

Ian C Smith

List of Publications by Year in Descending Order

Source: <https://exaly.com/author-pdf/128830/ian-c-smith-publications-by-year.pdf>

Version: 2024-04-29

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

46

#	Paper	IF	Citations
46	Can a chloride channel blocker mitigate muscle fatigue?. <i>Journal of Physiology</i> , 2021 , 599, 2145-2147	3.9	1
45	Contractility of permeabilized rat vastus intermedius muscle fibres following high-fat, high-sucrose diet consumption. <i>Applied Physiology, Nutrition and Metabolism</i> , 2021 , 46, 1389-1399	3	1
44	Contractile history affects sag and boost properties of unfused tetanic contractions in human quadriceps muscles. <i>European Journal of Applied Physiology</i> , 2021 , 121, 645-658	3.4	1
43	A Comment on "A New Taxonomy for Postactivation Potentiation in Sport". <i>International Journal of Sports Physiology and Performance</i> , 2021 , 16, 163	3.5	4
42	A brief contraction has complex effects on summation of twitch pairs in human adductor pollicis. <i>Experimental Physiology</i> , 2020 , 105, 676-689	2.4	1
41	The effects of inorganic phosphate on contractile function of slow skeletal muscle fibres are length-dependent. <i>Biochemical and Biophysical Research Communications</i> , 2020 , 533, 818-823	3.4	2
40	Initial force production before sag is enhanced by prior contraction followed by a 3-minute rest period in fast motor units of the rat medial gastrocnemius. <i>Journal of Electromyography and Kinesiology</i> , 2020 , 53, 102429	2.5	1
39	Caffeine attenuates contraction-induced diminutions of the intracellular calcium transient in mouse lumbrical muscle ex vivo. <i>Canadian Journal of Physiology and Pharmacology</i> , 2019 , 97, 429-435	2.4	2
38	The sag response in human muscle contraction. <i>European Journal of Applied Physiology</i> , 2018 , 118, 1063-1077	3.1	4
37	The effect of ARC ablation on skeletal muscle morphology, function, and apoptotic signaling during aging. <i>Experimental Gerontology</i> , 2018 , 101, 69-79	4.5	1
36	Obesity, Metabolic Syndrome, and Musculoskeletal Disease: Common Inflammatory Pathways Suggest a Central Role for Loss of Muscle Integrity. <i>Frontiers in Physiology</i> , 2018 , 9, 112	4.6	113
35	Neuromuscular manifestations of work-related myalgia in women specific to extensor carpi radialis brevis. <i>Canadian Journal of Physiology and Pharmacology</i> , 2017 , 95, 404-419	2.4	1
34	Contraction-induced enhancement of relaxation during high force contractions of mouse lumbrical muscle at 37°C. <i>Journal of Experimental Biology</i> , 2017 , 220, 2870-2873	3	3
33	Titin force enhancement following active stretch of skinned skeletal muscle fibres. <i>Journal of Experimental Biology</i> , 2017 , 220, 3110-3118	3	15
32	Nonlocalized postactivation performance enhancement (PAPE) effects in trained athletes: a pilot study. <i>Applied Physiology, Nutrition and Metabolism</i> , 2017 , 42, 1122-1125	3	39
31	Acute and chronic changes in rat soleus muscle after high-fat high-sucrose diet. <i>Physiological Reports</i> , 2017 , 5, e13270	2.6	21
30	A High-Fat High-Sucrose Diet Rapidly Alters Muscle Integrity, Inflammation and Gut Microbiota in Male Rats. <i>Scientific Reports</i> , 2016 , 6, 37278	4.9	65

29	Can inorganic phosphate explain sag during unfused tetanic contractions of skeletal muscle?. <i>Physiological Reports</i> , 2016 , 4, e13043	2.6	10
28	Diaphragm assessment in mice overexpressing phospholamban in slow-twitch type I muscle fibers. <i>Brain and Behavior</i> , 2016 , 6, e00470	3.4	13
27	Phospholamban overexpression in mice causes a centronuclear myopathy-like phenotype. <i>DMM Disease Models and Mechanisms</i> , 2015 , 8, 999-1009	4.1	21
26	Cellular properties of extensor carpi radialis brevis and trapezius muscles in healthy males and females. <i>Canadian Journal of Physiology and Pharmacology</i> , 2015 , 93, 953-66	2.4	
25	The effects of buthionine sulfoximine treatment on diaphragm contractility and SERCA pump function in adult and middle aged rats. <i>Physiological Reports</i> , 2015 , 3, e12547	2.6	7
24	Functional, morphological, and apoptotic alterations in skeletal muscle of ARC deficient mice. <i>Apoptosis: an International Journal on Programmed Cell Death</i> , 2015 , 20, 310-26	5.4	15
23	Juxtaposition of the changes in intracellular calcium and force during staircase potentiation at 30 and 37°C. <i>Journal of General Physiology</i> , 2014 , 144, 561-70	3.4	11
22	Preliminary observations on high energy phosphates and metabolic pathway and transporter potentials in extensor carpi radialis brevis and trapezius muscles of women with work-related myalgia. <i>Canadian Journal of Physiology and Pharmacology</i> , 2014 , 92, 953-60	2.4	3
21	A pilot study to determine whether differences exist in histochemical properties between the trapezius and extensor carpi radialis brevis muscles in women with work-related myalgia. <i>Canadian Journal of Physiology and Pharmacology</i> , 2014 , 92, 315-23	2.4	4
20	Excitation-contraction coupling properties in women with work-related myalgia: a preliminary study. <i>Canadian Journal of Physiology and Pharmacology</i> , 2014 , 92, 498-506	2.4	6
19	Sarcoplipin provides a novel muscle-based mechanism for adaptive thermogenesis. <i>Exercise and Sport Sciences Reviews</i> , 2014 , 42, 136-42	6.7	30
18	Role of exercise duration on metabolic adaptations in working muscle to short-term moderate-to-heavy aerobic-based cycle training. <i>European Journal of Applied Physiology</i> , 2013 , 113, 1965-78	3.4	6
17	Sarcoplipin trumps β-adrenergic receptor signaling as the favored mechanism for muscle-based diet-induced thermogenesis. <i>FASEB Journal</i> , 2013 , 27, 3871-8	0.9	40
16	Adaptations in muscle metabolic regulation require only a small dose of aerobic-based exercise. <i>European Journal of Applied Physiology</i> , 2013 , 113, 313-24	3.4	6
15	Myosin phosphorylation and force potentiation in skeletal muscle: evidence from animal models. <i>Journal of Muscle Research and Cell Motility</i> , 2013 , 34, 317-32	3.5	38
14	Ablation of sarcoplipin decreases the energy requirements for Ca ²⁺ transport by sarco(endo)plasmic reticulum Ca ²⁺ -ATPases in resting skeletal muscle. <i>FEBS Letters</i> , 2013 , 587, 1687-92	3.8	39
13	Potentiation in mouse lumbrical muscle without myosin light chain phosphorylation: is resting calcium responsible?. <i>Journal of General Physiology</i> , 2013 , 141, 297-308	3.4	33
12	ATP consumption by sarcoplasmic reticulum Ca ²⁺ pumps accounts for 40-50% of resting metabolic rate in mouse fast and slow twitch skeletal muscle. <i>PLoS ONE</i> , 2013 , 8, e68924	3.7	67

11	Muscle cellular properties in the ice hockey player: a model for investigating overtraining?. <i>Canadian Journal of Physiology and Pharmacology</i> , 2012 , 90, 567-78	2.4	2
10	Can increases in capillarization explain the early adaptations in metabolic regulation in human muscle to short-term training?. <i>Canadian Journal of Physiology and Pharmacology</i> , 2012 , 90, 557-66	2.4	10
9	Malleability of human skeletal muscle sarcoplasmic reticulum to short-term training. <i>Applied Physiology, Nutrition and Metabolism</i> , 2011 , 36, 904-12	3	9
8	Muscle fatigue and excitation-contraction coupling responses following a session of prolonged cycling. <i>Acta Physiologica</i> , 2011 , 203, 441-55	5.6	10
7	The effect of skeletal myosin light chain kinase gene ablation on the fatigability of mouse fast muscle. <i>Journal of Muscle Research and Cell Motility</i> , 2011 , 31, 337-48	3.5	24
6	Muscle metabolic, enzymatic and transporter responses to a session of prolonged cycling. <i>European Journal of Applied Physiology</i> , 2011 , 111, 827-37	3.4	8
5	Association of peak aerobic power with capillary density but not oxidative potential in human vastus lateralis muscle. <i>Canadian Journal of Physiology and Pharmacology</i> , 2011 , 89, 819-27	2.4	2
4	Cellular responses in skeletal muscle to a season of ice hockey. <i>Applied Physiology, Nutrition and Metabolism</i> , 2010 , 35, 657-70	3	6
3	Posttetanic potentiation in mdx muscle. <i>Journal of Muscle Research and Cell Motility</i> , 2010 , 31, 267-77	3.5	7
2	Protection of muscle membrane excitability during prolonged cycle exercise with glucose supplementation. <i>Journal of Applied Physiology</i> , 2007 , 103, 331-9	3.7	22
1	Muscle metabolic, SR Ca(2+) -cycling responses to prolonged cycling, with and without glucose supplementation. <i>Journal of Applied Physiology</i> , 2007 , 103, 1986-98	3.7	36
