 1305-1316.	3.5	57
8	A faster branch-and-bound algorithm for the earliness-tardiness scheduling problem. Journal of Scheduling, 2008, 11, 49-58.	1.3	50
9	Lagrangian bounds for just-in-time job-shop scheduling. Computers and Operations Research, 2008, 35, 906-915.	2.4	49
10	A Multiobjective Branch-and-Bound Framework: Application to the Biobjective Spanning Tree Problem. INFORMS Journal on Computing, 2008, 20, 472-484.	1.0	76
11	An improved earliness-tardiness timing algorithm. Computers and Operations Research, 2007, 34, 2931-2938.	2.4	36
12	Scheduling with periodic availability constraints and irregular cost functions. RAIRO - Operations Research, 2007, 41, 141-154.	1.0	1
13	Efficient neighborhood search for the one-machine earliness-tardiness scheduling problem. European Journal of Operational Research, 2006, 173, 108-119.	3.5	36
14	Dynasearch for the earliness-tardiness scheduling problem with release dates and setup constraints. Operations Research Letters, 2006, 34, 591-598.	0.5	37
15	Continuous filling and emptying of storage systems in constraint-based scheduling. European Journal of Operational Research, 2005, 165, 510-524.	3.5	8
16	Optimal timing of a sequence of tasks with general completion costs. European Journal of Operational Research, 2005, 165, 82-96.	3.5	36
17	Punctuality and idleness in just-in-time scheduling. European Journal of Operational Research, 2005, 167, 739-751.	3.5	8
18	Earliness-tardiness scheduling with setup considerations. Computers and Operations Research, 2005, 32, 1849-1865.	2.4	42

#	ARTICLE	IF	CITATIONS
19	The Continuous Assignment Problem and Its Application to Preemptive and Non-Preemptive Scheduling with Irregular Cost Functions. <i>INFORMS Journal on Computing</i> , 2004, 16, 198-208.	1.0	18
20	The One-Machine Problem with Earliness and Tardiness Penalties. <i>Journal of Scheduling</i> , 2003, 6, 533-549.	1.3	63
21	PERT scheduling with convex cost functions. <i>Theoretical Computer Science</i> , 2003, 292, 145-164.	0.5	36
22	Scheduling with tails and deadlines. <i>Journal of Scheduling</i> , 2001, 4, 105-121.	1.3	6
23	Preemptive Scheduling with Two Minimax Criteria. <i>Annals of Operations Research</i> , 2001, 107, 303-319.	2.6	10
24	Scheduling Tasks on Unrelated Machines: Large Neighborhood Improvement Procedures. <i>Journal of Heuristics</i> , 2001, 7, 519-531.	1.1	15
25	Multiple-Machine Lower Bounds for Shop-Scheduling Problems. <i>INFORMS Journal on Computing</i> , 2000, 12, 341-352.	1.0	10
26	Fiber-to-object assignment heuristics. <i>European Journal of Operational Research</i> , 1999, 117, 1-14.	3.5	14
