

Joan Dosta

List of Publications by Citations

Source: <https://exaly.com/author-pdf/1291170/joan-dosta-publications-by-citations.pdf>

Version: 2024-04-29

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
59	A critical review on anaerobic co-digestion achievements between 2010 and 2013. <i>Renewable and Sustainable Energy Reviews</i> , 2014 , 36, 412-427	16.2	640
58	Short- and long-term effects of temperature on the Anammox process. <i>Journal of Hazardous Materials</i> , 2008 , 154, 688-93	12.8	247
57	Codigestion of solid wastes: a review of its uses and perspectives including modeling. <i>Critical Reviews in Biotechnology</i> , 2011 , 31, 99-111	9.4	190
56	Short- and long-term effects of ammonium and nitrite on the Anammox process. <i>Journal of Environmental Management</i> , 2012 , 95 Suppl, S170-4	7.9	156
55	Two ways to achieve an anammox influent from real reject water treatment at lab-scale: Partial SBR nitrification and SHARON process. <i>Process Biochemistry</i> , 2007 , 42, 715-720	4.8	93
54	Effect of ultrasound pretreatment in mesophilic and thermophilic anaerobic digestion with emphasis on naphthalene and pyrene removal. <i>Water Research</i> , 2007 , 41, 87-94	12.5	93
53	Anaerobic co-digestion of sewage sludge and fruit wastes: Evaluation of the transitory states when the co-substrate is changed. <i>Chemical Engineering Journal</i> , 2015 , 262, 1268-1274	14.7	81
52	Volatile fatty acid production from mesophilic acidogenic fermentation of organic fraction of municipal solid waste and food waste under acidic and alkaline pH. <i>Environmental Science and Pollution Research</i> , 2019 , 26, 35509-35522	5.1	56
51	Evaluation of hydroxyapatite crystallization in a batch reactor for the valorization of alkaline phosphate concentrates from wastewater treatment plants using calcium chloride. <i>Chemical Engineering Journal</i> , 2015 , 267, 142-152	14.7	55
50	Operation and model description of a sequencing batch reactor treating reject water for biological nitrogen removal via nitrite. <i>Bioresource Technology</i> , 2007 , 98, 2065-75	11	50
49	Integrating the selection of PHA storing biomass and nitrogen removal via nitrite in the main wastewater treatment line. <i>Bioresource Technology</i> , 2016 , 200, 820-9	11	47
48	Advances in anaerobic membrane bioreactor technology for municipal wastewater treatment: A 2020 updated review. <i>Renewable and Sustainable Energy Reviews</i> , 2020 , 130, 109936	16.2	46
47	Biodegradation of PAH and DEHP micro-pollutants in mesophilic and thermophilic anaerobic sewage sludge digestion. <i>Water Science and Technology</i> , 2006 , 53, 99-107	2.2	43
46	Two-step partial nitrification/Anammox process in granulation reactors: Start-up operation and microbial characterization. <i>Journal of Environmental Management</i> , 2015 , 164, 196-205	7.9	36
45	Phenol removal from hypersaline wastewaters in a Membrane Biological Reactor (MBR): operation and microbiological characterisation. <i>Bioresource Technology</i> , 2011 , 102, 4013-20	11	36
44	PCB and AOX removal in mesophilic and thermophilic sewage sludge digestion. <i>Biochemical Engineering Journal</i> , 2007 , 36, 281-287	4.2	34
43	Start-up of an aerobic granular sequencing batch reactor for the treatment of winery wastewater. <i>Water Science and Technology</i> , 2009 , 60, 1049-54	2.2	33

42	Techno-economic analysis of combining forward osmosis-reverse osmosis and anaerobic membrane bioreactor technologies for municipal wastewater treatment and water production. <i>Bioresource Technology</i> , 2020 , 297, 122395	11	30
41	ORP slope and feast/famine strategy as the basis of the control of a granular sequencing batch reactor treating winery wastewater. <i>Biochemical Engineering Journal</i> , 2012 , 68, 190-198	4.2	29
40	Integration of a Coagulation/Flocculation step in a biological sequencing batch reactor for COD and nitrogen removal of supernatant of anaerobically digested piggery wastewater. <i>Bioresource Technology</i> , 2008 , 99, 5722-30	11	29
39	Simultaneous ammonium and phosphate recovery and stabilization from urban sewage sludge anaerobic digestates using reactive sorbents. <i>Science of the Total Environment</i> , 2018 , 630, 781-789	10.2	25
38	Volatile fatty acids production from biowaste at mechanical-biological treatment plants: Focusing on fermentation temperature. <i>Bioresource Technology</i> , 2020 , 314, 123729	11	24
37	Start-up and operation of an AnMBR for winery wastewater treatment. <i>Ecological Engineering</i> , 2016 , 86, 279-289	3.9	23
36	SBR technology for high ammonium loading rates. <i>Water Science and Technology</i> , 2008 , 58, 467-72	2.2	21
35	Biological Nitrogen Removal via Nitrite of Reject Water with a SBR and Chemostat SHARON/Denitrification Process. <i>Industrial & Engineering Chemistry Research</i> , 2006 , 45, 7656-7660	3.9	20
34	Partial nitrification of sludge reject water using suspended and granular biomass. <i>Journal of Chemical Technology and Biotechnology</i> , 2011 , 86, 1480-1487	3.5	18
33	Impact of paper and cardboard suppression on OFMSW anaerobic digestion. <i>Waste Management</i> , 2016 , 56, 100-5	8.6	18
32	Use of Hydrolyzed Primary Sludge as Internal Carbon Source for Denitrification in a SBR Treating Reject Water via Nitrite. <i>Industrial & Engineering Chemistry Research</i> , 2006 , 45, 7661-7666	3.9	17
31	Co-digestion of sewage sludge and food waste in a wastewater treatment plant based on mainstream anaerobic membrane bioreactor technology: A techno-economic evaluation. <i>Bioresource Technology</i> , 2021 , 330, 124978	11	15
30	Comparison of aerobic granulation and anaerobic membrane bioreactor technologies for winery wastewater treatment. <i>Water Science and Technology</i> , 2014 , 69, 320-7	2.2	13
29	Biological Nitrogen Removal (BNR) Using Sulfides for Autotrophic Denitrification in a Sequencing Batch Reactor (SBR) To Treat Reject Water. <i>Industrial & Engineering Chemistry Research</i> , 2007 , 46, 6646-6649	3.9	13
28	Comparison of reject water treatment with nitrification/denitrification via nitrite in SBR and SHARON chemostat process. <i>Environmental Technology (United Kingdom)</i> , 2007 , 28, 173-6	2.6	12
27	Detrimental effects of magnesium (II) on hydroxyapatite precipitation from synthetic industrial brines. <i>Chemical Engineering Journal</i> , 2016 , 283, 572-581	14.7	10
26	Study of the biological N removal over nitrite in a physico-chemical-biological treatment of digested pig manure in a SBR. <i>Water Science and Technology</i> , 2008 , 58, 119-25	2.2	10
25	Assessing the potential of waste activated sludge and food waste co-fermentation for carboxylic acids production. <i>Science of the Total Environment</i> , 2021 , 757, 143763	10.2	10

24	Partial nitrification of sludge reject water by means of aerobic granulation. <i>Water Science and Technology</i> , 2011 , 64, 1906-12	2.2	9
23	Optimization of Biological Nitrogen Removal via Nitrite in a SBR Treating Supernatant from the Anaerobic Digestion of Municipal Solid Wastes. <i>Industrial & Engineering Chemistry Research</i> , 2006 , 45, 2787-2792	3.9	9
22	Exploring the potential of co-fermenting sewage sludge and lipids in a resource recovery scenario. <i>Bioresource Technology</i> , 2020 , 300, 122561	11	8
21	Sludge settling enhancement in a pilot scale activated sludge process treating petrochemical wastewater by implementing aerobic or anoxic selectors. <i>Journal of Environmental Chemical Engineering</i> , 2017 , 5, 3472-3482	6.8	7
20	Optimisation of nitrification-denitrification process in a sbr for the treatment of reject water via nitrite. <i>Environmental Technology (United Kingdom)</i> , 2007 , 28, 565-71	2.6	6
19	Nitrogen recovery from pig slurry by struvite precipitation using a low-cost magnesium oxide. <i>Science of the Total Environment</i> , 2021 , 768, 144284	10.2	6
18	Unravelling the economics behind mainstream anaerobic membrane bioreactor application under different plant layouts. <i>Bioresource Technology</i> , 2021 , 319, 124170	11	6
17	Mainstream Deammonification: Preliminary Experience Employing Granular AOB-Enriched Biomass at Low DO Values. <i>Water, Air, and Soil Pollution</i> , 2017 , 228, 1	2.6	5
16	Acidogenic Fermentation and Anaerobic Co-digestion of Mechanically Sorted OFMSW and Polyethylene Glycol. <i>Waste and Biomass Valorization</i> , 2018 , 9, 2319-2326	3.2	5
15	Enhancement of Volatile Fatty Acids Production from Food Waste by Mature Compost Addition. <i>Molecules</i> , 2019 , 24,	4.8	5
14	Modelling a sequencing batch reactor to treat the supernatant from anaerobic digestion of the organic fraction of municipal solid waste. <i>Journal of Chemical Technology and Biotechnology</i> , 2007 , 82, 158-164	3.5	5
13	Anaerobic membrane bioreactor performance at different wastewater pre-concentration factors: An experimental and economic study. <i>Science of the Total Environment</i> , 2021 , 750, 141625	10.2	5
12	Influence of hydraulic retention time, food-to-microorganism ratio and influent biodegradability on the performance of an aerobic selector treating petrochemical wastewater. <i>Journal of Environmental Chemical Engineering</i> , 2017 , 5, 5033-5042	6.8	4
11	Start-up of a biological sequencing batch reactor to treat supernatant from anaerobic sludge digester. <i>Environmental Technology (United Kingdom)</i> , 2006 , 27, 891-9	2.6	4
10	Effect of the mixed liquor parameters on sludge settling for a petrochemical activated sludge system including an aerobic selector. <i>Journal of Environmental Chemical Engineering</i> , 2018 , 6, 1062-1071	6.8	3
9	Influence of temperature on the partial nitrification of reject water in a granular sequencing batch reactor. <i>Environmental Technology (United Kingdom)</i> , 2013 , 34, 2625-32	2.6	3
8	Understanding the Anaerobic Digestibility of Lignocellulosic Substrates Using Rumen Content as a Cosubstrate and an Inoculum. <i>ACS ES&T Engineering</i> , 2021 , 1, 424-435		3
7	Biological nitrification control by addition of folic acid in a petrochemical wastewater treatment focused on organic matter removal. <i>Journal of Environmental Chemical Engineering</i> , 2019 , 7, 102935	6.8	2

6	Aerobic/anoxic post-treatment of anaerobically digested sewage sludge as an alternative to biological nitrogen removal from reject water. <i>Bioprocess and Biosystems Engineering</i> , 2015 , 38, 823-31	3.7	1
5	Ammonia recovery from acidogenic fermentation effluents using a gas-permeable membrane contactor.. <i>Bioresource Technology</i> , 2022 , 356, 127273	11	1
4	Potential of anaerobic co-fermentation in wastewater treatments plants: A review.. <i>Science of the Total Environment</i> , 2021 , 152498	10.2	0
3	Impact of permeate flux and gas sparging rate on membrane performance and process economics of granular anaerobic membrane bioreactors.. <i>Science of the Total Environment</i> , 2022 , 153907	10.2	0
2	Operation of the SHARON denitrification process to treat sludge reject water using hydrolyzed primary sludge to denitrify. <i>Water Environment Research</i> , 2008 , 80, 197-204	2.8	
1	Techno-economic analysis of forward osmosis pre-concentration before an anaerobic membrane bioreactor: Impact of draw solute and membrane material. <i>Journal of Cleaner Production</i> , 2022 , 131776	10.3
