## Gianluca R Valensise

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/1259762/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	The 2013 European Seismic Hazard Model: key components and results. Bulletin of Earthquake Engineering, 2015, 13, 3553-3596.	4.1	407
2	The Database of Individual Seismogenic Sources (DISS), version 3: Summarizing 20Âyears of research on Italy's earthquake geology. Tectonophysics, 2008, 453, 20-43.	2.2	332
3	A seismic source zone model for the seismic hazard assessment of the Italian territory. Tectonophysics, 2008, 450, 85-108.	2.2	232
4	Faulting mechanism and complexity of the November 23, 1980, Campania‣ucania Earthquake, inferred from surface observations. Journal of Geophysical Research, 1990, 95, 15319-15341.	3.3	209
5	Paleoseismology along the 1980 surface rupture of the Irpinia Fault: Implications for earthquake recurrence in the southern Apennines, Italy. Journal of Geophysical Research, 1993, 98, 6561-6577.	3.3	183
6	A 125 Kyrâ€long geological record of seismic source repeatability: the Messina Straits (southern Italy) and the 1908 earthquake (M <sub>s</sub> 71/ <sub>2</sub> ). Terra Nova, 1992, 4, 472-483.	2.1	162
7	The investigation of potential earthquake sources in peninsular Italy: A review. , 2001, 5, 287-306.		122
8	Earthquakeâ€generated tsunamis in the Mediterranean Sea: Scenarios of potential threats to Southern Italy. Journal of Geophysical Research, 2008, 113, .	3.3	105
9	Fault parameters and slip distribution of the 1915 Avezzano, Italy, earthquake derived from geodetic observations. Bulletin of the Seismological Society of America, 1989, 79, 690-710.	2.3	96
10	CFTI5Med, the new release of the catalogue of strong earthquakes in Italy and in the Mediterranean area. Scientific Data, 2019, 6, 80.	5.3	90
11	The Seismotectonics of the Po Plain (Northern Italy): Tectonic Diversity in a Blind Faulting Domain. Pure and Applied Geophysics, 2015, 172, 1105-1142.	1.9	83
12	New geomorphic evidence for anticlinal growth driven by blind-thrust faulting along the northern Marche coastal belt (central Italy). Journal of Seismology, 2004, 8, 297-312.	1.3	82
13	The 28 December 1908 Messina Straits Earthquake (MW 7.1): A Great Earthquake throughout a Century of Seismology. Seismological Research Letters, 2009, 80, 243-259.	1.9	80
14	Seismology and Tectonic Setting of the 2002 Molise, Italy, Earthquake. Earthquake Spectra, 2004, 20, 23-37.	3.1	73
15	Deformation of the 125 ka marine terrace in Italy: tectonic implications. Geological Society Special Publication, 1999, 146, 71-110.	1.3	68
16	Unveiling the Sources of the Catastrophic 1456 Multiple Earthquake: Hints to an Unexplored Tectonic Mechanism in Southern Italy. Bulletin of the Seismological Society of America, 2007, 97, 725-748.	2.3	65
17	The Palos Verdes terraces, California: Bathtub rings from a buried reverse fault. Journal of Geophysical Research, 1994, 99, 4485-4494.	3.3	60
18	Seismogenic sources in the Adriatic Domain. Marine and Petroleum Geology, 2013, 42, 191-213.	3.3	58

#	Article	IF	CITATIONS
19	Seismotectonics of the southern Apennines and Adriatic foreland: Insights on active regional E-W shear zones from analogue modeling. Tectonics, 2006, 25, n/a-n/a.	2.8	54
20	Tectonic evidence for the ongoing Africaâ€Eurasia convergence in central Mediterranean foreland areas: A journey among longâ€lived shear zones, large earthquakes, and elusive fault motions. Journal of Geophysical Research, 2010, 115, .	3.3	49
21	Middle Pleistocene to Holocene activity of the Gondola Fault Zone (Southern Adriatic Foreland): Deformation of a regional shear zone and seismotectonic implications. Tectonophysics, 2008, 453, 110-121.	2.2	40
22	The effects of pre-existing discontinuities on the surface expression of normal faults: Insights from wet-clay analog modeling. Tectonophysics, 2016, 684, 157-175.	2.2	40
23	Geochemical signatures of large active faults: The example of the 5 February 1783, Calabrian earthquake (southern Italy). Journal of Seismology, 2004, 8, 363-380.	1.3	39
24	Rise and Fall of a Hypothesized Seismic Gap: Source Complexity in the Mw 7.0 16 December 1857 Southern Italy Earthquake. Bulletin of the Seismological Society of America, 2008, 98, 139-148.	2.3	39
25	The forgotten vulnerability: A geology- and history-based approach for ranking the seismic risk of earthquake-prone communities of the Italian Apennines. International Journal of Disaster Risk Reduction, 2017, 25, 289-300.	3.9	38
26	An inventory of river anomalies in the Po Plain, Northern Italy: evidence for active blind thrust faulting. Annals of Geophysics, 2009, 46, .	1.0	36
27	The role of pre-existing discontinuities in the development of extensional faults: An analog modeling perspective. Journal of Structural Geology, 2015, 74, 145-158.	2.3	34
28	Testing Different Tectonic Models for the Source of the M <sub>w</sub> 6.5, 30 October 2016, Norcia Earthquake (Central Italy): A Youthful Normal Fault, or Negative Inversion of an Old Thrust?. Tectonics, 2019, 38, 990-1017.	2.8	33
29	Scenarios of Earthquake-Generated Tsunamis for the Italian Coast of the Adriatic Sea. Pure and Applied Geophysics, 2008, 165, 2117-2142.	1.9	30
30	Is blind faulting truly invisible? Tectonic-controlled drainage evolution in the epicentral area of the May 2012, Emilia-Romagna earthquake sequence (northern Italy). Annals of Geophysics, 2012, 55, .	1.0	29
31	Reconciling deep seismogenic and shallow active faults through analogue modelling: the case of the Messina Straits (southern Italy). Journal of the Geological Society, 2011, 168, 191-199.	2.1	26
32	Testing a new hybrid approach to seismic hazard assessment: an application to the Calabrian Arc (Southern Italy). Natural Hazards, 1997, 14, 113-126.	3.4	25
33	Plio-Quaternary tectonic evolution of the Northern Apennines thrust fronts(Bologna-Ferrara) Tj ETQq1 1 0.78431	4 rgBT /O	verlock 10 Tf
34	Progressive growth of San Clemente Island, California, by blind thrust faulting: implications for fault slip partitioning in the California Continental Borderland. Geophysical Journal International, 1996, 126, 712-734.	2.4	23
35	Marine palaeoseismology from very high resolution seismic imaging: the Gondola Fault Zone (Adriatic) Tj ETQq1	l 0.78431 2.1	4 rgBT /Over
36	On the complexity of surface ruptures during normal faulting earthquakes: excerpts from the 6 April 2009 L'Aquila (central Italy) earthquake ( <i>M</i> <sub>w</sub> 6.3). Solid Earth, 2014, 5, 389-408.	2.8	21

GIANLUCA R VALENSISE

#	Article	IF	CITATIONS
37	On the complexity of earthquake sequences: a historical seismology perspective based on the L'Aquila seismicity (Abruzzo, Central Italy), 1315-1915. Earthquake and Structures, 2015, 8, 153-184.	1.0	21
38	A "Geodetic Gap―in the Calabrian Arc: Evidence for a Locked Subduction Megathrust?. Geophysical Research Letters, 2018, 45, 1794-1804.	4.0	20
39	Geodetic and seismologic evidence for slip variability along a blind normal fault in the Umbria-Marche 1997-1998 earthquakes (central Italy). Geophysical Journal International, 2003, 155, 819-829.	2.4	19
40	Recasting Historical Earthquakes in Coastal Areas (Gargano Promontory, Italy): Insights from Marine Paleoseismology. Bulletin of the Seismological Society of America, 2012, 102, 1-17.	2.3	19
41	Partitioning the Ongoing Extension of the Central Apennines (Italy): Fault Slip Rates and Bulk Deformation Rates From Geodetic and Stress Data. Journal of Geophysical Research: Solid Earth, 2020, 125, e2019JB018956.	3.4	19
42	Coseismic deformation pattern of the Emilia 2012 seismic sequence imaged by Radarsat-1 interferometry. Annals of Geophysics, 2012, 55, .	1.0	19
43	Understanding seismogenic processes in the Southern Calabrian Arc:a geodynamic perspective. Italian Journal of Geosciences, 2017, 136, 365-388.	0.8	18
44	Modes of fault reactivation from analogue modeling experiments: Implications for the seismotectonics of the Southern Adriatic foreland (Italy). Quaternary International, 2007, 171-172, 2-13.	1.5	17
45	The Seismotectonic Significance of Geofluids in Italy. Frontiers in Earth Science, 2021, 9, .	1.8	16
46	The Messina Strait Bridge. , 0, , .		16
47	Inferring the depth of pre-instrumental earthquakes from macroseismic intensity data:Âa case-history from Northern Italy. Scientific Reports, 2019, 9, 15583.	3.3	15
48	A fresh look at the seismotectonics of the Abruzzi (Central Apennines) following the 6 April 2009 L'Aquila earthquake (Mw 6.3). Italian Journal of Geosciences, 2012, , 309-329.	0.8	15
49	Aims and methods in territorial archaeology: possible clues to a strong fourth-century <scp>AD</scp> earthquake in the Straits of Messina (southern Italy). Geological Society Special Publication, 2000, 171, 45-70.	1.3	14
50	Seismogenic faulting, moment release patterns and seismic hazard along the central and southern Apennines and the Calabrian arc. , 2001, , 495-512.		13
51	Earthquakes in Italy: past, present and future. Episodes, 2003, 26, 245-249.	1.2	13
52	Pre-seismic slip on the 26 September 1997, Umbria-Marche Earthquake fault? Unexpected clues from the analysis of 1951-1992 elevation changes. Geophysical Research Letters, 1999, 26, 1953-1956.	4.0	12
53	Imaging the tectonic framework of the 24 August 2016, Amatrice (central Italy) earthquake sequence: new roles for old players?. Annals of Geophysics, 2016, 59, .	1.0	11
54	Earthquakes and depleted gas reservoirs: which comes first?. Natural Hazards and Earth System Sciences, 2015, 15, 2201-2208.	3.6	10

GIANLUCA R VALENSISE

#	Article	IF	CITATIONS
55	Investigating seismogenic faults in Central and Southern Apennines (Italy): modeling of fault-related landscape features. Annals of Geophysics, 1996, 39, .	1.0	10
56	Santa Cruz mountains (Loma Prieta) earthquake. Eos, 1989, 70, 1463.	0.1	9
57	A quantitative approach to the loading rate of seismogenic sources in Italy. Geophysical Journal International, 2018, 213, 2096-2111.	2.4	9
58	Do Strike-Slip Faults of Molise, Central-Southern Italy, Really Release a High Stress?. Bulletin of the Seismological Society of America, 2010, 100, 307-324.	2.3	8
59	Assessing the seismic coupling of shallow continental faults and its impact on seismic hazard estimates: a case-study from Italy. Geophysical Journal International, 0, , ggx002.	2.4	8
60	Paradoxes of Italian seismicity. Eos, 1990, 71, 1787-1788.	0.1	7
61	Reply to comment on †Insights from the <i>M</i> <sub><i>w</i></sub> 6.3 2009 L'Aquila earthquake (Central Apennines) – unveiling new seismogenic sources through their surface signatures: the adjacent San Pio Fault'. Terra Nova, 2011, 23, 421-423.	2.1	7
62	Insights from the <i>M</i> <sub>w</sub> 6.3, 2009 L'Aquila earthquake (Central Apennines) – unveiling new seismogenic sources through their surface signatures: the adjacent San Pio Fault. Terra Nova, 2011, 23, 108-115.	2.1	6
63	From Historical Seismology to seismogenic source models, 20 years on: Excerpts from the Italian experience. Tectonophysics, 2020, 774, 228189.	2.2	6
64	Fossil landscapes and youthful seismogenic sources in the central Apennines: excerpts from the 24 August 2016, Amatrice earthquake and seismic hazard implications. Annals of Geophysics, 2016, 59, .	1.0	5
65	Gas fields and large shallow seismogenic reverse faults are anticorrelated. Scientific Reports, 2022, 12, 1827.	3.3	5
66	Reply to "Comment on `The 28 December 1908 Messina Straits Earthquake (Mw 7.1): A Great Earthquake throughout a Century of Seismology,' by N. A. Pino, A. Piatanesi, G. Valensise, and E. Boschi" by A. Amoruso, L. Crescentini, and R. Scarpa. Seismological Research Letters, 2010, 81, 229-231.	1.9	4
67	High-frequency maximum observable shaking map of Italy from fault sources. Bulletin of Earthquake Engineering, 2012, 10, 1075-1107.	4.1	4
68	Comment on "The Curious Case of the 1346 Earthquake Recorded Only by Very Young Chroniclers―by Romano Camassi and Viviana Castelli. Seismological Research Letters, 2015, 86, 1185-1191.	1.9	2
69	Appendix to volume 44 suppl. 4, 2001 from I to IV. Annals of Geophysics, 2009, 44, .	1.0	2
70	What Is an Exceptional Earthquake?. Seismological Research Letters, 0, , .	1.9	1
71	WORKSHOP ON PALAEOSEISMOLOGY, 18?22 SEPTEMBER 1994, MARSHALL, CA, USA. Terra Nova, 1995, 7, 111-111.	2.1	0
72	Impact of Uncertainty on Loss Estimates for a Repeat of the 1908 Messina-Reggio Calabria Earthquake in Southern Italy. AIP Conference Proceedings, 2008, , .	0.4	0
