

J Toftum

List of Publications by Citations

Source: <https://exaly.com/author-pdf/1291753/j-toftum-publications-by-citations.pdf>

Version: 2024-04-26

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
70	Extension of the PMV model to non-air-conditioned buildings in warm climates. <i>Energy and Buildings</i> , 2002 , 34, 533-536	7	429
69	Progress in thermal comfort research over the last twenty years. <i>Indoor Air</i> , 2013 , 23, 442-61	5.4	277
68	Survey of occupant behaviour and control of indoor environment in Danish dwellings. <i>Energy and Buildings</i> , 2009 , 41, 11-16	7	241
67	Children's phthalate intakes and resultant cumulative exposures estimated from urine compared with estimates from dust ingestion, inhalation and dermal absorption in their homes and daycare centers. <i>PLoS ONE</i> , 2013 , 8, e62442	3.7	190
66	Differences between young adults and elderly in thermal comfort, productivity, and thermal physiology in response to a moderate temperature drift and a steady-state condition. <i>Indoor Air</i> , 2010 , 20, 273-83	5.4	184
65	Window opening behaviour modelled from measurements in Danish dwellings. <i>Building and Environment</i> , 2013 , 69, 101-113	6.5	182
64	Development of the ASHRAE Global Thermal Comfort Database II. <i>Building and Environment</i> , 2018 , 142, 502-512	6.5	164
63	Phthalate and PAH concentrations in dust collected from Danish homes and daycare centers. <i>Atmospheric Environment</i> , 2010 , 44, 2294-2301	5.3	138
62	Ventilation rates in the bedrooms of 500 Danish children. <i>Building and Environment</i> , 2010 , 45, 2289-2295	6.5	130
61	Transdermal Uptake of Diethyl Phthalate and Di(n-butyl) Phthalate Directly from Air: Experimental Verification. <i>Environmental Health Perspectives</i> , 2015 , 123, 928-34	8.4	126
60	Upper limits of air humidity for preventing warm respiratory discomfort. <i>Energy and Buildings</i> , 1998 , 28, 15-23	7	126
59	Upper limits for indoor air humidity to avoid uncomfortably humid skin. <i>Energy and Buildings</i> , 1998 , 28, 1-13	7	99
58	Phthalate metabolites in urine samples from Danish children and correlations with phthalates in dust samples from their homes and daycare centers. <i>International Journal of Hygiene and Environmental Health</i> , 2014 , 217, 78-87	6.9	98
57	Role of clothing in both accelerating and impeding dermal absorption of airborne SVOCs. <i>Journal of Exposure Science and Environmental Epidemiology</i> , 2016 , 26, 113-8	6.7	97
56	Air movement--good or bad?. <i>Indoor Air</i> , 2004 , 14 Suppl 7, 40-5	5.4	87
55	A Bayesian Network approach to the evaluation of building design and its consequences for employee performance and operational costs. <i>Building and Environment</i> , 2009 , 44, 456-462	6.5	83
54	Phthalate exposure through different pathways and allergic sensitization in preschool children with asthma, allergic rhinoconjunctivitis and atopic dermatitis. <i>Environmental Research</i> , 2015 , 137, 432-9	7.9	79

53	Association between classroom ventilation mode and learning outcome in Danish schools. <i>Building and Environment</i> , 2015 , 92, 494-503	6.5	67
52	Modeling ventilation rates in bedrooms based on building characteristics and occupant behavior. <i>Building and Environment</i> , 2011 , 46, 2230-2237	6.5	65
51	Thermal sensation and thermophysiological responses to metabolic step-changes. <i>International Journal of Biometeorology</i> , 2006 , 50, 323-32	3.7	63
50	Draught sensitivity is influenced by general thermal sensation. <i>International Journal of Industrial Ergonomics</i> , 1996 , 18, 295-305	2.9	59
49	Comfort and performance impact of personal control over thermal environment in summer: Results from a laboratory study. <i>Building and Environment</i> , 2015 , 87, 315-326	6.5	58
48	Occupant performance and building energy consumption with different philosophies of determining acceptable thermal conditions. <i>Building and Environment</i> , 2009 , 44, 2009-2016	6.5	55
47	Indoor air quality and occupant satisfaction in five mechanically and four naturally ventilated open-plan office buildings. <i>Building and Environment</i> , 2007 , 42, 4051-4058	6.5	55
46	Organophosphate esters in dust samples collected from Danish homes and daycare centers. <i>Chemosphere</i> , 2016 , 154, 559-566	8.4	49
45	Squalene and cholesterol in dust from danish homes and daycare centers. <i>Environmental Science & Technology</i> , 2011 , 45, 3872-9	10.3	47
44	Contribution of various microenvironments to the daily personal exposure to ultrafine particles: Personal monitoring coupled with GPS tracking. <i>Atmospheric Environment</i> , 2015 , 110, 122-129	5.3	46
43	Human response to combined indoor environment exposures. <i>Energy and Buildings</i> , 2002 , 34, 601-606	7	46
42	Central automatic control or distributed occupant control for better indoor environment quality in the future. <i>Building and Environment</i> , 2010 , 45, 23-28	6.5	45
41	Phthalate metabolites in urine and asthma, allergic rhinoconjunctivitis and atopic dermatitis in preschool children. <i>International Journal of Hygiene and Environmental Health</i> , 2014 , 217, 645-52	6.9	41
40	Associations between selected allergens, phthalates, nicotine, polycyclic aromatic hydrocarbons, and bedroom ventilation and clinically confirmed asthma, rhinoconjunctivitis, and atopic dermatitis in preschool children. <i>Indoor Air</i> , 2014 , 24, 136-47	5.4	40
39	Secondary organic aerosols from ozone-initiated reactions with emissions from wood-based materials and a green paint. <i>Atmospheric Environment</i> , 2008 , 42, 7632-7640	5.3	39
38	Dermal uptake of nicotine from air and clothing: Experimental verification. <i>Indoor Air</i> , 2018 , 28, 247-257	5.4	39
37	Diurnal and seasonal variation in air exchange rates and interzonal airflows measured by active and passive tracer gas in homes. <i>Building and Environment</i> , 2016 , 104, 178-187	6.5	37
36	Influence of ozone-limonene reactions on perceived air quality. <i>Indoor Air</i> , 2006 , 16, 168-78	5.4	37

35	New indoor environment chambers and field experiment offices for research on human comfort, health and productivity at moderate energy expenditure. <i>Energy and Buildings</i> , 2004 , 36, 899-903	7	36
34	Measurements of dermal uptake of nicotine directly from air and clothing. <i>Indoor Air</i> , 2017 , 27, 427-433	5.4	34
33	Occupant Responses and Office Work Performance in Environments with Moderately Drifting Operative Temperatures (RP-1269). <i>HVAC and R Research</i> , 2009 , 15, 931-960		34
32	Ultrafine particles: exposure and source apportionment in 56 Danish homes. <i>Environmental Science & Technology</i> , 2013 , 47, 10240-8	10.3	32
31	Simulation of energy use, human thermal comfort and office work performance in buildings with moderately drifting operative temperatures. <i>Energy and Buildings</i> , 2011 , 43, 2988-2997	7	32
30	Occupant response to different correlated colour temperatures of white LED lighting. <i>Building and Environment</i> , 2018 , 143, 258-268	6.5	31
29	Children's health and its association with indoor environments in Danish homes and daycare centres - methods. <i>Indoor Air</i> , 2012 , 22, 467-75	5.4	30
28	Human projected area factors for detailed direct and diffuse solar radiation analysis. <i>International Journal of Biometeorology</i> , 2004 , 49, 113-29	3.7	30
27	Impact of metabolic rate on human response to air movements during work in cool environments. <i>International Journal of Industrial Ergonomics</i> , 1996 , 18, 307-316	2.9	30
26	Dermal Uptake of Benzophenone-3 from Clothing. <i>Environmental Science & Technology</i> , 2017 , 51, 11371-11379	10.3	29
25	Fifty years of Fanger's equation: Is there anything to discover yet?. <i>International Journal of Industrial Ergonomics</i> , 2018 , 66, 157-160	2.9	27
24	The impact of a photocatalytic paint on indoor air pollutants: Sensory assessments. <i>Building and Environment</i> , 2012 , 57, 396-402	6.5	27
23	Reflections on the state of research: indoor environmental quality. <i>Indoor Air</i> , 2011 , 21, 219-30	5.4	24
22	Human Response to Air Movement Evaluation of ASHRAE's Draft Criteria (RP-843). <i>HVAC and R Research</i> , 2003 , 9, 187-202		21
21	Window and door opening behavior, carbon dioxide concentration, temperature, and energy use during the heating season in classrooms with different ventilation retrofits ASHRAE RP1624. <i>Science and Technology for the Built Environment</i> , 2018 , 24, 626-637	1.8	19
20	Thermal adaptation in occupant-driven HVAC control. <i>Journal of Building Engineering</i> , 2019 , 25, 100846	5.2	18
19	Effects of diffuser airflow minima on occupant comfort, air mixing, and building energy use (RP-1515). <i>Science and Technology for the Built Environment</i> , 2015 , 21, 1075-1090	1.8	15
18	Comparison of Geometrical Layouts for a Multi-Box Aerosol Model from a Single-Chamber Dispersion Study. <i>Environments - MDPI</i> , 2018 , 5, 52	3.2	10

17	Field measurements of perceived air quality and concentration of volatile organic compounds in four offices of the university building. <i>Indoor and Built Environment</i> , 2015 , 24, 1048-1058	1.8	9
16	The effects of acoustical refurbishment of classrooms on teachers' perceived noise exposure and noise-related health symptoms. <i>International Archives of Occupational and Environmental Health</i> , 2016 , 89, 341-50	3.2	8
15	Effect of formaldehyde on ventilation rate and energy demand in Danish homes: Development of emission models and building performance simulation. <i>Building Simulation</i> , 2020 , 13, 197-212	3.9	8
14	Comparing predictions by existing explicit emission models to real world observations of formaldehyde emissions from solid materials. <i>Building Simulation</i> , 2020 , 13, 185-195	3.9	6
13	Prediction of Indoor Air Temperature Using Weather Data and Simple Building Descriptors. <i>International Journal of Environmental Research and Public Health</i> , 2019 , 16,	4.6	5
12	Influence on Occupant Responses of Behavioral Modification of Clothing Insulation in Nonsteady Thermal Environments (RP-1269). <i>HVAC and R Research</i> , 2010 , 16, 59-74		5
11	Field study of the indoor environment in a Danish prison. <i>Building and Environment</i> , 2015 , 88, 20-26	6.5	3
10	Removal of Organic Acids from Indoor Air in Museum Storage Rooms by Active and Passive Sorption Techniques. <i>Studies in Conservation</i> , 2020 , 65, 251-261	0.6	3
9	Indoor temperatures for optimum thermal comfort and human performance - reply to the letter by Wyon and Wargocki. <i>Indoor Air</i> , 2014 , 24, 554-5	5.4	3
8	Implementation of multivariate linear mixed-effects models in the analysis of indoor climate performance experiments. <i>International Journal of Biometeorology</i> , 2012 , 56, 129-36	3.7	2
7	ClimApp-Integrating Personal Factors with Weather Forecasts for Individualised Warning and Guidance on Thermal Stress. <i>International Journal of Environmental Research and Public Health</i> , 2021 , 18,	4.6	1
6	Nearly-zero energy buildings. <i>Science and Technology for the Built Environment</i> , 2016 , 22, 883-884	1.8	1
5	Lighting conditions in physiotherapy centres: A comparative field study. <i>Lighting Research and Technology</i> , 147715352110465	2	0
4	Perceptive and physiological adaptation of migrants with different thermal experiences: A long-term climate chamber experiment. <i>Building and Environment</i> , 2022 , 211, 108727	6.5	0
3	Development of a tool to predict the socio-economic consequences of better air quality and temperature control in classrooms. <i>Energy and Buildings</i> , 2021 , 250, 111274	7	0
2	Analysis of draught discomfort prediction models. <i>Journal of Physics: Conference Series</i> , 2021 , 2069, 012236		
1	Predicted and user perceived heat strain using the ClimApp mobile tool for individualized alert and advice. <i>Climate Risk Management</i> , 2021 , 34, 100381	4.6
