#	ARTICLE	IF	CITATIONS
1	Projecting Family-Work Conflict and Enrichment onto Others when Assessing Burnout and Promotability. Proceedings - Academy of Management, 2021, 2021, 13212.	0.1	2
2	The depressive price of being a sandwich-generation caregiver: can organizations and managers help?. European Journal of Work and Organizational Psychology, 2020, 29, 862-879.	3.7	12
3	Editorial Reflections on <i>Academy of Management Perspectives</i>â€™ Revised Editorial Mission. Academy of Management Perspectives, 2019, 33, 131-133.	6.8	1
4	â€œSelf stress is good for me, it's probably good for you tooâ€: Stress mindset and judgment of others' strain. Journal of Experimental Social Psychology, 2018, 74, 98-110.	2.2	25
5	The Mind Wandering Map â€“ An Integrative Framework for Studying Mind Wandering in Organizations. Proceedings - Academy of Management, 2018, 2018, 15017.	0.1	0
6	The effect of change in supervisor support and job control on change in vigor: Differential relationships for immigrant and native employees in Israel. Journal of Organizational Behavior, 2017, 38, 391-414.	4.7	24
7	Weakened Cholinergic Blockade of Inflammation Associates with Diabetes-Related Depression. Molecular Medicine, 2016, 22, 156-161.	4.4	31
8	All employees are equal, but some are more equal than others: dominance, agreeableness, and status inconsistency among men and women. European Journal of Work and Organizational Psychology, 2016, 25, 430-446.	3.7	8
9	Immigrants and natives: The effects of supervisor support and job control on changes in vigor. Proceedings - Academy of Management, 2016, 2016, 11929.	0.1	0
10	Till stress do us part: On the interplay between perceived stress and communication network dynamics.. Journal of Applied Psychology, 2015, 100, 1737-1751.	5.3	50
11	Fear of terror and increased job burnout over time: Examining the mediating role of insomnia and the moderating role of work support. Journal of Organizational Behavior, 2015, 36, 272-291.	4.7	56
12	Fear and C-reactive protein cosynergize annual pulse increases in healthy adults. Proceedings of the National Academy of Sciences of the United States of America, 2015, 112, E467-71.	7.1	35
13	Why wonâ€™t they participate? Barriers to participation in worksite health promotion programmes. European Journal of Work and Organizational Psychology, 2015, 24, 866-881.	3.7	24
14	Self-rated health is associated with elevated C-reactive protein even among apparently healthy individuals. Israel Medical Association Journal, 2015, 17, 213-8.	0.1	29
15	Effect of socioeconomic status on cardio-respiratory fitness. Journal of Cardiovascular Medicine, 2014, 15, 435-440.	1.5	10
16	Joint effect of chronic medical illness and burnout on depressive symptoms among employed adults.. Health Psychology, 2014, 33, 264-272.	1.6	41
17	Burnout and Vigor as Predictors of the Incidence of Hyperlipidemia among Healthy Employees. Applied Psychology: Health and Well-Being, 2013, 5, 79-98.	3.0	29
18	Job Demandâ€“Controlâ€“Support and diabetes risk: The moderating role of self-efficacy. European Journal of Work and Organizational Psychology, 2013, 22, 711-724.	3.7	5

#	ARTICLE	IF	CITATIONS
19	The Role of Personality in Predicting Repeat Participation in Periodic Health Screening. Journal of Personality, 2013, 81, 452-464.	3.2	27
20	Elevated alanine aminotransferase independently predicts new onset of depression in employees undergoing health screening examinations. Psychological Medicine, 2013, 43, 2603-2613.	4.5	20
21	The relationship between job enrichment and abdominal obesity: A longitudinal field study of apparently healthy individuals.. Journal of Occupational Health Psychology, 2013, 18, 458-468.	3.3	16
22	"Testing the Backlash Effect of Gender Stereotypes: Personality, Gender and Status Inconsistency". Proceedings - Academy of Management, 2013, 2013, 10188.	0.1	0
23	Job burnout and depression: Unraveling their temporal relationship and considering the role of physical activity.. Journal of Applied Psychology, 2012, 97, 699-710.	5.3	294
24	Burnout and Risk of Coronary Heart Disease. Psychosomatic Medicine, 2012, 74, 840-847.	2.0	167
25	Work characteristics as predictors of diabetes incidence among apparently healthy employees.. Journal of Occupational Health Psychology, 2012, 17, 259-267.	3.3	18
26	Life and Job Satisfaction as Predictors of the Incidence of Diabetes. Applied Psychology: Health and Well-Being, 2012, 4, 31-48.	3.0	10
27	The Relationships Between Self-Rated Health and Serum Lipids Across Time. International Journal of Behavioral Medicine, 2012, 19, 73-81.	1.7	11
28	Work-based predictors of mortality: A 20-year follow-up of healthy employees.. Health Psychology, 2011, 30, 268-275.	1.6	39
29	Feeling Vigorous and the Risks of All-Cause Mortality, Ischemic Heart Disease, and Diabetes: A 20-Year Follow-up of Healthy Employees. Psychosomatic Medicine, 2010, 72, 727-733.	2.0	30
30	Vigor, Anxiety, and Depressive Symptoms as Predictors of Changes in Fibrinogen and C-reactive Protein. Applied Psychology: Health and Well-Being, 2010, 2, 251-271.	3.0	14
31	Depression and the metabolic syndrome: gender-dependent associations. Depression and Anxiety, 2008, 25, 661-669.	4.1	84
32	Exposure to and fear of terror as predictors of self-rated health among apparently healthy employees. British Journal of Health Psychology, 2008, 13, 257-271.	3.5	14
33	Relation of Educational Level to Inflammation-Sensitive Biomarker Level. American Journal of Cardiology, 2008, 102, 1034-1039.	1.6	34
34	The Job Demand-Control-Support Model and stress-related low-grade inflammatory responses among healthy employees: A longitudinal study. Work and Stress, 2008, 22, 138-152.	4.5	32
35	The effects of physical fitness and feeling vigorous on self-rated health.. Health Psychology, 2008, 27, 567-575.	1.6	70
36	Heart rate and microinflammation in men: a relevant atherothrombotic link. Heart, 2007, 93, 940-944.	2.9	65

#	ARTICLE	IF	CITATIONS
37	Very low C-reactive protein in apparently healthy individuals: physiological status or just a reflection of an improved health profile. <i>Biomarkers</i> , 2007, 12, 645-656.	1.9	4
38	P1-17 LOW GRADE INFLAMMATION IN INDIVIDUALS WITH THE HYPERTRIGLYCERIDEMIC WAIST PHENOTYPE. ANOTHER FEATURE OF THIS ATHEROGENIC DYSMETABOLISM. <i>International Journal of Cardiology</i> , 2007, 122, S66.	1.7	0
39	P3-14 CHARACTERISTICS OF APPARENTLY HEALTHY INDIVIDUALS WITH VERY LOW C-REACTIVE PROTEIN CONCENTRATIONS. ARE THEY REALLY HEALTHY?. <i>International Journal of Cardiology</i> , 2007, 122, S105.	1.7	0
40	Burnout and risk of cardiovascular disease: Evidence, possible causal paths, and promising research directions.. <i>Psychological Bulletin</i> , 2006, 132, 327-353.	6.1	686
41	Burnout and Risk of Type 2 Diabetes: A Prospective Study of Apparently Healthy Employed Persons. <i>Psychosomatic Medicine</i> , 2006, 68, 863-869.	2.0	188
42	Lack of significant effect of low doses of aspirin on the concentrations of C-reactive protein in a group of individuals with atherothrombotic risk factors and vascular events. <i>Blood Coagulation and Fibrinolysis</i> , 2006, 17, 19-22.	1.0	16
43	Burnout and Health Review: Current Knowledge and Future Research Directions. , 2006, , 269-308.		59
44	Oral Temperature in Daily Life. A New Look in the Era of Microinflammation. <i>Inflammation</i> , 2006, 29, 103-107.	3.8	1
45	Obesity-related correlation between C-reactive protein and the calculated 10-y Framingham Coronary Heart Disease Risk Score. <i>International Journal of Obesity</i> , 2005, 29, 772-777.	3.4	21
46	Values of high-sensitivity C-reactive protein in each month of the year in apparently healthy individuals. <i>American Journal of Cardiology</i> , 2005, 95, 152-155.	1.6	44
47	Association of components of the metabolic syndrome with the appearance of aggregated red blood cells in the peripheral blood. An unfavorable hemorheological finding. <i>Diabetes/Metabolism Research and Reviews</i> , 2005, 21, 197-202.	4.0	26
48	Benign hereditary leukopenia-neutropenia does not result from lack of low grade inflammation. A new look in the era of microinflammation. <i>Blood Cells, Molecules, and Diseases</i> , 2005, 34, 135-140.	1.4	9
49	Increased erythropoiesis and subclinical inflammation as part of the metabolic syndrome. <i>Diabetes Research and Clinical Practice</i> , 2005, 69, 249-255.	2.8	27
50	The Association Between Burnout, Depression, Anxiety, and Inflammation Biomarkers: C-Reactive Protein and Fibrinogen in Men and Women.. <i>Journal of Occupational Health Psychology</i> , 2005, 10, 344-362.	3.3	253
51	Association of Fear of Terror With Low-Grade Inflammation Among Apparently Healthy Employed Adults. <i>Psychosomatic Medicine</i> , 2004, 66, 484-491.	2.0	43
