

# Bruno R R Oliveira

## List of Publications by Year in Descending Order

**Source:** <https://exaly.com/author-pdf/1298604/bruno-r-r-oliveira-publications-by-year.pdf>

**Version:** 2024-04-27

This document has been generated based on the publications and citations recorded by exaly.com. For the latest version of this publication list, visit the link given above.

The third column is the impact factor (IF) of the journal, and the fourth column is the number of citations of the article.

#	Paper	IF	Citations
26	Transcranial Direct Current Stimulation Combined With or Without Caffeine: Effects on Training Volume and Pain Perception.. <i>Research Quarterly for Exercise and Sport</i> , <b>2022</b> , 1-10	1.9	0
25	Cortisol Reactivity to a physical stressor in Patients with Depression and Alzheimer's disease. <i>Dementia E Neuropsychologia</i> , <b>2022</b> , 16, 61-68	2.1	
24	Anodal Transcranial Direct Current Stimulation Does Not Affect Velocity Loss During a Typical Resistance Exercise Session.. <i>Research Quarterly for Exercise and Sport</i> , <b>2022</b> , 1-10	1.9	
23	Influence of HIIRT With Fixed and Self-Selected Recovery Intervals on Physiological, Affective, and Enjoyment Responses.. <i>Research Quarterly for Exercise and Sport</i> , <b>2022</b> , 1-9	1.9	1
22	Correlation between economy/efficiency and mountain biking cross-country race performance. <i>European Journal of Sport Science</i> , <b>2021</b> , 1-8	3.9	0
21	Acute affective responses to high-intensity interval exercise: Implications on the use of different stimulus-recovery amplitudes. <i>European Journal of Sport Science</i> , <b>2021</b> , 1-11	3.9	1
20	Association between Estimated Cardiorespiratory Fitness and Depression among Middle-income Country Adults: Evidence from National Health Survey.. <i>Clinical Practice and Epidemiology in Mental Health</i> , <b>2021</b> , 17, 198-204	3.2	0
19	A classification of two-tier distribution systems based on mobile depots. <i>Transportation Research Procedia</i> , <b>2020</b> , 47, 115-122	2.4	6
18	Transcranial Direct Current Stimulation (tDCS) Improves Back-Squat Performance in Intermediate Resistance-Training Men. <i>Research Quarterly for Exercise and Sport</i> , <b>2020</b> , 1-9	1.9	4
17	Can transcranial direct current stimulation improve range of motion and modulate pain perception in healthy individuals?. <i>Neuroscience Letters</i> , <b>2019</b> , 707, 134311	3.3	1
16	Effects of Transcranial Direct Current Stimulation With Caffeine Intake on Muscular Strength and Perceived Exertion. <i>Journal of Strength and Conditioning Research</i> , <b>2019</b> , 33, 1237-1243	3.2	10
15	Effects of transcranial direct current stimulation on time limit and ratings of perceived exertion in physically active women. <i>Neuroscience Letters</i> , <b>2018</b> , 662, 12-16	3.3	34
14	Affective and enjoyment responses in high intensity interval training and continuous training: A systematic review and meta-analysis. <i>PLoS ONE</i> , <b>2018</b> , 13, e0197124	3.7	75
13	Heart Rate Variability Indexes in Dementia: A Systematic Review with a Quantitative Analysis. <i>Current Alzheimer Research</i> , <b>2018</b> , 15, 80-88	3	32
12	Acute effects of single dose transcranial direct current stimulation on muscle strength: A systematic review and meta-analysis. <i>PLoS ONE</i> , <b>2018</b> , 13, e0209513	3.7	26
11	Acute Affective Responses and Frontal Electroencephalographic Asymmetry to Prescribed and Self-selected Exercise. <i>Clinical Practice and Epidemiology in Mental Health</i> , <b>2016</b> , 12, 108-119	3.2	8
10	We need to move more: Neurobiological hypotheses of physical exercise as a treatment for Parkinson's disease. <i>Medical Hypotheses</i> , <b>2015</b> , 85, 537-41	3.8	53

9	Self-selected or imposed exercise? A different approach for affective comparisons. <i>Journal of Sports Sciences</i> , <b>2015</b> , 33, 777-85	3.6	16
8	Differences in exercise intensity seems to influence the affective responses in self-selected and imposed exercise: a meta-analysis. <i>Frontiers in Psychology</i> , <b>2015</b> , 6, 1105	3.4	32
7	Prediction of Affective Responses in Aerobic Exercise Sessions. <i>CNS and Neurological Disorders - Drug Targets</i> , <b>2015</b> , 14, 1214-8	2.6	19
6	Indicadores de desempenho no voleibol sentado. <i>Revista Da Educaçã Física</i> , <b>2014</b> , 25, 335		1
5	Continuous and high-intensity interval training: which promotes higher pleasure?. <i>PLoS ONE</i> , <b>2013</b> , 8, e79965	3.7	93
4	Comparison of two proposed guidelines for aerobic training sessions. <i>Perceptual and Motor Skills</i> , <b>2012</b> , 115, 645-60	2.2	1
3	Two-year citations of JAPPL original articles: evidence of a relative age effect. <i>Journal of Applied Physiology</i> , <b>2012</b> , 112, 1434-6	3.7	6
2	A new strategy for the implementation of an aerobic training session. <i>Journal of Strength and Conditioning Research</i> , <b>2012</b> , 26, 87-93	3.2	4
1	Can the self-selection of aerobic exercise be used in individuals with different cardiorespiratory fitness levels?. <i>Sport Sciences for Health</i> , 1	1.3
