4 Estimating the marginal hazard ratio by simultaneously using a set of propensity score models: A 1.6 4 5 ppmHR. Epidemiology, 2021, 32, e6-e7. 2.7 0 6 Inverse probability weighted Cox model in multi-site studies without sharing individual-level data. 1.5 5 7 Causal inference with noisy data: Bias analysis and estimation approaches to simultaneously addressing missingness and misclassification in binary outcomes. Statistics in Medicine, 2020, 39, 456-468. 1.6 3 8 Variable selection via the composite likelihood method for multilevel longitudinal data with missing responses and covariates. Computational Statistics and Data Analysis, 2019, 135, 25-34. 1.2 0 9 Inverse26probabilityà6ofáCtreatment weighted estimation of causal parameters in the presence of erroraécontaminated and timeaécdependent confounders. Biometrical Journal, 2019, 61, 1507-1525. 1.0 3 10 Privacy-protecting estimation of adjusted risk ratios using modified Poisson regression in multi-center studies. BMC Medical Research Methodology, 2019, 19, 228. 1.6 8 11 Weighted causal inference methods with mismeasured covariates and misclassified outcomes. 1.6 8 20 Causal inference with measurement error in outcomes: Bias analysis and estimation methods. 1.6 8	CITATIONS
2 Academic Pediatrics, 2022, 22, 1384-1389. 20 20 20 3 Variance estimation in inverse probability weighted Cox models. Biometrics, 2021, 77, 1101-1117. 1.4 21 4 Estimating the marginal hazard ratio by simultaneously using a set of propensity score models: A multiply robust approach. Statistics in Medicine, 2021, 40, 1224-1242. 1.6 4 5 ppmHR. Epidemiology, 2021, 32, e6-e7. 2.7 0 6 Inverse probability weighted Cox model in multi-site studies without sharing individual-level data. 1.5 2 7 Addressing missingness and misclassification in binary outcomes. Statistics in Medical Research, 2020, 29, 1668-1681. 1.6 1 8 Variable selection via the composite likelihood method for multilevel longitudinal data with missing responses and covariates. Computational Statistics and Data Analysis, 2019, 135, 25-34. 1.0 3 9 Inversea@probability3Cofi&Creatment weighted estimation of causal parameters in the presence of errora@contaminated and time@edependent confounders. Biometrical Journal, 2019, 61, 1507-1525. 1.0 3 10 Privacy-protecting estimation of adjusted risk ratios using modified Poisson regression in multi-center studies. BMC Medical Research Methodology, 2019, 19, 228. 1.6 3 11 Weighted causal inference methods with mismeasured covariates and misclassified outcomes.
