| # | ARTICLE                                                                                                                                                                                                                              | IF  | CITATIONS |
|---|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1 | Plant Growth-Promoting Bacteria: Effective Tools for Increasing Nutrient Use Efficiency and Yield of Crops. Sustainable Development and Biodiversity, 2021, , 293-313.                                                               | 1.7 | 2         |
| 2 | Enhancement in yield and nutritive qualities of strawberry fruits by the application of organic manures and biofertilizers. Scientia Horticulturae, 2021, 283, 110038.                                                               | 3.6 | 32        |
| 3 | Effect of plant growth promoting Bacillus spp. on nutritional properties of Amaranthus hypochondriacus grains. Saudi Journal of Biological Sciences, 2018, 25, 1066-1071.                                                            | 3.8 | 42        |
| 4 | Potential of native cold tolerant plant growth promoting bacilli to enhance nutrient use efficiency and yield of Amaranthus hypochondriacus. Plant and Soil, 2018, 428, 307-320.                                                     | 3.7 | 17        |
| 5 | Biological control of ragi blast disease by chitinase producing fluorescent Pseudomonas isolates. Organic Agriculture, 2017, 7, 63-71.                                                                                               | 2.4 | 21        |
| 6 | Genetic Diversity Among Cold-Tolerant Fluorescent Pseudomonas Isolates from Indian Himalayas and Their Characterization for Biocontrol and Plant Growth-Promoting Activities. Journal of Plant Growth Regulation, 2011, 30, 128-143. | 5.1 | 23        |
