#	ARTICLE	IF	CITATIONS
1	The developmental trajectories of executive function from adolescence to old age. <i>Scientific Reports</i> , 2021, 11, 1382.	3.3	170
2	From self to social cognition: Theory of Mind mechanisms and their relation to Executive Functioning. <i>Cognition</i> , 2015, 138, 21-34.	2.2	124
3	Cross-cultural differences in adult Theory of Mind abilities: A comparison of native-English speakers and native-Chinese speakers on the Self/Other Differentiation task. <i>Quarterly Journal of Experimental Psychology</i> , 2018, 71, 2665-2676.	1.1	21
4	Age of avatar modulates the altercentric bias in a visual perspective-taking task: ERP and behavioral evidence. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2018, 18, 1298-1319.	2.0	21
5	Tracking developmental differences in real-world social attention across adolescence, young adulthood and older adulthood. <i>Nature Human Behaviour</i> , 2021, 5, 1381-1390.	12.0	20
6	Sensorimotor mu rhythm during action observation changes across the lifespan independently from social cognitive processes. <i>Developmental Cognitive Neuroscience</i> , 2019, 38, 100659.	4.0	15
7	Belief attribution in adults with and without autistic spectrum disorders. <i>Autism Research</i> , 2018, 11, 1542-1553.	3.8	13
8	Short-term physical training enhances mirror system activation to action observation. <i>Social Neuroscience</i> , 2020, 15, 98-107.	1.3	12
9	Exploring the role of self/other perspective-shifting in theory of mind with behavioural and EEG measures. <i>Social Neuroscience</i> , 2019, 14, 530-544.	1.3	9
10	The neural basis of belief-attribution across the lifespan: False-belief reasoning and the N400 effect. <i>Cortex</i> , 2020, 126, 265-280.	2.4	5
11	Training executive functions using an adaptive procedure over 21 days (10 training sessions) and an active control group. <i>Quarterly Journal of Experimental Psychology</i> , 2021, 74, 1579-1594.	1.1	3
