| #  | Article                                                                                                                                                                                | IF   | Citations |
|----|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 1  | Response to NK cell content does not seem to influence engraftment in exâvivo Tâcell depleted haploidentical stem cell transplantation. Stem Cell Reports, 2022, 17, 446-447.          | 4.8  | 0         |
| 2  | Targeting Mitochondrial Iron Metabolism Suppresses Tumor Growth and Metastasis by Inducing Mitochondrial Dysfunction and Mitophagy. Cancer Research, 2021, 81, 2289-2303.              | 0.9  | 51        |
| 3  | Improved hematopoietic stem cell transplantation upon inhibition of natural killer cell-derived interferon-gamma. Stem Cell Reports, 2021, 16, 1999-2013.                              | 4.8  | 6         |
| 4  | β-Catenin–TCF/LEF signaling promotes steady-state and emergency granulopoiesis via G-CSF receptor upregulation. Blood, 2020, 136, 2574-2587.                                           | 1.4  | 35        |
| 5  | Proliferation and Differentiation of Murine Myeloid Precursor 32D/G-CSF-R Cells. Journal of Visualized Experiments, 2018, , .                                                          | 0.3  | 3         |
| 6  | C/EBPÎ <sup>3</sup> is dispensable for steady-state and emergency granulopoiesis. Haematologica, 2018, 103, e331-e335.                                                                 | 3.5  | 6         |
| 7  | MicroRNA-143 targets ERK5 in granulopoiesis and predicts outcome of patients with acute myeloid leukemia. Cell Death and Disease, 2018, 9, 814.                                        | 6.3  | 23        |
| 8  | EVI2B is a C/EBP $\hat{l}\pm$ target gene required for granulocytic differentiation and functionality of hematopoietic progenitors. Cell Death and Differentiation, 2017, 24, 705-716. | 11.2 | 25        |
| 9  | ZNF143 protein is an important regulator of the myeloid transcription factor C/EBPα. Journal of Biological Chemistry, 2017, 292, 18924-18936.                                          | 3.4  | 20        |
| 10 | Disruption of the C/EBPα—miR-182 balance impairs granulocytic differentiation. Nature Communications, 2017, 8, 46.                                                                     | 12.8 | 38        |
| 11 | Cytokine-Mediated Natural Killer Cells Effects Impair Hematopoietic Stem Cell Function. Blood, 2016, 128, 2641-2641.                                                                   | 1.4  | 0         |
| 12 | DLX1 Affects Cell Cycle and Proliferation of Myeloid Leukemia Cells In Vitro and In Vivo. Blood, 2016, 128, 1666-1666.                                                                 | 1.4  | 0         |
